Majors, Certificates, and Transfer Programs

ASSOCIATE DEGREE MAJORS

Since learning is a continual process of self-discovery, you are encouraged to keep an open mind about your potential and options. California Community Colleges have unique relationships with the UC and California State University systems, so you can move easily from a two-year to a four-year college. With proper planning, you can earn an associate degree while fulfilling the lower division requirements of a four-year school. As you choose courses at Merced College, you are encouraged to keep your options open for transfer.

Merced College awards Associate Degrees in the following majors:
