The online catalog is divided into three parts, each as a separate PDF. This is Part #3, Course Descriptions, which includes:

- Course Numbering
- Courses by Division
- Current Course Descriptions

This web version of the 2006-2007 Merced College Catalog is an adaptation of the official printed publication, and is published for informational purposes. Some content and references have been altered to facilitate posting to the web. Students are advised to consult the current Schedule of Classes and college counselors for supplementary information.

Accredited by the Western Association of Schools and Colleges

Merced College, 3600 M Street, Merced, CA 95348-2898
(209) 384-6000 www.mccd.edu
**Course Numbering**

All courses offered at Merced College are considered to be lower division. No upper division credit is granted.

Course numbers are assigned as follows:

- **Courses numbered 1-49** are certified as transferable to the California State University system. Other four-year institutions may accept courses numbered 1-49 as transferable, but students transferring to colleges outside the CSU system should consult the catalog of that college and confer with a counselor.
- **Courses numbered 50-79 and independent letters such as A, B, and C** designate courses that apply only to A.A./A.S. Degrees and to certificate programs and are not normally transferable to four-year institutions.
- **Courses numbered 80-89** designate intermediate developmental precollegiate basic skills courses OR certain occupational and activity credit courses. These courses do not apply to the Associate Degree or transfer programs.
- **Courses numbered 90-99** designate courses that are primary developmental precollegiate basic skills credit courses that do not apply to the Associate Degree or transfer programs.

**Computer and Information Literacy Competency** areas that a course fulfills are noted in brackets [ ]. **California State University Breadth** areas are noted in parentheses ( ).

**Course Descriptions**

Courses are listed alphabetically. Each course is listed by number with the course title, the number of units, and the number of hours of lecture and laboratory instruction. Preceding each description are listed the prerequisites and/or corequisites of the course.

All courses listed in this catalog are graded courses and meet the definition of "college credit courses" as stated by Section 55002, Part VI of Title 5 of the California Code of Regulations.

</table>
ACTG-04A FINANCIAL ACCOUNTING (CAN BUS 2)
4 units: 4 hours lecture.
Advisories: ACTG-51; ENGL-A; MATH-91.
This course provides the student with the knowledge of corporate financial statement reporting and the ability to analyze the reports of a corporation. Basic topics include analysis of transactions and preparation of financial statements related to developing an understanding of the financial condition of a corporation. This accounting course is recommended for students who have knowledge of or equivalent experience in the basics of bookkeeping. (11/01)

ACTG-04B MANAGERIAL ACCOUNTING (CAN BUS 4)
4 units: 4 hours lecture.
One-way corequisite: ACTG-04A or ACTG-51.
Advisory: MATH-A or MATH-B.
This course provides students with instruction in managerial accounting. Topics include job-order and process costing, cost-volume-profit relationships, the contribution approach to costing, budgeting, standard costing, capital budgeting and investment decisions, and relevant costs for decision making. (10/01)

ACTG-31 COMPUTERIZED ACCOUNTING
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: ACTG-04A or ACTG-51.
This course provides instruction in computer-assisted accounting. Topics include general ledger setup, accounts receivable setup, accounts payable setup, transactions and reports, financial statement analysis, depreciation, and payroll. (4/01)

ACTG-51 APPLIED ACCOUNTING
4 units: 4 hours lecture.
Advisories: ENGL-81; MATH-80 or MATH-83.
This course is an entry-level accounting course emphasizing a preparer approach using manual accounting methods, and comparing them to current computerized accounting. Basic course work during the first half of the semester relates to the sole proprietorship type organization. During the second half of the course the emphasis changes to cover the basics of partnership and corporate accounting. Students will become acquainted with both the theory and terminology associated with the accounting cycle and within an accounting system. Other topics in accounting may also be covered including payroll, cash, inventory, bad debts, and depreciation. (1/03)

ACTG-52 PAYROLL RECORDS AND ACCOUNTING
3 units: 3 hours lecture.
One-way corequisite: ACTG-04A or ACTG-51.
This course acquaints the student with various phases of the Fair Labor Standards Act (FLSA), Social Security Act, and other laws relating to the payment of wages and salaries. Basic payroll accounting systems and procedures as well as the timekeeping methods used to record time worked are described. Computerized accounting systems and pertinent tax forms are also explored. (4/01)

ACTG-54 COST ACCOUNTING
3 units: 3 hours lecture.
One-way corequisite: ACTG-04A or ACTG-51.
This course provides a thorough understanding of cost concepts, cost behavior, and cost accounting techniques as applied to manufacturing and service businesses. Students will learn how to accurately determine product and service costs using various costing methods. The student will also become aware of how the cost techniques used can affect the performance of both workers and management. Managerial control through budgeting is also addressed. (10/01)

ACTG-56 GOVERNMENTAL AND NOT-FOR-PROFIT ACCOUNTING
3 units: 3 hours lecture.
Prerequisite: ACTG-04A or ACTG-51.
Accounting theory and practice are applied to governmental and not-for-profit accounting. Topics include practical understanding of budgeting, accounting, and financial reporting as it applies to governmental and not-for-profit organizations. (10/01)

ACTG-70A-ZZ SPECIAL TOPICS IN ACCOUNTING
0.5 - 3 units: 0.5 - 3 hours lecture, 0 - 3 hour lab.
Prerequisite: ACTG-04A or ACTG-51.
This course is designed to address special topics in accounting to meet the current needs of students. It will provide accounting students with access to instruction that will assist them in acquiring the up-to-date information and skills necessary to meet their career goals in a rapidly changing business environment. (01/05)
and the effectiveness of various prevention strategies will be examined. (11/03)

the agricultural producer, consumer, and food system. This class will explore the current education and training standards in the field. (05/03)

management principles encountered in the day-to-day operation of an agricultural enterprise are stressed as they relate to the economic aspects of agriculture and their implications to local, state, national, and global markets. Students will learn the role of agricultural resources (land, labor, capital, and entrepreneurship), major agricultural resource issues and their policy remedies, and economic factors that affect prices, supply, demand, and allocation of farm commodities. This class will explore the contemporary and historical place of agriculture and farmers in our economic, social, and political systems and their relationship to the consuming public. (10/04)

AGBS-12 AGRICULTURAL ACCOUNTING
3 units: 3 hours lecture. 
Advisories: ENGL-81, ENGL-84; MATH 80 or MATH 83. 
This course presents principles of agricultural accounting systems and type of records, their use, and how to compute and use measures of earnings and cost of production to improve agribusiness efficiency. Also included are farm income tax, Social Security, and employee payroll records. (12/00)

AGBS-13 AGRICULTURAL MARKETING
3 units: 3 hours lecture. 
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. 
This course presents a survey of marketing aspects of the agricultural industry. It provides an overview of the structure and institutional aspects of the marketing system including global agricultural markets. Industry studies of the marketing of selected locally grown commodities will be made. (12/00)

AGBS-14 FARM MANAGEMENT
3 units: 3 hours lecture. 
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. 
This course covers the organization and operation of farm and ranch businesses, the identification of factors affecting profitability, and evaluation of the business for increased efficiency and profit, an application of budgeting to a laboratory farm, and independent analysis of a farm. (12/00)

AGBS-17 AGRICULTURAL SALES AND COMMUNICATION
3 units: 3 hours lecture. 
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. 
This course involves the study of principles and practices of the selling process: selling strategies and approaches, why and how people buy, prospecting, territory management, and customer service. Self-management, communication, and interpersonal skills necessary in developing managerial abilities, leadership qualities, and facilitating teamwork within the agribusiness sector will be explored. Students will gain experience through role-play, formal sales presentations, and job shadowing. (12/00)

AGBS-18 AGRICULTURAL COMPUTER APPLICATIONS
(CAN AG 2) 
[CILC areas A,B,C,D,E,F,G] 3 units: 2 hours lecture, 3 hours lab. 
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. 
This course explores computer use in the workplace with emphasis on agribusiness situations. Computer applications including word-processing, spreadsheets, databases, and presentation managers will be covered. Also included will be accessing information through the Internet and World Wide Web, telecommunications, and introduction to web page design, and other software appropriate to agribusiness. (12/00)

AGBS-30 AGRICULTURAL LEADERSHIP
2 units: 2 hours lecture. 
Advisories: ENGL-81, ENGL-84. 
This course presents leadership theory as well as self-management, communication and interpersonal skills necessary in developing managerial abilities and leadership qualities, while facilitating teamwork within the agricultural industry. Included are group dynamics and human interactions associated with private, governmental, and non-profit agricultural enterprises. Practical experience will be gained through participation in a number of parliamentary, facilitative, and administrative activities with varying degrees of diversity between semesters. This course may be repeated three times. (12/00)
AGBS-31 AGRICULTURAL AMBASSADORS
1.5 units: 1 hour lecture, 1.5 hours lab.
Advisories: ENGL-81, ENGL-84.
The purpose of this course is to train effective and efficient Agricultural Ambassadors. This highly specialized team of students will encourage higher education, agricultural awareness, and educational opportunities within Merced College’s Agriculture Division. Students will develop confidence and speaking ability, prepare recruitment and teaching materials, and establish an on-call public relations system for prospective future students and members of the community. This course may be repeated three times. (2/02)

AGBS-49 AGRICULTURE BUSINESS: PROBLEMS
2 units: 6 hours arranged.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course is designed for students interested in problems within the field of Agricultural Business. The problem areas will include, but not be limited to, management, marketing, accounting, commodities market, agriculture economics, taxation, and computer use. (12/00)

AGBS-70 A-Z SPECIAL TOPICS IN AGRICULTURE BUSINESS
0.5 - 4 units: 0-4 hours lecture, 0-12 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is the study of basic principles, processes, and theories of the special topic being presented during the semester. (12/00)

ALLIED HEALTH
(Allied Health Division)

ALLH-50 EMERGENCY MEDICAL TECHNICIAN I
6 units: 5 hours lecture, 3 hours lab.
Limitations on enrollment: Negative TB skin test or negative chest x-ray for TB within the last four years; a CPR course based on American Red Cross or American Heart Association that includes one- and two-rescuers CPR plus infant CPR.
Advisories: ALLH-67; ENGL-84; a first-aid course equivalent to the course offered by the American Red Cross.
This beginning course is designed to teach basic emergency medical procedures and responsibilities, including stabilization of the sick and injured for transportation to medical facilities, care during transport, communication with base-hospital personnel, and transfer of the injured to the base-hospital emergency room. This course meets the requirements of Title 22, Division of California Administrative Code. Students successfully completing ALLH-50 and ALLH-51 are eligible to take the EMT I certifying exam from any EMS Agency within the State of California. It is recommended that the student take ALLH-50 and ALLH-51 concurrently. (4/05)

ALLH-51 EMERGENCY MEDICAL TECHNICIAN I, AMBULANCE
1 unit: 18 total hours lecture, plus 8 hours of field experience. Limitations on enrollment: Valid California driver’s license; negative TB skin test or negative chest x-ray for TB; a CPR course based on American Red Cross or American Heart Association that includes one- and two-rescuer CPR plus infant CPR.
Advisories: ALLH-67; ENGL-84; a first-aid course equivalent to the course offered by the American Red Cross.
This course provides the ambulance module of the EMT I certification program. Topics for the course include the roles and responsibilities of ambulance personnel, legal aspects of ambulance operation, radio communications, records and reports, intravenous monitoring techniques, maintenance of medical equipment and supplies, driver licensing requirements, and techniques of ambulance driving. This course with ALLH-50 satisfies the California Administrative Code requirements for eligibility for certification as an EMT I. It is recommended that the student take ALLH-50 and ALLH-51 concurrently. (2/02)

ALLH-67 MEDICAL TERMINOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is a study of general medical terminology -- diagnostic, operative, and symptomatic terms related to body systems -- with emphasis on proper spelling and pronunciation. (10/03)

ALLH-80 NURSE ASSISTANT
3 units: 3 hours lecture. Limitations on enrollment: Orientation workshop; CPR card - Module A/C; negative TB skin test or chest x-ray within past 6 months; physical within past 6 months; Penal Code violations clearance. Two-way corequisite: ALLH-80L.
Advisories: ENGL-80, ENGL-84.
The course provides basic skills required of the nurse assistant employed in skilled nursing facilities and extended care facilities. The course emphasizes care of the older adult client and assistance with the activities of daily living: bathing, dressing, exercise movement, eating, and eliminating; safety measures, cardiopulmonary resuscitation, and rehabilitation techniques are also covered. This course meets the State Department of Health Services’ requirements for eligibility to take the nurse assistant certification examination. (4/00)

ALLH-80L NURSE ASSISTANT LABORATORY
2.5 units: 7.5 hours lab.
Limitations on enrollment: Orientation workshop; CPR card - Module A/C; negative TB skin test or chest x-ray within past 6 months; physical within past 6 months; and Penal Code violations clearance.
Two-way corequisite: ALLH-80. Advisories: ENGL-80, ENGL-84.
This course provides clinical instruction and practice of basic nursing skills required of nurse assistants. Students will practice skills in lab and then be assigned to assist clients in skilled nursing facilities. Activities of daily living and rehabilitation procedures will be emphasized. Meets the State Department of Health Services' requirements for eligibility to take the nurse assistant certification examination. (4/00)

ANATOMY
(Science, Math and Engineering Division)

ANAT-25 GENERAL HUMAN ANATOMY (CAN BIOL 10)
(CSU breadth area B2/B3) 4 units: 2 hours lecture, 6 hours lab.
Prerequisite: ANAT-50 or BIOL-01. Advisories: ENGL-A, ENGL-41.
This course is an intensive study of the structure of the human body. Consideration is given to the skeletal, muscular, circulatory, respiratory, digestive, excretory, reproductive, and nervous systems. Special emphasis is placed on the needs of students majoring in biology, nursing, physical education, and medical sciences. (11/03)

ANAT-50 SURVEY OF ANATOMY AND PHYSIOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This is a course in basic anatomy and physiology of the human body. It is designed as an elementary course for students with limited background in science or biology. (11/03)
ANIMAL SCIENCE (Agriculture Division)

ANSC-10 ELEMENTS OF ANIMAL SCIENCE (CAN AG 6)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is a survey of the livestock industry, supply of animal products, and their uses in animal production. There is a special emphasis on the origin, characteristics, adaptation, and contributions of farm animals to the ag industry. The student will analyze the economic trends and career opportunities in animal agriculture. Field trips will be required. (3/00)

ANSC-11 ELEMENTS OF ANIMAL NUTRITION (CAN AG 12)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
The science of animal nutrition is the basis for "Livestock Feeding and Nutrition." The fundamentals of digestion and absorption in both ruminants and non-ruminants are discussed in this course. The nutritive value of feeds as they relate to the formulation of livestock rations will be emphasized, including by-product feeding. (3/00)

ANSC-12 LIVESTOCK BREEDING AND SELECTION
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course combines the study of basic genetic principles with the study of the anatomical and physiological aspects of reproduction as they relate to animal species significant to agriculture. The genetic principles to be emphasized include basic inheritance, selection techniques, mating systems, heterosis, and performance evaluation. The reproductive aspects are to include endocrinology, estrous cycles, mating behaviors, gametogenesis, conception, gestation, parturition, and maternal behaviors. Artificial insemination, embryo manipulation, and current innovations in reproductive biotechnology will also be examined. (3/00)

ANSC-13 ANIMAL DISEASE AND PARASITE CONTROL
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course of animal health and sanitation will provide instruction to the student on common livestock diseases and fundamentals of immunity. It will also include coverage of the livestock worker's role in promoting animal health and the foundation of disease control programs. (3/00)

ANSC-15 LIVESTOCK SELECTION
2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a detailed analysis of various visual and physical methods of appraising beef, sheep, swine, and horses concerning functional and economic value. Written and oral summaries of evaluation will be learned in the class. Specific reference will be made to performance data and factors determining carcass value. The course may be repeated three times for advanced skill and training. (3/00)

ANSC-16 HORSE HUSBANDRY (CAN AG 26)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a survey of the equine industry encompassing the evolution and role of the equine species throughout history, breed selection and development, nutrition, diseases, preventive health, reproductive management, basic horsemanship, and stabilizing alternatives. (3/00)

ANSC-17 BEEF PRODUCTION (CAN AG 20)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a study of principles and practices of purebred and commercial beef cattle production throughout the world, United States, and California. There will be emphasis placed on the importance of breeds, breeding principles, selection, nutrition, environmental management, health, marketing, and record keeping to ensure scientifically-based management decisions and consumer product acceptance as applied to beef cattle. (3/00)

ANSC-18 SHEEP PRODUCTION (CAN AG 22)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is a survey of the sheep industry, including management of commercial, purebred, and small farm flocks; selecting, feeding, breeding, and basic care of ewes and lambs, plus the marketing of lambs and wool. (3/00)

ANSC-19 SWINE PRODUCTION (CAN AG 24)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a study of the principles and practices of purebred and commercial pork production throughout California, the United States, and the world. Emphasis will be placed on the importance of breeds, breeding principles, selection, nutrition, environmental management, health, marketing, and record keeping to ensure scientifically-based management decisions and consumer product acceptance. (3/00)

ANSC-22 APPLIED LIVESTOCK PRACTICES
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This class will provide the selection and completion of an animal project under faculty supervision. The class involves participation in the actual purchase, raising, care and handling, managing, and merchandising of one or a group of project animals. The actual ownership of the livestock is not required as college animals will be used. This course may be repeated once. (3/00)

ANSC-30 FITTING, SHOWING, AND MERCHANDISING LIVESTOCK
1.5 units: 1 hours lecture, 1.5 hours lab.
Advisory: ENGL-A.
This course is designed for people to develop skills in preparing and marketing beef cattle, sheep, swine, dairy cattle, and horses for competition at fairs and shows. Lessons in exhibiting the animals are given. The course may be repeated three times for advanced skill and training. (1/06)

ANSC-37 INTERCOLLEGIATE RODEO
2 units: 10 hours lab.
Prerequisite/Advisory: None.
The course trains students for competition in intercollegiate rodeo and provides intensive practice in the various intercollegiate rodeo events. The course familiarizes the student with fundamental rodeo arena procedures and develops the physical dexterity and coordination necessary for participation in the sport of rodeo at the college level. May be repeated three times.

ANSC-39 PEOPLE AND LIVESTOCK IN THE SIERRAS
(Also: NTSC-39)
3 units: 3 hours lecture.
This class will present the history and impact of people and livestock in the back country of Yosemite and the surrounding wilderness areas, from its earliest uses to present utilization.
ANSC-40 BEGINNING HORSEMANSHIP (WESTERN)
2 units: 1 hour lecture, 3 hours lab.
(Note: Students must provide their own horses.)
This is a course that deals with the handling and schooling of a horse from the ground, in addition to basic fundamentals of riding. Safety factors for both horse and rider will be emphasized. Other areas of the course will include the proper use of equipment and aids.

ANSC-41 INTERMEDIATE HORSEMANSHIP (WESTERN)
2 units: 1 hour lecture, 3 hours lab.
(Note: Students must provide their own horses.)
This is a class in advanced western riding which will enable a person to school a horse, teach beginning riding, or train another rider in schooling. The student will obtain a working knowledge of the judging of horse shows and obligations involved in the judging of different events. A rider in this class is expected to be able to give a creditable performance in a standard AHSA or AQHA horse show.

ANSC-42 SPECIALIZED HORSE TRAINING
4 units: 2 hours lecture, 6 hours lab.
(Note: Student must provide saddle and tack.)
This course deals with early schooling of the young horse, training techniques, breaking to lead, acceptance of snafflebit, socking out procedures, and developing a good relationship between horse and trainer for elementary groundwork and riding.

ANSC-43 BEGINNING ENGLISH HORSEMANSHIP
2 units: 1 hour lecture, 3 hours lab.
Prerequisite/Advisory: None. (Note: Instructor can provide horses.)
This is a course dealing with the basics of handling and riding a horse using the English style. The beginning class gives a foundation of safe ground work and introduction of two gait with preparation for the third. Safety for the rider and horse is emphasized. Basic horsemanship or horse sense is also introduced and emphasized.

ANSC-44 INTERMEDIATE ENGLISH HORSEMANSHIP
2 units: 1 hour lecture, 3 hours lab.
Prerequisite/Advisory: None. (Note: Instructor can provide horses.)
This is a course dealing with the handling and riding of a horse using the English style. The intermediate class prepares the English rider for jumping and feeling comfortable at the canter. Safety is emphasized.

ANSC-45 ARTIFICIAL INSEMINATION
4 units: 2 hours lecture, 6 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a hands-on program where the student learns and practices to artificially inseminate. Included in this course is anatomy, heat detection, proper equipment, fertility, insemination records, and determining pregnancy. (2/00)

ANSC-46A SPECIALIZED HORSE TRAINING
4 units: 2 hours lecture, 6 hours lab.
(Note: Student must provide saddle and tack.)
This course deals with early schooling of the young horse including collection, turning, backing, leads, flying leads, trailer loading, rope work, and cattle work.

ANSC-46B SPECIALIZED HORSE TRAINING
4 units: 2 hours lecture, 6 hours lab.
(Note: Student must provide saddle and tack.)
This course is designed for learning advanced training of the young horse including collection, turning, backing, leads, flying leads, trailer loading, rope work, and cattle work.

ANSC-47A BACK COUNTRY ANIMAL MANAGEMENT
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
The care and maintenance of horses and mules in back country situations will be the emphasis of this course. Packing skills, load hitches, and load balance of pack animals will be stressed. Trail and pack animal safety will be incorporated.

ANSC-48 TACK REPAIR
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This class is designed to teach the care and maintenance of tack and accessories. The skills to be learned will include stitching, braiding, splicing, riveting, and proper saddle and miscellaneous tack repair. Repairs, taking into consideration the comfort of the horse, will be stressed.

ANSC-49 ANIMAL SCIENCE: PROBLEMS
2 units: 6 hours lab.
This course will involve supervised study and practices involving special problems in Animal Science. The areas covered in this course should be areas that are not covered in other Animal Science courses. Emphasis will be placed on the needs and interests of the students.

ANSC-50 HORSESHOEING
5 units: 2 hours lecture, 9 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is an introduction to the shoeing of horses, utilizing both hot and cold shoes. Also included will be the anatomy and physiology of the horse's foot with the ability to identify blemishes and soundness in horses. Use of the forge and the making of shoes from bar stock will be presented in addition to the instruction of actually shoeing horses. (2/00)

ANSC-51 ADVANCED HORSESHOEING
5 units: 2 hours lecture, 9 hours lab.
Prerequisite: ANSC-50. Advisory: ENGL-81.
This course is the study of basic principles, processes, and theories of the special topic being presented during the semester. (3/00)

ANSC-52 HOOF CARE AND TRIMMING
2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a class designed to teach the student how to care for and maintain the hooves of horses. (2/00)

ANSC-53 ARTIFICIAL INSEMINATION
4 units: 2 hours lecture, 8 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a hands-on program where the student learns and practices to artificially inseminate. Included in this course is anatomy, heat detection, proper equipment, fertility, insemination records, and determining pregnancy. (1/00)

ANSC-54 SPECIAL TOPICS IN ANIMAL SCIENCE
0.5 - 4 units: 0-4 hours lecture, 0-12 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is the study of basic principles, processes, and theories of the special topic being presented during the semester. (3/00)
ANTHROPOLGY
(Social Science Division)

ANTH-01 PHYSICAL ANTHROPOLOGY (CAN ANTH 2)
(CSU breadth area B2/B3) 4 units: 3 hours lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41.
This survey of physical anthropology deals with the study of man's biological heritage and physical variability. The fossil evidence and theories of early man's development will be covered. Students will have the opportunity to study man's behavioral adaptability through contact with authentic stone tools made by our prehistoric ancestors. Human genetics, racial variation, primatology, paleoanthropology, forensic anthropology, and current bioethical issues will also be discussed. The philosophy of science and the scientific method serve as the foundation of this course. The laboratory portion of the course will include exercises in human variation, genetics, skeletal analysis, and primate behavior. (1/05)

ANTH-02 CULTURAL ANTHROPOLOGY (CAN ANTH 4)
(CSU breadth area D1) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is an introduction to the study of human culture and the concepts, theories, and methods used in the comparative study of socio-cultural systems. Subjects include subsistence patterns, social and political organization, language and communication, family and kinship, religion, the arts, social inequality, ethnicity, gender, and culture change. The course applies anthropological perspectives to contemporary issues. (1/05)

ANTH-10 SOUTHEAST ASIAN CULTURE: EMPHASIS HMONG CULTURE
(CSU breadth area D1) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course surveys the basic ideas and social constructs of Southeast Asian cultures, especially the cultures of the new Southeast Asian groups in California: Hmong, Lao, Cambodian, Vietnamese, etc. Emphasis will be placed on issues of cultural ethnicity, family lifestyle, educational background, and socio-political organization of each group in the past and in the United States. (9/99)

ANTH-30 MAN, CULTURE, AND SOCIETY
2 units: 2 hours lecture.
This is a course designed to provide the student with an understanding of the cultural, biological, and physical forces that have influenced the historic and contemporary development of man and culture.

ANTH-32 ANTHROPOLOGICAL STUDY OF WOMEN
3 units: 3 hours lecture.
This course focuses on the contrasting roles of women in traditional and contemporary cultures. The arts and artifacts, beliefs, and traditions of various world societies will be studied with regard to their effect on, and interaction with, women. The position of women in decision making, family structure, economics, and other social systems will be investigated.

ARCHAEOLOGY
(Science, Math and Engineering Division)

ARCH-01 INTRODUCTION TO ARCHAEOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This is an introduction to archaeological theory and method. The class examines the historical development of the discipline, various theoretical and methodological approaches, and technical aspects of archaeology such as stratigraphic analysis, relative and absolute dating, lithic analysis and seriation. Artifacts from around the world are used in class to illustrate various concepts of archaeology and prehistory. (2/01)

ARCH-01L FIELD ARCHAEOLOGY
1 unit: 3 hours lab.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course provides the student with an opportunity to gain practical experience in archaeological field reconnaissance, archaeological site excavation, laboratory analysis of archaeological data, and preparation of archaeological reports. Students will take part in surveys and excavations on local and historic and prehistoric sites. This course may be repeated three times. (2/01)

ARCH-31 MUSEUM TECHNOLOGY
2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course is an introduction to the techniques of preservation of those objects which best illustrate the phenomenon of nature and the works of man as well as the utilization of these objects in a museum setting for the increase of knowledge and the enlightenment of the people. Lecture and laboratory work on collection, preservation, and display of such materials and artifacts will be taught. (2/01)
ART-12C ADVANCED SCULPTURE
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-12B.
Students will explore sculpture materials, methods, techniques, and 3-D project problem-solving related to advanced-level course work. (1/05)

ART-15 FUNDAMENTALS OF DESIGN IN ART
(CSU breadth area C1) 3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This course is an introduction to the theory and practice of fundamental design elements and principles as applied to fine arts, graphics, and various design fields. (1/05)

ART-17A CERAMICS - POTTERY (CAN ART 6)
3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-A.
This course is a survey of ceramic materials (clays and glazes) and their function in relation to design as an art form. Basic studio practice in the hand-building processes, decorating, glazing, and firing of ware, and an introduction to the potter's wheel are included. (2/01)

ART-17B INTERMEDIATE CERAMICS - POTTERY
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-17A. Advisory: ENGL-A.
This is an intermediate course in ceramic pottery and sculpture design and construction, non-technical glaze composition, and kiln firing. Stress is placed upon the attainment of skill on the potter's wheel and organization of construction problems. Students pursue projects of individual interest. (2/01)

ART-17C ADVANCED CERAMICS - POTTERY
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-17B. Advisory: ENGL-A.
This is an advanced course in ceramic pottery with emphasis on more complicated sculpture and wheel construction and design techniques. Students will participate in glaze composition and experience advanced decorating and glazing techniques. Students will pursue projects of individual interest related to the objectives of the course. (2/01)

ART-20A PRINTMAKING I (CAN ART 20)
3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This course covers the fundamental printmaking processes including relief and intaglio methods. It includes exploration of black and white as well as an introduction to color techniques. Students will produce limited editions and survey the history of printmaking. (1/05)

ART-20B PRINTMAKING II: INTAGLIO AND COLOR
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-20A.
This course deals with black and white as well as color printmaking techniques with an emphasis on intaglio processes. (1/05)

ART-20C PRINTMAKING III: LITHOGRAPHY
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-20B.
This course focuses on the lithographic printmaking techniques in which images are printed from limestone slabs. (1/05)

ART-20D PRINTMAKING IV: EXPLORATION
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-20C.
This course is an advanced study of printmaking techniques with focus on the individual student’s ideas. Students will work towards the development of the personal set of aesthetic requisites necessary for advanced study and independent work. (1/05)

ART-24A DRAWING I (CAN ART 8)
(CSU breadth area C1) 3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This course is an introduction to the principles, theories, and techniques of drawing and composition. Students will explore foundation-level concepts while surveying materials used in drawing as an art form, as well as the history of their development. (1/05)

ART-24B DRAWING II
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-24A.
This course is an intermediate-level study of the theories and practice of drawing as an art form. Problems in perspective, proportion, and form will be addressed. A more advanced approach to concept and techniques in media are also included, as well as the history of their development. (1/05)

ART-24C DRAWING III
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-24B.
This course is an advanced-level study of drawing as an art form. More advanced problems in the aesthetics and techniques of drawing will be addressed. The approach is individualized. Contemporary as well as historical concepts will be addressed. (1/05)

ART-25A ACRYLIC PAINTING I (CAN ART 10)
3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This is a course in the fundamentals of acrylic painting as an art form. Students will address problems in portrayal, proportion, composition, and color. (1/05)

ART-25B ACRYLIC PAINTING II
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-25A.
This course is a study of the materials and methods of acrylic painting. Students will explore creative and conceptual solutions to problems in portrayal, composition, and color. (1/05)

ART-25C ACRYLIC PAINTING III
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-25B.
This course is an advanced study of acrylic painting techniques. Students will apply these techniques with emphasis on conceptual development and critical evaluation. (1/05)

ART-25D ACRYLIC PAINTING IV
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ART-25C.
This course is an exploration of acrylic painting with focus on the students’ individual ideas. Students will work towards the development of the personal set of aesthetic requisites necessary for advanced study and independent work. (1/05)

ART-26A FIGURE DRAWING I
3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This is a basic course in drawing the human form and proportion. Models are used in both rapid and extended studies with a variety of drawing media. (1/05)

</tbody>
</table>
ART-81 ADVANCED CERAMICS LAB
1 unit: 3 hours lab.
Prerequisite: ART-17A. Advisory: ENGL-A.
This course is an advanced ceramics lab designed to accommodate the student desiring to further his/her skills in ceramics and to give more lab time to the student also enrolled in ART-17BC (Ceramics). Individual instruction is also given to the student. This course may be repeated three times. (2/01)

ASTRONOMY
(Science, Math and Engineering Division)
ASTR-01 PRINCIPLES OF ASTRONOMY
(CSU breadth area B1) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This is a basic course studying the principles of astronomy beginning with the solar system and continuing through the Milky Way Galaxy and the galaxies beyond. Throughout the course topics relating to the philosophy of science, history of astronomy, tools of the astronomer, and supporting topics of physics are introduced. The course is designed for students satisfying breadth requirements in science and having a general interest in astronomy. (3/00)

ASTR-01L INTRODUCTORY ASTRONOMY LABORATORY
(CSU breadth area B3) 1 unit: 3 hours lab.
One-way corequisite: ASTR-01.
Advisories: ENGL-A, ENGL-41; MATH A.
This is a basic course in astronomy providing laboratory experience and opportunity for observation of the night sky. Specific topics include observations of the solar system and deep sky objects, time studies, planetary motions, telescopes and their applications, spectroscopy, and basic calculations of the astronomer. (3/00)

AUTOMOTIVE TECHNOLOGY
(Industrial Technology Division)
AUTO-04 AUTOMOTIVE MECHANICS
3 units: 3 hours lecture.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This class is designed for students without prior experience in automotive mechanics. It is a study of fundamental theory and operation of the major components of automotive systems with the purpose of giving the students general knowledge of the automobile. Major emphasis is given to operational principles of the automobile and related terminology. (2/00)

AUTO-32 WHEEL ALIGNMENT AND SUSPENSION
4 units: 3 hours lecture, 3 hours lab.
Advisories: AUTO-04; ENGL-A; MATH-80 or MATH-83.
This course is designed to provide the technical knowledge and experience required for aligning and servicing suspension systems on modern automobiles. Laboratory exercises will provide the student an opportunity to develop entry-level skills in the use of machines and equipment commonly used in wheel alignment, tire service, and front-end repairs. (3/05)

AUTO-33 AUTOMOTIVE BRAKE SYSTEMS
4 units: 3 hours lecture, 3 hours lab.
Advisories: AUTO-04, AUTO-62; ENGL-A; MATH-80 or MATH-83.
This course is for students without prior experience in automotive brake repair. The course covers theory, service, and repair of conventional and common anti-lock brake systems (A.B.S.) Laboratory exercises will provide the student the opportunity to develop skills and knowledge in the use of tools and equipment necessary in the repair and service of automotive brake systems. (3/05)

AUTO-36 AUTOMOTIVE MANUAL TRANSMISSIONS AND DRIVE TRAINS
4 units: 3 hours lecture, 3 hours lab.
Advisories: AUTO-04; ENGL-A; MATH-80 or MATH-83.
This course is designed for the student without any prior experience in standard transmissions or drive axles. The class will provide technical information required for understanding and repairing of manual transmissions and drive trains. Laboratory exercises will provide the student with proper repair procedures and use of related tools and equipment. Standard transmissions, transaxles, differentials, drivelines, and related components will be covered. (4/04)

AUTO-40 AUTOMOTIVE MACHINING
3 units: 2 hours lecture, 3 hours lab.
Advisories: AUTO-04; ENGL-A; MATH-80 or MATH-83.
This is a course designed to teach the theory of machining operations used in automotive engine repair and to develop basic skills in the operation of these machines. Instruction will be given in the following areas: 1) cylinder reconditioning; 2) cylinder head, valve, valve seat, and valve guide reconditioning; 3) connecting rod reconditioning; 4) and repair or reconditioning of other automotive mechanical parts. (3/06)

AUTO-41 AUTOMOTIVE ENGINES
4 units: 2 hours lecture, 6 hours lab.
One-way corequisite: AUTO-04.
Advisories: ENGL-A; MATH-80 or MATH-83.
This is a class in the principles and theory of engine repair and rebuilding including the disassembly and assembly of engines. There will be emphasis on inspection, measuring, and comparing worn and rebuilt parts. Testing equipment will be used in comparing and diagnosing engines needing repair. Also included will be minor machining operations that are used in engine rebuilding and repairing. (3/06)

AUTO-42 AUTOMOTIVE ELECTRICAL SYSTEMS
3 units: 2.5 hours lecture, 1.5 hours lab.
Prerequisite: AUTO-62. Advisories: AUTO-04; ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course covers automotive electrical systems and includes a review of electron theory, magnetism, and semiconductors. The student will acquire technical and working knowledge of batteries, starter motors, charging components and controls, ignitions circuits, and accessories. The use of special tools and test equipment will be included. (2/00)

AUTO-43 AUTOMOTIVE FUEL SYSTEMS
3 units: 2.5 hours lecture, 1.5 hours lab.
One-way corequisite: AUTO-04.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course covers the testing and service of automotive fuel systems, including carburetors, fuel pumps, fuel tanks, gauges and senders, emission control fuel systems, fuel injection systems, and computer controls. (10/99)

AUTO-44 AUTOMOTIVE AIR CONDITIONING, HEATING SYSTEM, COOLING SYSTEM
4 units: 3 hours lecture, 3 hours lab.
Advisories: AUTO-04; ENGL-81, ENGL-84; MATH-80 or MATH-83.
This is a basic course in the principles of operation of automotive air conditioning, heating system, and cooling system. The course covers theory, system controls, troubleshooting, service, and repairs. Lab emphasis consists of system diagnosis servicing, repairs, and preventive maintenance on live vehicles. (10/99)
AUTO-46 AUTOMATIC TRANSMISSIONS
4 units: 2 hours lecture, 6 hours lab.
Advisories: AUTO-04, AUTO-62; ENGL-81; MATH-80 or MATH-83.
This course will cover domestic and import automatic transmissions and transaxles. Rebuilding will include diagnosis, inspection, repair, and testing. Theory will cover power flow, apply devices, hydraulic devices, torque converters, and shift controls. (4/04)

AUTO-47 ENGINE PERFORMANCE
4 units: 2 hours lecture, 6 hours lab.
Prerequisite: AUTO-42, AUTO-43.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course is a study of advanced automotive electrical and fuel systems. The course will cover ignition, charging, and starting circuits; fuel pumps; carburetion; fuel injection; and smog-control devices. All systems will be included as they relate to live maintenance procedures. Advanced system diagnosis and maintenance of these circuits will receive special attention. (2/00)

AUTO-48A SPECIAL PROBLEMS IN AUTOMOTIVE TRANSMISSIONS AND DRIVE TRAINS
2 units: 6 hours lab.
Prerequisite: AUTO-36, or AUTO-46 and AUTO-62.
This course is designed to permit the student to experience those areas not normally covered in the objectives of AUTO-47. This course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (9/02)

AUTO-48B SPECIAL PROBLEMS IN ENGINE PERFORMANCE
2 units: 6 hours lab.
Prerequisite: AUTO-47.
Advisories: ENGL-81, ENGL-84.
The course is designed to permit the student to experience those areas not normally covered in the objectives of AUTO-47. The course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (9/03)

AUTO-48C SPECIAL PROBLEMS IN AUTOMOTIVE ENGINES
2 units: 6 hours lab.
Prerequisite: AUTO-41.
Advisories: ENGL-81, ENGL-84.
The course is designed to permit the student to experience those areas not normally covered in the objectives of AUTO-44 and AUTO-41. The course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (9/03)

AUTO-48D SPECIAL PROBLEMS IN AUTOMOTIVE SUSPENSION
2 units: 6 hours lab.
Prerequisite: AUTO-32.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course is designed to permit the student to experience those areas not normally covered in the objectives of AUTO-32. The course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (9/02)

AUTO-48E SPECIAL PROBLEMS IN AUTOMOTIVE BRAKES
2 units: 6 hours lab.
Prerequisites: AUTO-33, AUTO-62.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course is designed to permit the student to experience those areas not normally covered in the objectives of AUTO-33. The course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (9/02)

AUTO-48F SPECIAL PROBLEMS IN AUTO BODY REPAIR AND PAINTING
2 units: 6 hours lab.
Prerequisite: AUTO-50.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course will provide the student additional time to develop and complete techniques, concepts, and skills learned in AUTO-50 (Auto Body Repair and Painting). The student will be provided with sufficient time to complete projects started in other classes. The course may be repeated once. (2/00)

AUTO-50 AUTO BODY REPAIR AND PAINTING
4 units: 2 hours lecture, 6 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
WELD-06/MECH-06.
The course is an introduction to auto body repair and painting. It is designed especially for the automobile technician preparing for the California Smog License. Students who do not have one year of trade experience in emissions/tune-up or required courses and certificates will not be eligible to take the state licensing examination. A review of the automotive electrical system, fuel system, and tune-up procedures will be given. Emphasis will be on operational principles of the emission control components and how to test them. Demonstrations of various pieces of equipment related to emission work will be given with a appropriate industry certified equipment. (5/03)

AUTO-51 ADVANCED AUTO BODY REPAIR AND REFINISHING
4 units: 2 hours lecture, 6 hours lab.
Prerequisite: AUTO-50.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course involves repairing and refinishing vehicles with body and finish damage. Vehicle panel repair or replacement through proper tools and equipment will be covered. Students will receive instruction in the proper choice of paints, repairing techniques, cost estimating, and customer relations. Training in advanced painting techniques will be included to meet industry standards. (1/00)

AUTO-55 BASIC/ENHANCED EMISSION CONTROL DEVICES AND SERVICING
(Formerly AUTO-45) 5 units: 4.5 hours lecture, 1.5 hours lab.
Prerequisite: AUTO-47.
Advisories: AUTO-42, AUTO-43, AUTO-62; ENGL-81, ENGL-84; MATH-80 or MATH-83.
The course is California Bureau of Automotive Repair-approved for the basic (EB) and enhanced (EA) emission control licenses. It is designed especially for the automobile technician preparing for the California Smog License. Students who do not have one year of trade experience in emissions/tune-up or required courses and certificates will not be eligible to take the state licensing examination. A review of the automotive electrical system, fuel system, and tune-up procedures will be given. Emphasis will be on operational principles of the emission control components and how to test them. Demonstrations of various pieces of equipment related to emission work will be given with a appropriate industry certified equipment. (5/03)
AUTO-60 CONSUMER AUTOMOTIVE SERVICE
2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is designed for the automotive consumer or entry-level technician who is interested in learning about and performing routine maintenance on his/her vehicle. It will cover topics such as tools and equipment, safety, consumer protection, and maintenance procedures ranging from air conditioning inspection and minor service to wiper blade replacement. (3/05)

AUTO-62 BASIC ELECTRONICS FOR TECHNICIANS
(Also: ELCT-62, INDT-62, MECH-62)
3 units: 2.5 hours lecture, 1.5 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course is designed to provide the automotive student and heavy-duty mechanic with a strong background in basic electrical concepts. This will allow the student to troubleshoot electrical system problems with the aid of technical information and test equipment. The class will also provide the necessary electrical theory for the more advanced electrical classes. (4/04)

AUTO-65 AUTOMOTIVE PARTS AND SERVICE ADVISING
4 units: 3.5 hours lecture, 1.5 hours lab.
Prerequisite: AUTO-04.
Advisories: ENGL-81, ENGL-84; BUS-53; MATH-80 or MATH-83.
This course will cover the duties and responsibilities of automotive parts and service advisors working at independent and dealership-based stores. Course content will include service and parts merchandising and communication skills, integrated computer management software, cost estimation, enhancing customer satisfaction, scheduling, inventory control, hazardous materials, warranties, lemon laws, and documentation requirements. (3/05)

BIOLOGY
(Science, Math and Engineering Division)

BIOL-01 GENERAL BIOLOGY FOR NON-MAJORS
(CSU breadth area B2/B3) 4 units: 3 hours lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41. Note: This course is not available to students having a grade of “C” or better in BIOL-04 or BIOL-04H.
This is an introductory-level course designed for non-majors. Areas covered will include the origin of life, structure and function of cells, basic processes of life, reproduction, ecology, microbiology, evolution, classification, genetics, and metabolic processes. (11/04)

BIOL-04 PRINCIPLES OF BIOLOGY FOR SCIENCE MAJORS
(CSU breadth area B2/B3) 4 units: 3 hours lecture, 3 hours lab.
One-way corequisite: CHEM-04A.
Advisories: BIOL-01; ENGL-A, ENGL-41.
This course is a study of the principles of biology. Areas of study will include aspects of the philosophy of science, chemistry of life, cellular organization, biological membranes, energy transfer, including photosynthesis and cellular metabolism, reproduction, Mendelian and molecular genetics, taxonomy and classification, evolution, bio-diversity, and ecology. This course is intended for science majors. (11/04)

BIOL-04H HONORS PRINCIPLES OF BIOLOGY FOR SCIENCE MAJORS
(CSU breadth area B2/B3) 4 units: 3 hours lecture, 3 hours lab.
One-way corequisite: CHEM-04A.
Limitation on enrollment: Enrollment in the Honors Program. See the college catalog for a description of enrollment requirements. Advisories: BIOL-01; ENGL-A, ENGL-41.
This course is a study of the principles of biology and is intended for the honors student. Course emphases include cellular and molecular biology, biological membranes, bioenergetics, storage, processing, and expression of genetic information, classification and taxonomy, evolution, bio-diversity, and ecology. There will be an emphasis on collaborative learning, research, and scientific writing. (11/04)

BIOL-06 ENVIRONMENTAL SCIENCE
(CSU breadth area B2) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This introductory course examines Earth as an ecosystem composed of biological, chemical, and physical processes with emphasis on man’s impact on the planet. Topics include the structure and function of ecosystems, bio-diversity, the impact of industrialization and urbanization, energy, populations, resources, pollution, pesticides, and risk/benefit assessment. (10/04)

BIOL-08 CONSERVATION OF NATURAL RESOURCES
(CSU breadth area B2) 3 units: 3 hours lecture.
This course is designed for the automotive consumer or entry-level technician who is interested in learning about and performing routine maintenance on his/her vehicle. It will cover topics such as tools and equipment, safety, consumer protection, and maintenance procedures ranging from air conditioning inspection and minor service to wiper blade replacement. (3/05)

BIOL-20 MICROBIOLOGY (CAN BIOL 14)
(CSU breadth area B2/B3) 4 units: 2 hours lecture, 6 hours lab.
Prerequisite: BIOL-01. Advisories: ENGL-A, ENGL-41.
This is a basic course involving the identification, morphology, metabolism, pathogenicity and genetics of microorganisms. Lecture topics include an historical review, systematics, growth and metabolism of bacteria, fungi, viruses, and parasitic protozoa. Laboratory work will cover basic staining and culture techniques, effects of physical and chemical factors on growth, and basic biochemical activities of some bacteria and protozoa. The course is designed for students majoring in any of the allied health professions. (3/00)

BIOL-25 THE OCEANS
(CSU breadth area B2) 3 units: 3 hours lecture.
This is an introductory study of the modern biology of the oceans. The marine world is treated as man's last frontier on earth; various discoveries, problems and methods of the marine biologist will be emphasized. Lecture topics will include classification of marine environments, ocean currents, tides, continental drifts, sea floor spreading, marine resources, pollution, and the biology of important marine fishes and invertebrates. A number of these topics will be related to the marine ecology of the California coast. (10/00)

BIOL-31 INTRODUCTION TO BIOTECHNOLOGY I
(CILC areas C,F) 4 units: 2 hours lecture, 6 hours lab.
Prerequisite: BIOL-01 or BIOL-04; CHEM-02AB or CHEM-04AB. One-way corequisite: GENE-10.
Advisories: BIOL-20; ENGL-A, ENGL-41; MATH-A or MATH-B.
This is an introductory course in biotechnology theory and techniques. This course will cover safety and good lab practices; preparation of solutions; DNA isolation, manipulation, transformation, and quantization; isolation of RNA, PCR and analysis of PCR products; and electrophoresis. The primary focus of the course will be the development of laboratory skills and principles underlying them. This course is recommended for students seeking a certificate in biotechnology, for students majoring in biotechnology or a related field, or for students transferring to a university who are interested in undergraduate research. (10/00)
BIO-33 BIOTECHNOLOGY II: ADVANCED LABORATORY TECHNIQUES  
4 units: 2 hours lecture, 6 hours lab.  
Prerequisite: BIO-31. Advisories: BIO-20; ENGL-A, ENGL-41; MATH-A or MATH-B.  
This is an advanced course on techniques in biotechnology. This course is designed to build upon the skills developed in BIOI-31. It will provide both discussion of theory along with the extensive hands-on experience in a laboratory setting. Topics will cover techniques in the isolation, detection, and manipulation of biomolecules, including RNA, DNA, and proteins. Field trips may be required. (11/00)

BOTANY  
(Science, Math and Engineering Division)  
BOT-01 PRINCIPLES OF BOTANY (CAN BIOL 6)  
(CSU breadth area B2/B3) 5 units: 3 hours lecture, 6 hours lab.  
Prerequisite: BIOL-04 or BIOL-04H. Advisories: ENGL-A, ENGL-41.  
This course is a study of prokaryotes, algae, fungi, and plants, including structure, physiology, development, genetics, ecology, and evolution. Emphasis is given to the economic importance of various plant groups. Laboratory includes required field trips. (11/00)

BUSINESS  
(Business Division)  
BUS-10 INTRODUCTION TO BUSINESS  
3 units: 3 hours lecture.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This foundation course is the only one giving an overview of all aspects of business. It covers economic foundations, business organization, and finance including accounting and computers. Production and marketing, management styles and principles, and human resource management are studied. An understanding of business and its relationship with social, political, legal, and international realms will be developed. (1/02)

BUS-18A BUSINESS LAW (CAN BUS 8)  
4 units: 4 hours lecture.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is a study of legal principles that govern the conduct of business. Included in this study are surveys of the essential elements of legal history, jurisprudence, business crime, torts, contracts, agency relationships, UCC-sales, legal ethics, administrative law, labor and employment law, and the legal environment of international law. Introduction to legal research and brief writing is also included. (11/01)

BUS-18B BUSINESS LAW  
3 units: 3 hours lecture.  
Prerequisite: BUS-18A.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is a study of law of personal property, bailments, real property, wills, estates, trusts, commercial paper, secured transactions, bankruptcies, partnerships, and corporations. Legal brief writing is included as part of the course. This course is recommended for students who are planning a career in the field of business. (11/01)

BUS-34 INVESTMENTS AND SECURITIES  
3 units: 3 hours lecture.  
Advisories: ENGL-A, ENGL-41.  
This course deals with the study of corporate stocks and bonds, time deposits, government securities, mutual funds, real estate, commodity futures, and various other types of investment media. The course will examine the basic concepts of investing, how to analyze the economy, how to analyze financial statements, and how to make investment decisions. (3/00)

BUS-35 MONEY MANAGEMENT  
3 units: 3 hours lecture.  
Advisories: CPSC-30; ENGL-A, ENGL-41; MATH-80 or MATH-83.  
This course offers instruction in principles and practices of finance from the consumer's point of view. Areas of study include income and wealth distribution; occupational earnings; wise buying; consumer rights, legislation and protective agencies; credit and borrowing; financial services; automobiles; property liability, health, life and disability insurance; Social Security, pensions, annuities; housing; savings and investments; and taxes and estate planning. Field trips may be required. (12/03)

BUS-43 BUSINESS COMMUNICATION  
3 units: 3 hours lecture.  
Prerequisite: BUS-53. Advisory: ENGL-A.  
This course covers development of letter-, memo- and report-writing principles and techniques; development of general business vocabularies; and basic training in speaking, listening, and non-verbal communication in order to develop the skills needed in everyday communication in business. (3/06)

BUS-53 BUSINESS ENGLISH  
3 units: 3 hours lecture.  
Advisories: ENGL-81, ENGL-84.  
This course covers the mechanics of English as specifically applied to the field of business. It covers sentence structure, spelling, punctuation, grammar, business vocabulary, and the application of appropriate writing techniques to business communication. (11/02)

BUS-70A-ZZ SPECIAL TOPICS IN BUSINESS  
0.5 - 3 units: 0.5-3 hours lecture, 0-9 hours lab.  
This is a course designed to address special topics in business to meet the current needs of students. It will provide the students with access to instruction that will assist them in acquiring the most up-to-date information possible in order to cope with the rapidly changing business and economic environment. (5/99)

CHEMISTRY  
(Science, Math and Engineering Division)  
CHEM-02A INTRODUCTORY CHEMISTRY (CAN CHEM 6)  
(CSU breadth area B1/B3) 4 units: 3 hours lecture, 3 hours lab. Advisories: ENGL-A, ENGL-41; MATH-A or MATH-B.  
This is an introduction to the general principles of inorganic chemistry, atomic and molecular structure, states of matter, solutions, and radioactivity. The class is designed for students majoring in liberal studies, nursing, or agriculture. (11/03)

CHEM-02B INTRODUCTORY CHEMISTRY: INTRODUCTION TO ORGANIC AND BIOCHEMISTRY (CAN CHEM 8)  
(CSU breadth area B1/B3) 4 units: 3 hours lecture, 3 hours lab. Prerequisite: CHEM-02A.  
Advisories: ENGL-A, ENGL-41; LRNR-30; MATH-A or MATH-B.  
This is a continuation of CHEM-02A with emphasis on organic and biochemistry. The structure, nomenclature, and properties of the common building blocks of organic chemistry are covered. These same principles are applied to more complex organic compounds, such as carbohydrates, proteins, lipids, and nucleic acids, to illustrate the chemical basis of biological actions. This course is intended for students in liberal studies, agriculture, and health-related fields. It is not for chemistry or science majors. (11/03)
## Chem-04A General Chemistry (Can Chem 2)
(CSU Breadth Area B1/B3) (formerly Chem-01A)
5 units: 3 hours lecture, 6 hours lab.
**Prerequisites:** Chem-02A; Math-C or Math-D.
**Advisories:** ENGL-A, ENGL-41.
This course is designed to teach general principles of chemistry emphasizing atomic structure, bonding, periodic properties, kinetic theory, and solution chemistry. It is designed for the student majoring in chemistry, physics, biology, engineering, pre-med, or related fields. The student who has not successfully completed the prerequisite of Chem-02A but has completed a high school chemistry course with a grade of "C" or higher should consider submitting a prerequisite challenge.

## Chem-04B General Chemistry (Can Chem 4)
(CSU Breadth Areas B1/B3) (formerly Chem-01B)
5 units: 3 hours lecture, 6 hours lab.
**Prerequisite:** Chem-04A. **Advisories:** ENGL-A, ENGL-41.
This is a continuation of the general principles of chemistry, with emphasis on chemical equilibria, thermodynamics, and electrochemistry. An introduction to the principles of organic chemistry is included. The lab provides the student with both quantitative and qualitative experiments with an emphasis on quantitative analysis.

## Chem-12A Organic Chemistry I
5 units: 3 hours lecture, 6 hours lab.
**Prerequisite:** Chem-04B. **Advisories:** ENGL-A, ENGL-41.
This course is a study of the theory and practice of organic chemistry examining the bonding, structure, properties, and reactions of the hydrocarbons and organic halides. Nucleophilic substitution, electrophilic substitution and elimination reaction mechanisms are examined. Aromaticity, stereochemistry, and applications of spectroscopy are introduced. The laboratory includes the study of basic organic laboratory techniques: synthesis, separation, identification, and purification of organic substances, separation of natural products, and includes the use of related instrumentation. This course is directed toward students in science and pre-professional preparation.

## Chem-12B Organic Chemistry II
5 units: 3 hours lecture, 6 hours lab.
**Prerequisite:** Chem-12A. **Advisories:** ENGL-A, ENGL-41.
This course is a continuation of Chem-12A, expanding the study of organic chemistry to include aldehydes and ketones, acids and esters, amines and amides, with an introduction to biochemistry issues, carbohydrates, lipids, proteins, and nucleic acids. Included is a further examination of the use of spectroscopy, IR Mass Spec., and NMR in the identification of organic substances. In the laboratory portion of the course, emphasis is placed on the synthesis of organic substances and qualitative analysis. This course is directed toward students in science and pre-professional preparation.

## Chem-35A Math Preparation for General Chemistry
1 unit: 1 hour lecture.
This course is designed to develop the computational skills necessary for success in Chem-02A or Chem-04A. Emphasis is placed on math, nomenclature, and basic concepts. This course is designed specifically for students who are taking Chem-02A or Chem-04A.

## Chem-35B Math Preparation for General Chemistry
1 unit: 1 hour lecture.
This course is designed to develop the computational skills necessary for success in the Chem-04A/Chem-04B sequence. Emphasis is placed on math, nomenclature, and basic concepts. This course is designed specifically for students who have completed Chem-35A and are currently enrolled in Chem-04A or Chem-04B.

## Child Development (Business Division)

### CLDV-08 Families and Societies
(Formerly FCSC-08) (CSU Breadth Area E) 3 units: 3 hours lecture.
**Advisories:** ENGL-A, ENGL-41.
This course studies the importance of the socialization of children and how society supports and empowers families. Emphasis will include the role of family, peers, school/child care, media, community and culture, and the influence socializing agents have on children from diverse backgrounds.

### CLDV-09 Human Development (Also: PSYC-09)
(CSU Breadth Area E) 3 units: 3 hours lecture.
**Advisories:** ENGL-A, ENGL-41.
This course is an introduction to the scientific study of human development from conception through death. It examines the interplay of biological, psychological, social, and cultural forces on the developing human being.

### CLDV-11 Introduction to Early Intervention
3 units: 2 hours lecture, 3 hours lab.
**Limitation on Enrollment:** Students must have a negative result on a TB test within the past four years.
**Prerequisites:** CLDV-29, CLDV-31. **Advisory:** ENGL-A.
This course is designed for the Early Intervention Assistant Certificate. The student will study infants and toddlers with disabilities, atypical development or other special needs, both in the early intervention setting and the child care setting. The student will explore strategies and interventions used in the field of early intervention. Current theories in early intervention, early relationships, family systems, family grief, and stressors will be examined.

### CLDV-29 Child Growth and Development
(Also: PSYC-29) (Can FCS 14)
(Formerly FCSC-29) 3 units: 3 hours lecture.
**Advisory:** ENGL-A.
The growth and development patterns of all children from prenatal life through adolescence will be studied. There will be a strong integration of theory and practice. There will be directed observations of children from newborn through adolescence.

### CLDV-30A Preschool Curriculum A
(Formerly FCSC-30A) 2 units: 2 hours lecture.
**Advisories:** CLDV-29, ENGL-A.
This course is designed to help Child Development students and practicing child care personnel create developmentally appropriate curriculum ideas in art, math, and science for children in early childhood programs, ages two- to five-years old. Students will do hands-on work with materials.

### CLDV-30B Preschool Curriculum B
(Formerly FCSC-30B) 2 units: 2 hours lecture.
**Advisories:** CLDV-29, ENGL-A.
This course is designed to help Childhood Development students and practicing child care professionals create developmentally appropriate curriculum ideas and provide an opportunity-rich program of interesting and appropriate developmental language arts, music, and movement activities.

---

*Merced College 2006-2007 Catalog*
CLDV-30C INFANT/TODDLER CURRICULUM
(Formerly FCSC-30C) 2 units: 2 hours lecture.
Advisories: CLDV-35; ENGL-A.
This course is designed to help Early Childhood Education students and practicing infant/toddler personnel provide an opportunity-rich program of interesting and age-appropriate activities for infants and toddlers. (1/05)

CLDV-30D SCHOOL-AGE CURRICULUM
2 units: 2 hours lecture.
Advisories: CLDV-29; ENGL A.
This course is designed to help Early Childhood Education students and practicing child care professionals create developmentally appropriate curriculum ideas for children in school-age programs, ages 5-12 years old. Students will do hands-on work with materials. (12/04)

CLDV-31 INTRODUCTION TO EARLY CHILDHOOD EDUCATION
(Formerly FCSC-31) 3 units: 3 hours lecture.
This course is the foundation course of the ECE major and certificate training program. Topics covered include the philosophy of early childhood education, and developmentally appropriate practices and principles for teachers in programs serving children ages zero to eight years old. (11/05)

CLDV-32 PRACTICES IN EARLY CHILDHOOD EDUCATION
(Formerly FCSC-32) 2 units: 2 hours lecture. Prerequisite: CLDV-31.
Early childhood preschool programs will be studied for purposes of planning experiences which encourage physical, mental, social, and emotional growth. The optional laboratory will consist of supervised work in a selected preschool program and is designed to offer students continued and increased opportunities in working with children ages two-to-five years old in a teaching capacity. (12/04)

CLDV-32L PRACTICES IN EARLY CHILDHOOD EDUCATION LAB
(Formerly FCSC-32L) 2 units: 6 hours lab.
One-way corequisite: CLDV-32. Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Early childhood programs will be studied for purposes of planning experiences which encourage physical, mental, social, and emotional growth. The laboratory will consist of supervised work in a selected preschool program and is designed to offer students continued and increased opportunities in working with young children ages two-to-five years old. (12/04)

CLDV-33 WORKING EFFECTIVELY WITH FAMILIES
(Also: PSYC-33 and SOC-33)
(Formerly FCSC-33) 1 unit: 1 hour lecture.
Advisory: ENGL-A.
This is a course designed to teach students how to work with parents in school settings. Students will examine current ways of parent involvement, parent rights and responsibilities, and ways of keeping parents informed. (11/05)

CLDV-34A ADMINISTRATION AND SUPERVISION OF ECE PROGRAMS: LICENSING AND STAFFING
(Formerly FCSC-34A) 3 units: 3 hours lecture.
Advisory: ENGL-A.
This class is designed to introduce students to the basic skills necessary to become administrators in child development centers. Focus will be placed on requirements for starting a child care program, organizational development and supervision, health and safety requirements, and working with parents. (1/05)

CLDV-34B ADMINISTRATION AND SUPERVISION OF ECE PROGRAMS: MANAGING PEOPLE, TIME, AND RESOURCES
(Formerly FCSC-34B) 3 units: 3 hours lecture.
Advisory: ENGL-A.
This class is designed to give students an in-depth look at administration problems of child development centers. Emphasis will be placed on fiscal management policy-making, personnel management, and developing staff relationships. (1/05)

CLDV-35 INFANT AND TODDLER DEVELOPMENT
(Formerly FCSC-35) 2 units: 2 hours lecture.
Prerequisite: CLDV-31. Advisory: ENGL-A.
This course is the study of the development of children from birth to age three. This will include growth and development, health and nutrition needs, social and emotional needs, and cognitive and language development. Focus will be on caregiving, education, curriculum, and developmentally appropriate programs/environments for infants and toddlers. Adult relationships with families, parents, and staff will also be studied. (11/05)

CLDV-35L INFANT AND TODDLER LAB
2 units: 6 hours lab. One-way corequisite: CLDV-35. Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
The laboratory experience offers students the opportunity to work with infants and toddlers in programs on group and individual projects in a supervised early childhood program dealing with children from birth up to three years. (12/04)

CLDV-37 SUPERVISING ADULTS IN ECE SETTINGS
(Formerly FCSC-37) 2 units: 2 hours lecture.
Advisory: ENGL-A.
This course is a study of the methods and principles of supervising student teachers, assistant teachers, parents, and volunteers in ECE classrooms that are prepared for children who are typically and atypically developing and include basic methods of accommodating children with special needs. Emphasis is on the role of classroom teachers who function as mentors for new teachers while simultaneously addressing the needs of others. This is a required course for ECE professionals interested in obtaining a "Master Teacher" child development permit. (11/05)

CLDV-38 CHILDREN WITH SPECIAL NEEDS
(Formerly FCSC-38) 3 units: 3 hours lecture.
Advisories: CLDV-29; ENGL-A.
This course provides knowledge and skills that early childhood teachers need to serve developmentally delayed and disabled preschoolers. The focus will be on working with comprehensive family services, identification of special needs children, and the inter/multi-disciplinary approach to early intervention. (11/05)

CLDV-40A ECE SUPERVISED FIELD EXPERIENCE
(Formerly FCSC-36) 2 units: 1 hour lecture, 3 hours lab.
Prerequisites: CLDV-32L or CLDV-35L OR CLDV-56L.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed as student teachers in volunteer or paid preschool field sites. An overview of developmentally appropriate preschool practices will be presented. Students will review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building. (3/05)
CLDV-40B ECE SUPERVISED FIELD EXPERIENCE
(Formerly FCSC-36) 3 units: 1 hour lecture, 6 hours lab.
Prerequisites: CLDV 32L or CLDV 35L OR CLDV 56L.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed as student teachers in volunteer or paid preschool field sites. An overview of developmentally appropriate preschool practices will be presented. Students will review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication and team building. (3/05)

CLDV-41A ECE ADVANCED SUPERVISED FIELD EXPERIENCE
(Formerly FCSC-36A2) 3 units: 1 hour lecture, 6 hours lab.
Prerequisite: CLDV-40A or CLDV-40B. Advisory: ENGL-A.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed as student teachers in volunteer or paid field sites. Students will continue to perfect guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will perfect and continue to learn interpersonal communication skills and team building. (3/05)

CLDV-41B ECE ADVANCED SUPERVISED FIELD EXPERIENCE:
INFANT/TODDLER
(Formerly FCSC-36B1) 2 units: 1 hour lecture, 3 hours lab.
Prerequisites: CLDV-35 and CLDV-32L, CLDV-35L or CLDV-56L.
Limitation on Enrollment: Students will be required to obtain a negative result on a TB test within the past four years.
Students will be placed in an infant/toddler, volunteer or paid, field site. An overview of developmentally appropriate infant/toddler practices will be presented. Students will continue to review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building at an infant/toddler program. (3/05)

CLDV-42A ECE SUPERVISED FIELD EXPERIENCE:
INFANT/TODDLER
(Formerly FCSC-36B1) 2 units: 1 hour lecture, 3 hours lab.
Prerequisites: CLDV-35 and CLDV-32L, CLDV-35L or CLDV-56L.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed in an infant/toddler, volunteer or paid, field site. An overview of developmentally appropriate infant/toddler practices will be presented. Students will continue to review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building at an infant/toddler program. (3/05)

CLDV-42B ECE SUPERVISED FIELD EXPERIENCE:
INFANT/TODDLER
(Formerly FCSC-36B2) 3 units: 1 hour lecture, 6 hours lab.
Prerequisites: CLDV-35 and CLDV-32L, CLDV-35L, or CLDV-56L.
Limitation on Enrollment: Students will be required to obtain a negative result on a TB test within the past four years.
Students will be placed in an infant/toddler, volunteer or paid, field site. An overview of developmentally appropriate infant/toddler practices will be presented. Students will continue to review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building at an infant/toddler program. (3/05)

CLDV-43A ECE SUPERVISED FIELD EXPERIENCE: SPECIAL NEEDS
(Formerly FCSC-36C1) 2 units: 1 hour lecture, 3 hours lab.
Prerequisite: CLDV-38.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed in a special needs classroom, volunteer or paid field site. An overview of developmentally appropriate practices for children with special needs will be presented. Students will review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building. (3/05)

CLDV-43B ECE SUPERVISED FIELD EXPERIENCE FOR EARLY INTERVENTION
(Formerly FCSC-36C2) 3 units: 1 hour lecture, 6 hours lab.
Prerequisite: CLDV-11.
Limitation on enrollment: Students must have a negative result on a TB test within the past four years.
Students will be placed in a special needs classroom, volunteer or paid field site. An overview of developmentally appropriate practices for children with special needs will be presented. Students will review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building. (11/05)

CLDV-44A ECE SUPERVISED FIELD EXPERIENCE: SCHOOL-AGE CARE
(Formerly FCSC-36D1) 2 units: 1 hour lecture, 3 hours lab.
Prerequisites: CLDV-56 and CLDV-32L, CLDV-35L, or CLDV-56L.
Limitation on enrollment: Students will be required to obtain a negative result on a TB test within the last four years.
Students will be placed in a school-age care center, volunteer or paid, field site. An overview of developmentally appropriate school-age care practices will be presented. Students will continue to review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building at an infant/toddler program. (3/05)

CLDV-44B ECE SUPERVISED FIELD EXPERIENCE: SCHOOL-AGE CARE
(Formerly FCSC-36D2) 3 units: 1 hour lecture, 6 hours lab.
Prerequisites: CLDV-56 and CLDV-32L, CLDV-35L, or CLDV-56L.
Limitation on enrollment: Students will be required to obtain a negative result on a TB test within the last four years.
Students will be placed in a school-age care center, volunteer or paid, field site. An overview of developmentally appropriate school-age care practices will be presented. Students will continue to review guidance techniques, observation techniques, and programming/curriculum ideas as they relate to their field placement. Students will learn interpersonal communication skills and team building at an infant/toddler program. (3/05)

CLDV-50 GUIDANCE TECHNIQUES FOR YOUNG CHILDREN
(Formerly FCSC-50) 1 unit: 1 hour lecture.
Advisory: CLDV-29.
This course is designed for Childhood Development students to gain insight and practical knowledge about appropriate discipline techniques to use with children two-to-eight years old. The course will include strategies for working with children with challenging behaviors. (12/04)
CLDV-51 EARLY LITERACY FOR YOUNG CHILDREN
(Formerly FCSC-51) 1 unit: 1 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course gives Early Childhood Education students the basic elements of early literacy appropriate for young children. (1/05)

CLDV-52 DIVERSITY CURRICULUM IN EARLY CHILDHOOD EDUCATION
(Formerly FCSC-52) 1 unit: 1 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course covers the philosophy and implementation of a curriculum that supports diversity in the early childhood classroom and gives tools for teachers to help empower themselves and children to resist bias. (1/05)

CLDV-53 HEALTH AND SAFETY IN CHILD CARE SETTINGS
(Formerly FCSC-53) 2 units: 2 hours lecture.
Advisory: ENGL-A.
This course provides information on health and safety issues for young children as well as staff working in child care settings. It includes the 15 hours of training required for child care workers. (11/05)

CLDV-55 DAY CARE ISSUES
(Formerly FCSC-55) 1 unit: 1 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to address issues related to operating a family day care center. Students will learn how to open and administer their own centers. (1/05)

CLDV-56 SCHOOL-AGE DEVELOPMENT
2 units: 2 hours lecture.
Prerequisite: CLDV-31
This introductory course on school-age development covers an overview of school-age care; the school-age professional; school-age theory and development ages 5-13; current issues facing school-age children; guidance of school-age children; regulations and program quality; and developing partnerships with communities and families. Students will participate in observations of school-age children and programs. (12/04)

CLDV-56L SCHOOL-AGE DEVELOPMENT LAB
2 units: 2 hours lecture.
One-way corequisite: CLDV-56.
Limitation on Enrollment: Students must have a negative result on a TB test within the past four years.
The laboratory will consist of supervised work in a selected school-age care program and is designed for students continued and increased opportunities in working with children ages 5-12 years old. (12/04)

CLDV-70A-ZZ SPECIAL TOPICS IN CHILD DEVELOPMENT
(Formerly FCSC-70A-ZZ) 1-3 units: 1-3 hours lecture, 0-9 hours lab. Prerequisite/advisory: None.
This is a course designed to address special topics in Child Development to meet current needs of students. Specific classes will be offered to help them cope with the rapidly-changing environment and its effect on everyday living. (12/04)

CLDV-81A MENTOR TEACHER SEMINAR A
(Formerly FCSC-81A) 0.5 unit: 0.5 hour lecture.
Limitation on enrollment: Students must be selected as a mentor teacher in the "Mentor Teacher Program."
Beginning Early Childhood Education mentors attend monthly seminars to explore issues related to their new role as supervisors of ECE student teachers. Seminar content will be individualized to meet the needs of each mentor. (1/05)

CLDV-82A-Z FOSTER CARE EDUCATION
(Formerly FCSC-82A-Z) 1 unit: 1 hour lecture.
Prerequisite/Advisory: None.
This practical lecture class is designed specifically to train foster parents and Kinship Care providers interested in becoming foster parents. Topics to be covered are an introduction to foster parenting, discipline, communication techniques, the court system, child abuse, sexual abuse, drug abuse, the role of the agency, children’s rights, and foster parents’ rights. Additional Kinship topics to be covered include legal rights of Kinship Care providers, parenting skills, and divided loyalties. (1/05)

COMMUNICATION STUDIES
(Formerly FCSC-70A-ZZ) 1 unit: 1 hour lecture.
Prerequisite: ENGL-A. Advisory: ENGL-84.
This course is designed to increase students’ understanding and to improve their skills as public speakers, both in and outside the classroom. In order to help students become aware of and think critically about current issues, and to defend and advocate positions, the course will focus on argumentation and persuasion. (2/01)

ORAL INTERPRETATION (Also: ENGL-02)
3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-41.
This course is designed to help students understand, appreciate, and convey the power of the written word through performance. A variety of writings will be analyzed in their rhetorical, historical, and cultural contexts, and will be brought to life by students communicating them to others through their voices and bodies. (2/01)

COMM-04 SMALL GROUP DISCUSSION AND PROBLEM SOLVING
(CAN SPCH 10)
(CSU breadth area A1) 3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-41.
This is a course designed to help students develop critical thinking skills for communication and working together on small group tasks. Emphasis is placed on problem solving, reasoning, conflict resolution, and leadership. (10/04)

COMM-05 INTERPERSONAL COMMUNICATION
(CAN SPCH 8)
(CSU breadth area A1) 3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-41.
This is a course designed to help students develop critical thinking skills for communication and working together on small group tasks. Emphasis is placed on problem solving, reasoning, conflict resolution, and leadership. (2/01)
COMM-30 INTRODUCTION TO INTERCULTURAL COMMUNICATION  
[CILC areas D,G] (CSU breadth area D7) 3 units: 3 hours lecture.  
Prerequisite: ENGL-A. Advisory: ENGL-41.  
This course is designed to examine the basic concepts, principles, and their application to communication between persons from different minority, ethnic, and co-cultural backgrounds within the United States and in the international arena through the scope of interpersonal communication skills. This class will assist in the understanding and evaluation of barriers to communicating with peoples from other cultures, which include egocentrism, prejudice, and lack of awareness. (4/02)

COMM-50 ACCENT REDUCTION  
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84.  
This course is for non-native speakers of English who speak English well, but would like to reduce their accent. The course emphasizes stress rhythm and intonation patterns that enable students to be understood by native speakers. It also addresses problematic consonant and vowel sounds. Use of the language lab may be required. This course may be repeated once. (12/03)

**Course Descriptions**

**CPSC-01 INTRODUCTION TO MANAGEMENT INFORMATION SYSTEMS (CAN BUS 6)**  
[CILC areas A,B,C,D,E,F] 4 units: 3 hours lecture, 3 hours lab.  
This course is an entry-level course for business majors, students majoring in Computer Science or Management Information Systems, or anyone interested in the fundamentals of computer information systems and gaining an understanding of fundamental programming concepts. Algorithm design, logic diagrams, coding, and debugging are introduced using a third generation programming language. (12/02)

**CPSC-05 VISUAL BASIC PROGRAMMING**  
3 units: 2 hours lecture, 3 hours lab.  
This is an introduction to event-driven programming using Visual Basic for the Windows environment. The course will cover the standard Windows interface, the graphical Visual Basic development environment, design of the graphical user interface as well as concepts of programming, problem solving, and programming logic. Stand alone applications will be created for various studies. (1/03)

**CPSC-06 PROGRAMMING CONCEPTS AND METHODOLOGY I (CAN CSCI 22)**  
3 units: 2 hours lecture, 3 hours lab.  
This course introduces the discipline of computer science using a high-level language, and provides an overview of computer organization and an introduction to software engineering. Topics include methodologies for program design, development, style, testing, and documentation, algorithms, control structures, subprograms, and elementary data structures. These skills will be used to solve a variety of application problems. (12/02)

**CPSC-12 FORTRAN PROGRAMMING**  
(Also: ENGR-12 and MATH-12)  
3 units: 2 hours lecture, 3 hours lab.  
This course teaches students to use the FORTRAN programming language to solve problems in a wide variety of areas. Program design, problem-solving, and debugging techniques are emphasized throughout the course. (3/00)

**CPSC-24 INTRODUCTION TO COMPUTER STUDIES AND TECHNOLOGY (CAN CSCI 2)**  
[CILC areas A,B,C,D,E,F] 3 units: 3 hours lecture.  
Advisories: ENGL-41; MATH-80 or MATH-83; OFCT-50B.  
This entry-level, theory-dominant course is for non-computer majors who wish to become computer and information technology literate. This course explores computer and software use in the workplace with emphasis on business and industrial situations, education, science, and within the humanities. Computer applications including word-processing, spreadsheets, databases, and presentation managers will be covered. Students will discuss the social and legal implications of these uses. This course is also designed, whenever possible, to meet many of the provisions found in California State Technology Requirements Preliminary and Professional Clear Credential Candidates Required assignments, such as email use, email with attachment, news group use, chat room location and use, virtual bulleting usage, the creation of a web page, the creation and use of at least one computer program, perform research on the Internet following a prescribed methodology, and perform a search and use of a data CD. (04/03)

**CPSC-30 COMPUTER APPLICATIONS**  
[CILC areas A,B,C,D,E,F] 3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83; OFCT-50B.  
This course explores computer use in the workplace with emphasis on business situations. Computer applications including word processing, spreadsheets, databases, and presentation managers will be covered. Also included will be accessing information through the Internet and World Wide Web, telecommunications, and introduction to web page design, and other software appropriate to business. (12/01)

**CPSC-31 WORD PROCESSING**  
[CILC areas A,B,C,D,E,F] 1 unit: 0.5 hour lecture, 1.5 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83; OFCT-50B.  
This course is intended for students seeking an introduction to word process application software for microcomputers. Topics and laboratory experiences will emphasize the computer as a tool in a variety of personal and business environments. A current word processing application software will be taught. This course may be repeated three times. (12/02)

**CPSC-32 SPREADSHEET**  
[CILC areas C,D,E] 1 unit: 0.5 hour lecture, 1.5 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83; OFCT-50B.  
This course is intended for students seeking an introduction to spreadsheet application software for microcomputers. Topics and laboratory experiences will emphasize the computer as a tool in a variety of personal and business environments. A current spreadsheet application software will be taught. This course may be repeated three times. (12/02)

**CPSC-33 DATA BASE**  
[CILC areas B,C,D,E,F] 1 unit: 0.5 hour lecture, 1.5 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83; OFCT-50B.  
This course is intended for students seeking an introduction to database application software for microcomputers. Topics and laboratory experiences will emphasize the computer as a tool in a variety of personal and business environments. A current database management application software will be taught. This course may be repeated three times. (12/02)
This course is a continuation course in computer science which introduces further aspects of software design and implementation, abstract data types, fundamental data structures and associated algorithms, lists, stacks, queues, and trees. Students will be expected to design, implement, test, and analyze a number of programs. (1/03)

CPSC-40A CISCO CERTIFIED NETWORKING ASSOCIATE (CCNA) COURSE I (Also: ELCT-40A)  
[CILC areas A,B,C,D,E,F] 3 units: 2 hours lecture, 3 hours lab.  Prerequisite: CPSC/ELCT-40A.  
This is the first of four semester courses (or four 9-week courses) designed to provide students with classroom and laboratory experience in current and emerging networking technologies and initial preparation for CCNA testing. The complete series of training experiences will empower them to enter employment and/or further education and training in the computer-networking field. Instruction includes, but is not limited to, electrical safety, network terminology and protocols, network standards, local area networks (LANs), wide area networks (WANs), open system interconnection (OSI) models, physical cabling, cabling tools, electronics test equipment, routers, router programming, star topology, transmission control protocol/Internet protocol (TCP/IP) addressing, and network standards. (11/00)

CPSC-40B CISCO CERTIFIED NETWORKING ASSOCIATE (CCNA) COURSE II (Also: ELCT-40B)  
[CILC areas A,B,C,D,E,F] 2 units: 1 hour lecture, 3 hours lab.  Prerequisite: CPSC/ELCT-40A.  
This second course is designed to provide students with classroom and laboratory experience in current and emerging networking technologies and initial preparation for CCNA testing. The complete series of training experiences will empower them to enter employment and/or further education and training in the computer-networking field. Instruction includes electrical safety, network terminology and protocols, and network standards. Local area networks (LANs), wide area networks (WANs), open system interconnection/Internet operating systems (OSI/ISO) models, physical cabling, cabling tools, electronics test equipment, routers, router programming, star topology, transmission control protocol/Internet protocol (TCP/IP) addressing, and network standards are also covered. (11/00)

CPSC-40C CISCO CERTIFIED NETWORKING ASSOCIATE (CCNA) COURSE III (Also: ELCT-40C)  
[CILC areas C,E,F] 2 units: 1 hour lecture, 3 hours lab.  Prerequisite: CPSC/ELCT-40B.  
This third course is designed to provide students with classroom and laboratory experience in electrical safety, network terminology and protocols, and network standards. Local area networks (LANs), virtual LANs (VLANs), wide area networks (WANs), open system interconnection (OSI) models, Internet work packet exchange (IPX), Ethernet operation, spanning tree protocol, physical cabling, cabling tools, electronics test equipment, bridges, routers, switches, transmission control protocol/Internet protocol (TCP/IP) addressing, network standards, and network troubleshooting are also covered. (11/00)

CPSC-40D CISCO CERTIFIED NETWORKING ASSOCIATE (CCNA) COURSE IV (Also: ELCT-40D)  
[CILC areas C,E,F] 2 units: 1 hour lecture, 3 hours lab.  Prerequisite: CPSC/ELCT-40C.  
This fourth course is designed to provide students with knowledge concerning electrical safety, network terminology and protocols, and network standards. Local area networks (LANs), wide area networks (WANs), open system interconnection (OSI) models, point-to-point protocol (PPP), integrated services digital network (ISDN) protocol, physical cabling, cabling tools, electronics test equipment, routers, router programming, transmission control protocol/Internet protocol (TCP/IP) addressing, frame relay operation, network standards, and network troubleshooting are also covered. This course also reviews the entire level 1 training that has been accomplished to this point in preparation for Network+ and CCNA examinations. (11/00)

CPSC-49A-ZZ SPECIAL TOPICS IN COMPUTER STUDIES  
0.5 - 3 units: 0.5 - 3 hours lecture, 0 - 6 hours lab.  Advisory: ENGL-A.  
This series of courses is designed to provide opportunities for students to further develop their computing skills. (4/05)

COOPERATIVE EDUCATION  
(Business Division)

COOP-41A COOPERATIVE EDUCATION IN (SUBJECT)  
1-4 units: hours by arrangement.  
Advisories: ENGL-A, ENGL-41.  
Cooperative work experience education is a process of education which combines work experience with regular college instruction as an integral part of the community college curriculum. Cooperative Education allows students the opportunity to benefit from practical application in a job setting within their major area, or will allow students to sample an experience in a career field the student may be considering. A student may enroll in Cooperative Education for a maximum of four semesters, and no more than 16 units may be earned at Merced College. Seventy-five hours of work experience (or 60 hours volunteer work) equal one unit of college credit. Cooperative education units are offered in all areas. The number of units (1, 2, 3, or 4) the student will be enrolled in will be determined by the number of hours the student will work during the semester. In order to participate in the Cooperative Education Program, a student must (a) have on-the-job experience that contributes to occupational or educational goals; (b) be enrolled in, and complete, no fewer than seven units including Cooperative Education; (c) have the approval of the Cooperative Education Coordinator; and (d) have the cooperation of the employer in including new or expanded responsibilities or learning opportunities on the job in which the student is enrolled in Cooperative Education. (12/00)

COOP-41B COOPERATIVE EDUCATION IN (SUBJECT)  
1-4 units: hours by arrangement.  
Prerequisite: COOP-41A.  
Advisories: ENGL-A, ENGL-41.  See COOP-41A above. (12/00)

COOP-41C COOPERATIVE EDUCATION IN (SUBJECT)  
1-4 units: hours by arrangement.  
Prerequisite: COOP-41B.  
Advisories: ENGL-A, ENGL-41.  See COOP-41A above. (12/00)

COOP-41D COOPERATIVE EDUCATION IN (SUBJECT)  
1-4 units: hours by arrangement.  
Prerequisite: COOP-41C.  
Advisories: ENGL-A, ENGL-41.  See COOP-41A above. (12/00)
The judicial system will also be examined. (5/03)

The relationship between corrections and other components of specific laws, and general operation of correctional institutions. The relationship between corrections and other components of the judicial system will also be examined. (5/03)

CORR-04 CONCEPTS OF CRIMINAL LAW FOR CORRECTIONS
3 units: 3 hours lecture.
Advisories: CORR-01 or current employment as a correctional officer; ENGL-41.
This course covers historical development, philosophy, and practice of law and Constitutional provisions: definitions and classifications of crime, legal research, study of case law, methodology, and concepts of law as a social force. Law as it affects the correctional component of the justice system will be clearly identified. (5/03)

CORR-30 PROBATION AND PAROLE
3 units: 3 hours lecture.
Advisories: ENGL-41; CORR-01; CRIM-01, or CRIM-02.
This course encompasses the background, structure, and procedures of probation, parole, and the criminal court process. (5/03)

CORR-41 CORRECTIONAL WRITING
3 units: 3 hours lecture.
Prerequisite: CORR-04. Advisory: ENGL-41.
This is an introductory course emphasizing the practical aspects of gathering, organizing, and preparing written reports for correctional activities on local, state, and federal levels. It will cover the techniques of communicating facts, information, and ideas effectively in a simple, clear, and logical manner for various types of criminal justice system reports, letters, memoranda, directives, and administrative reports. Students will gain practical experience in note-taking, report writing, and presenting testimony in court. (5/03)

CORR-42 CONTROL AND SUPERVISION IN CORRECTIONS
3 units: 3 hours lecture.
Advisories: ENGL-41; CORR-01; CRIM-01, or CRIM-02.
This course offers an overview of supervision of inmates in local, state, and federal correctional institutions. The issues of control in a continuum from institutional daily living through crisis situations will be introduced and discussed. The course will emphasize the role played by the offender and the correctional worker. Topics will include inmate subculture, violence, and effects of crowding on inmates and staff, and coping techniques for correctional officers in a hostile prison environment. The causes and effects of abusive tactics will also be discussed. (5/03)

CORR-43 CORRECTIONAL INTERVIEWING AND COUNSELING
3 units: 3 hours lecture.
Advisories: ENGL-41; prior completion or concurrent enrollment in CORR-01; or current employment as a peace officer in the field of corrections.
This class provides an overview of the techniques available to practitioners in corrections counseling and interviewing. The student will learn the use of appropriate techniques and theories in confidence building which may be used by the correctional employee in client interviews and counseling. This is a basic course for students planning to enter or who are already employed within the Correctional Science field. (5/03)

CORR-44 LEGAL ASPECTS OF CORRECTIONS
3 units: 3 hours lecture.
One-way corequisite: CORR-01. Advisories: ENGL-A, ENGL-41; or current employment as a correctional officer.
This course provides students with an awareness of the historical framework, concepts, and precedents that guide correctional practice. Course material will broaden the individual's perspective of the corrections environment, the civil rights of prisoners, and responsibilities and liabilities of corrections officials. (3/04)

CORR-49A-ZZ SPECIAL TOPICS IN CORRECTIONS
0.5 - 7 units: 0.5 - 7 hours lecture.
Advisory: ENGL-41.
This is a course designed to address special topics in corrections to meet the current needs of students. The course will allow pre-service and in-service personnel to maintain the most current training standards in the field. (5/03)

CRIMINAL JUSTICE

CRIM-01 CRIMINOLOGY
(CSU breadth area D0) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41. (Business Division)
This course is an analysis of the nature and patterning of criminality and theories of criminal behavior. Crime control policies are critically examined regarding linkages among 1) social conflicts and inequalities, 2) criminal laws and enforcement practices, and 3) social deviance. (10/03)

CRIM-02 INTRODUCTION TO CRIMINAL JUSTICE (CAN AJ 2)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course pertains to the history and philosophy of criminal justice in America. The course will emphasize the three major components of the system: court, corrections, and law enforcement. It will then examine the role of each. (10/03)

CRIM-03 CRIMINAL PROCEDURES
3 units: 3 hours lecture.
One-way corequisite: CRIM-01 or CRIM-02.
Advisories: ENGL-A, ENGL-41.
This course covers the legal processes from pre-arrest through trial, sentencing, and correctional procedures; a review of the history of case and common law; conceptual interpretations of law as reflected in court decisions; a study of case law methodology and case research as the decisions impact upon the procedures of the justice system. (10/03)

CRIM-04 CRIMINAL LAW (CAN AJ 4)
3 units: 3 hours lecture.
One-way corequisite: CRIM-01 or CRIM-02.
Advisories: ENGL-A, ENGL-41.
This course covers historical development, philosophy of law, and constitutional provisions; definitions, classifications of crimes and their applications to the system of criminal justice; legal research; review of case law; and methodology and concepts of law as a social force. The course also explores crimes against persons, property, and the state as a social, religious, and historical ideology. (10/03)
CRIM-05 COMMUNITY AND HUMAN RELATIONS
3 units: 3 hours lecture.
One-way corequisite: CRIM-01 or CRIM-02.
Advisories: ENGL-A, ENGL-41.
This course covers the relationship of criminal justice agents and the community; causal and symptomatic aspects of community understanding; lack of cooperation and mistrust; study of behavioral causes; and ways to develop and maintain amicable relationships. (10/03)

CRIM-06 INTRODUCTION TO EVIDENCE (CAN AJ 6)
3 units: 3 hours lecture.
One-way corequisite: CRIM-01 or CRIM-02.
Advisories: ENGL-A, ENGL-41.
This course is a study of the origin, development, philosophy and constitutional basis of evidence; constitutional and procedural considerations affecting arrest, search and seizure; kinds and degrees of evidence and rules governing admissibility; judicial decisions interpreting individual rights; and case studies viewed from a conceptual level. (10/03)

CRIM-08 INTRODUCTION TO INVESTIGATION (CAN AJ 8)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course covers the fundamentals of investigation; techniques of crime scene search and recording; collection and preservation of physical evidence; modus operandi processes; sources of information; interview and interrogation; and follow-up investigation. (10/03)

CRIM-10 WRITING FOR CRIMINAL JUSTICE
3 units: 3 hours lecture.
Prerequisite: CRIM-04.
Advisories: ENGL-A, ENGL-41.
This course covers the techniques of communicating facts, information, and ideas effectively in a simple, clear, and logical manner in the various types of criminal justice system reports -- letters, memoranda, directives, and administrative reports. Emphasis is placed on criminal justice terminology, use of English, and the organization of information. The student will also receive practical experience in note-taking and report writing; and the preparation for the presentation of testimony in court. (10/03)

CRIM-30 JUVENILE PROCEDURES
3 units: 3 hours lecture.
One-way corequisite: CRIM-01 or CRIM-02 or CORR-01.
Advisories: ENGL-A, ENGL-41.
This course relates to the organization, functions, and jurisdiction of juvenile agencies in the criminal justice system. The course will concentrate on detention facilities and the juvenile court process. (10/03)

CRIM-32 TRAFFIC INVESTIGATION AND ENFORCEMENT
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; CRIM-01 or CRIM-02; or current employment as a law enforcement officer.
This course covers accident prevention, accident investigation, enforcement of traffic statutes, and testifying in court regarding the knowledge and methodologies addressed. (10/03)

CRIM-33 VIOLENCE IN THE FAMILY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is an examination of criminal law and the psychodynamics of child abuse, elder abuse, spousal abuse, and spousal rape. (10/03)

CRIM-35 NARCOTICS
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; CRIM-01 or CRIM-02.
This course is a review of the laws restricting and governing the use of narcotics and dangerous drugs, the psychological and physiological effects of the use and addiction to narcotics and dangerous drugs, and the procedures used to combat the problems facing law enforcement and society in relation to narcotics and dangerous drugs. (10/03)

CRIM-36 PATROL PROCEDURES
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; CRIM-01 or CRIM-02.
This course explores the theories, philosophies, and concepts related to the role expectations of the line enforcement officer. A special emphasis is placed upon the patrol, traffic, and public service responsibilities. (10/03)

CRIM-37 COMMUNICATION AND ETHICS IN LAW ENFORCEMENT
[CLC area D] 3 units: 3 hours lecture.
Advisories: ENGL-41, ENGL-41L, ENGL-A; CRIM-01 or CRIM-02 or other measures of readiness: current employment as a law enforcement officer.
This course covers the ethical issues created by the congruent and incongruent match of criminal justice philosophy and law enforcement practice. Effective communication styles for courtroom, testimony, interrogation, and verbal judo will be examined, evaluated, and practiced. (11/01)

CRIM-39 POLICE TACTICS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisories: ENGL-A, ENGL-41.
This course is designed for pre-service and in-service law enforcement personnel and is designed to teach defensive tactics. A special emphasis will be placed on disarming assailants, takedowns, holds, and baton. Officer safety and the moral and ethical application of defensive tactics will also be stressed. This course may be repeated three times. (3/99)

CRIM-42A 832 PC ARREST METHODS
[CLC area D] 3 units: 49.5 total hours lecture, 13.5 total hours lab.
Limitations on enrollment: Students must be cleared by the California Department of Justice to participate. DOJ clearance is evaluated through the LiveScan fingerprint process -- this clearance will reveal a qualifying/disqualifying criminal history background; adequate physical health for moderate physical activity during arrest and control methods training.
Advisories: ENGL-A, ENGL-41L.
This course meets the requirements of California Penal Code 832 requiring individuals having peace officer powers to complete a training course prescribed by the Commission on Peace Officer Standards and Training (POST). It satisfies POST’s Level 3 - Part 1 of the Basic Course (Police Academy) modular format. It covers topics such as: ethics, courts, community relations, laws of arrest, use of force, search and seizure, investigations and arrest/control methods. Students missing more than 5% of class time will not be allowed to complete the class (POST regulations). (3/02)
CRIM-42B 832 PC FIREARMS
[CILC area D] 1 unit: 14 total hours lecture, 12 total hours lab.
Prerequisite: CRIM-42A. Limitations on enrollment: Students must be cleared by the California Department of Justice to participate. DOJ clearance is evaluated through the LiveScan fingerprint process -- this clearance will reveal a qualifying/disqualifying criminal history background; adequate physical health for moderate physical activity during firearms training. Advisories: ENGL-A, ENGL-41, ENGL-41L.
This course meets the requirements of California Penal Code 832 requiring individuals having peace officer powers to complete a training course prescribed by the Commission on Peace Officer Standards and Training. It satisfies the firearms portion of POST’s Level 3- Part 1 of the Basic Course (Police Academy) modular format. It covers topics such as firearms safety, basic firearms operation, ammunition, cleaning and maintenance, and principles of shooting accuracy. Students missing more than 5% of class time will not be allowed to complete the class (POST regulations). (3/02)

CRIM-42C RESERVE PEACE OFFICER MODULE LEVEL 3
[CILC area D] 7 units: 121 total hours lecture, 13.5 total hours lab.
Prerequisite: CRIM-42B. Limitations on enrollment: Students must be cleared by the California Department of Justice to participate. DOJ clearance is evaluated through the LiveScan fingerprint process - this clearance will reveal a qualifying/disqualifying criminal history background; adequate physical health for moderate physical activity during arrest/control methods, use of force, and crimes in progress training; must possess a valid Class 3 or above California Driver’s License. Advisories: ENGL-A, ENGL-41, ENGL-41L.
This course satisfies the Level 3 Part 2 modular format requirements of the Commission on Peace Officer Standards and Training (POST). It covers history, professionalism, ethics, the criminal justice system, criminal law, property crimes, crimes against persons, laws of arrest, laws of search and seizure, investigative report writing, vehicle operations, use of force, crimes in progress, traffic enforcement, preliminary investigation, custodial issues, arrest and control methods including baton, first aid, CPR, chemical agents, information systems, and cultural diversity. Students missing more than 5% of class time will not be allowed to complete the class (POST regulations). (3/02)

CRIM-42D RESERVE PEACE OFFICER MODULE LEVEL 2
[CILC area D] 13.5 units: 234 total hours lecture, 27 total hours lab.
Prerequisite: CRIM-42C. Limitations on enrollment: Students must be cleared by the California Department of Justice to participate. DOJ clearance is evaluated through the LiveScan fingerprint process - this clearance will reveal a qualifying/disqualifying criminal history background; adequate physical health for moderate physical activity during arrest/control methods, use of force, and crimes in progress training; must possess a valid Class 3 or above California Driver’s License. Advisories: ENGL-A, ENGL-41, ENGL-41L.
This course satisfies the Level 2 modular format Basic Course training requirements of the Commission on Peace Officer Standards and Training (POST). It covers community relations, victimology, crisis intervention, property crimes, crimes against persons, general criminal statutes, laws of arrest, laws of search and seizure, presentation of evidence, investigative report writing, use of force, patrol techniques, vehicle pullovers, crimes in progress, traffic enforcement, unusual occurrences, preliminary investigation, and arrest and control methods including baton, firearms, chemical agents, persons with disabilities, crimes against the justice system, weapons violations, hazardous materials, cultural diversity, and discrimination issues. Students missing more than 5% of class time will not be allowed to complete the class (POST regulations). (3/02)

CRIM-49A-ZZ SPECIAL TOPICS IN CRIMINAL JUSTICE
0.5 - 5 units: 0.5 - 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This is a course designed to address special topics in criminal justice to meet the current needs of students. The course will allow pre-service and in-service personnel to maintain the most current training standards in the field. (10/03)

CROP PRODUCTION
(Agriculture Division)
CROP-10 ELEMENTS OF CEREAL GRAIN PRODUCTION
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This is a study of production principles, which include botany, taxonomy, soil tillage, fertilization, variety and seed selection, pest management, harvest, processing, storage, and marketing for important fiber, food, and cereal crops in California. Covered crops will include cotton, sugar beets, wheat, rice, barley, sorghum, corn, oats, safflower, legumes for seed, and potatoes. A field trip to a major production area is required. (9/04)

CROP-12 COMMERCIAL VEGETABLE AND GARDEN PRODUCTION
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This course is a study of vegetable production covering the botany, cultural production, harvesting, processing, growth characteristics, fertility, pests, and marketing of the major warm season and cool season vegetable crops in California. A field trip into a major vegetable production region is required. (9/04)

CROP-13 FORAGE CROPS
3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: ENGL-A; MATH-80 or MATH-83.
This course will cover production, harvesting, and utilization of principal California forage crops. The importance of forage crops as a supplement to livestock enterprises will also be covered. The use of forage crops as soil enhancers, and irrigated and range pastures, will be discussed.

DAIRY HUSBANDRY
(Agriculture Division)
DAIR-10 ELEMENTS OF DAIRY (CAN AG 28)
3 units, 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a study of history, development, and projections of the dairy industry. General information on the economics of dairying, facts, trends, selection, culling, fitting, showing, judging, pedigrees, feeding, and basic management skills will be learned and also information on employment opportunities and requirements. (3/00)

DAIR-11 DAIRY CATTLE SELECTION
2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
There will be selection of dairy cattle based on type conformation and the correlation between type and production. Pedigree evaluation, animal analysis, linear classification, and body condition scoring will be learned. Written and oral evaluation on selection will be done. The course may be repeated once for advanced skill and training. (3/00)
DANCE

(Also: PHED-14A)

1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite: None.
This course is designed to teach the student of dance how to use the "language of the body" to communicate an idea, theme, or story. Utilizing time, space, and energy, the student learns to conceive, develop, and put movement together. May be repeated three times.

DNCE-14B MODERN DANCE

1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite: None.
This course is designed for students to express themselves creatively through various modern dance forms, and to increase skills of body posture, flexibility, coordination and strength. Students will study technical components which include time, effort, and kinetic awareness. May be repeated three times.

DNCE-14C BALLET

1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite: None.
This course is designed to teach the basic steps and skills of ballet. Students will have the opportunity to learn and perform routines. History and terminology will also be covered. May be repeated three times.

DNCE-14D1 BEGINNING JAZZ DANCE

1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
This course is designed to introduce the basic techniques, rhythms, and combinations of jazz movement. The class will include stretching exercises, coordination exercises, and general body conditioning exercises. This course may not be repeated.

DNCE-14D2 INTERMEDIATE JAZZ DANCE

1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
This course utilizes computer graphics to prepare engineering drawings including geometric constructions, multi-view drawings, sectioning, auxiliary views, pictorial drawing, and developments. This course may not be repeated.

DNCE-14D3 ADVANCED JAZZ DANCE

1 unit: 0.5 hour lecture, 1.5 hours lab. Prerequisite: PHED-14D2.
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
This course emphasizes advanced conditioning, control, stage presence and dance quality performances. Students must be available for rehearsal and performances of productions to which they may be assigned. This course may not be repeated.

DRAFTING TECHNOLOGY

(Also: PHED-14D2)

3 units: 2 hours lecture, 3 hours lab.
Prerequisite: DRFT-04A. Advisory: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course uses the latest AutoDesk solid modeling software. Students will create, modify, and render solid objects. 3-D primitive and 3-D regions are generated and manipulated with the program commands and options to produce 3-D solids with mass properties. (1/02)

DRFT-04B INTERMEDIATE COMPUTER-AIDED DRAFTING

(Also: PHED-14D3)

3 units: 2 hours lecture, 3 hours lab.
Prerequisite: DRFT-04B. Advisory: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course involves the use of computer-aided drafting and hand sketching to solve problems and communicate ideas. The course is also an introduction to descriptive geometry using computers and more traditional methods of problem solving through the auxiliary view and two-view methods. The development of graphical methods in their application to graphs, charts, and spatial and vector geometry will be studied. (1/02)

DRFT-05 COMPUTER GRAPHICS

(Also: ENGR-05)

3 units: 2 hours lecture, 3 hours lab.
Prerequisite: DRFT-04A. Advisory: MATH-04A.
This course involves the use of computer-aided drafting and hand sketching to solve problems and communicate ideas. The course is also an introduction to descriptive geometry using computers and more traditional methods of problem solving through the auxiliary view and two-view methods. The development of graphical methods in their application to graphs, charts, and spatial and vector geometry will be studied. (1/02)

DRFT-42A ARCHITECTURAL DRAFTING - AutoCAD

3 units: 2 hours lecture, 3 hours lab.
Prerequisite: DRFT-04A.
This course covers the drafting techniques used in the preparation of working drawings for building construction, with special emphasis on house planning, house construction, and building codes and regulations. The course includes the drawing of a short set of house plans, floor plan, plot plan, elevation, and a perspective. (12/02)
DRFT-42B ARCHITECTURAL DRAFTING -- SOLID BUILDER  
3 units: 2 hours lecture, 3 hours lab.  
Advisory: DRFT-42A.  
This course covers the techniques in the making of working drawings for building construction. The program used creates a 3-D drawing of a house. A detailed cutting list and bill of materials is also generated relative to the drawings. There will be special emphasis on a complete set of house plans adequate for bidding purposes. Also included will be sections, details, interior elevations, foundation plan, heating and air conditioning, specification, and a model. Previous computer aided experience is not a requisite. AutoCAD commands are not used. (1/02)

DRFT-44 PRINT READING AND SKETCHING  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course is for technical students and other personnel who must be skilled in reading industrial prints. The student will become familiar with industrial prints, industry standards, and current practices. There will be a basic coverage of sketching as it applies to the communication skills of reading prints. (1/02)

DRFT-48A SPECIAL PROBLEMS - ARCHITECTURAL DRAFTING  
2 units: 6 hours lab.  
Prerequisite: DRFT-42B.  
This course is designed to allow the student to gain experience in those areas not covered in the objectives of DRFT-42B. The course will help prepare the student for employment in the architectural trade with necessary computer-aided drafting skills. Techniques and information needed for employment in the trade occupations will receive special emphasis. (1/02)

DRFT-48B SPECIAL PROBLEMS IN CAD - SOFTWARE MODIFICATION  
2 units: 6 hours lab.  
Prerequisites: DRFT-04C, DRFT-05/ENGR-05.  
This course is designed to permit the student to experience those topics not covered in the objectives of DRFT-04ABC and DRFT-05/ENGR-05. The course will help prepare the student for employment in the trade with AutoCAD entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (1/02)

DRFT-48C SPECIAL PROBLEMS IN CAD - TODAY'S TECHNOLOGY  
2 units: 6 hours lab.  
Prerequisites: DRFT-04C, DRFT-05/ENGR-05.  
This course is designed to permit the student to experience those areas not normally covered in the objectives of DRFT-04ABC and DRFT-05/ENGR-05. The course will help prepare the student for employment in the trade with entry-level skills. Techniques and information needed for employment in the trade occupations will receive special attention. (1/02)

DRFT-59 BASIC DRAFTING  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course covers principles of mechanical drawing and drafting. It is designed to help students communicate through sketching and drawing. The communication is covered as a presentation of ideas through drawings. (1/02)

DRAM-01 INTRODUCTION TO THEATER (CAN DRAM 18)  
(CSU breadth area C1/C2) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course is an introduction to the art of theater that delves into the nature of theatrical presentation, elements of dramatic structure, and the contributions of the playwright, actor, director, designer, technician, and audience. (4/00)

DRAM-02 DRAMA PRODUCTIONS  
3 units: 2 hours lecture, 3 hours lab. Advisory: ENGL-A.  
This course is a workshop in modern theater practice through examining the relationship of production for college or public performance. Stage management, direction, rehearsal procedures, and possible solutions to technical problems are stressed. Students must be available for rehearsals and performances of productions to which they are assigned. This course may be repeated three times. (3/00)

DRAM-03 HISTORY OF DRAMATIC LITERATURE  
(Also: ENGL-03)  
(CSU breadth area C1) 3 units: 3 hours lecture.  
Prerequisite: ENGL-01A. Advisory: ENGL-01B.  
This course is a study of dramatic literature as a reflection of theater history, including the influence of staging, acting styles, scene design, and culture upon the playwright and his/her work. Classical to contemporary drama is examined. (11/04)

DRAM-04 ACTOR'S WORKSHOP  
3 units: 2 hours lecture, 3 hours lab.  
Advisory: ENGL-A.  
This course is designed to serve the needs of the beginning student in acting. Emphasis will be on stage techniques and character development for stage performance. The development of scene repertoire is also studied by choosing scenes to be memorized from various periods of dramatic literature. Critical evaluation, demonstration, and written reviews are required. This course may be repeated three times. (3/00)

DRAM-09 VOICE PRODUCTION FOR THE PERFORMER  
(CAN DRAM 6)  
3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course is designed to offer the student formal training in voice for the stage by providing the opportunity to develop a critical awareness of the vocal requirements of proper stage diction. (3/00)

DRAM-10 BEGINNING ACTING (CAN DRAM 8)  
3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course is designed to serve the needs of the beginning student in acting. Emphasis will be on stage techniques and character development for stage performance. The development of scene repertoire is also studied by choosing scenes to be memorized from various periods of dramatic literature. Critical evaluation, demonstration, and written reviews are required. This course may be repeated once. (3/00)

DRAM-11 INTERMEDIATE ACTING  
3 units: 3 hours lecture.  
Prerequisite: DRAM-10. Advisory: ENGL-A.  
This course provides an in-depth application of techniques explored in Beginning Acting with an emphasis on characterization. Role analysis and auditioning techniques will also be explored. Critical evaluation, demonstration, and written reviews are required. This course may be repeated once. (3/00)
EDUCATION

(Developmental and Educational Studies)

EDUC-47 COLLEGE PLANNING AND LEARNING SYSTEMS
3 units: 3 hours lecture.
Advisory: ENGL-84.
This course is designed to help students improve study techniques for succeeding in college. The course will emphasize effective reading of textbooks, improving concentration and memory, getting the main idea, summarizing and outlining information, taking notes, listening to lectures, preparing for and taking exams, strengthening vocabulary, using the library, documenting and recording research, and managing time. (3/00)

EDUC-55 ORIENTATION TO TEACHER'S AIDE IN THE SPECIAL EDUCATION SETTING
1 unit: 1 hour lecture.
Advisories: ENGL-81, ENGL-81L, ENGL-84.
This course is designed to introduce students to the core issues involved in being a teacher's aide in the Special Education setting. The student will be exposed to tasks that a teacher's aide needs to know and perform, specifically in regard to the issues regarding disabilities and behavior improvement strategies. The student will also be encouraged to consider career opportunities in education via the Liberal Studies program. (4/01)

EDUC-70 A-ZZ SPECIAL TOPICS IN EDUCATION
0.5 - 3 units: 0.5 - 3 hours lecture.
This course is designed to address special topics in education to meet current needs of students. Specific classes will be offered to help students understand the educational environment and their relationship to it. (11/96)

EDUC-80 COMPUTER ACCESS EVALUATION
0.5 unit: 9 total hours of individualized assessment activities. Prerequisite/Advisory: None.
This course is designed to provide a means for in-depth computer access evaluation in order to determine an appropriate access environment for a student with a disability or multiple disabilities. Likely participants in this course would include students who are multiply handicapped, severely physically disabled, have acquired brain injuries resulting in secondary orthopedic and/or visual disabilities, re-entering disabled older students, blind students, or other students on recommendation of instructional staff. This course is offered on a credit/no credit basis. This is an open entry/open exit course.

EDUC-81 ADAPTED KEYBOARDING
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This course is designed to teach keyboarding basics to disabled students who must use adaptive technologies for successful access to the keyboard or screen and/or are unable to complete mainstream typing classes successfully. This course is offered on a credit/no credit basis.

EDUC-82A COMPUTER ACCESS I
1 unit: 3 hours lab.
This course is designed for students with learning, visual, or physical disabilities. It provides training in the use of computer access technologies, within the context of word processing, to enhance a disabled student's ability to access and use microcomputers. Students will be familiarized with basic concepts of word processing used by the majority of industry-standard word processors. This course is offered on a credit/no credit basis.
EDUC-82B COMPUTER ACCESS II
1 unit: 3 hours lab.
This course is designed for disabled students who have successfully completed Computer Access I. Students will enhance their computer access skills through completion of assignments or projects. This course is offered on a credit/no credit basis.

EDUC-82C COMPUTER ACCESS PROJECTS
1 unit: 3 hours lab.
This course is designed for students who require access to specialized adaptive technologies in order to complete assignments for classes in which they are concurrently enrolled. This course is offered on a credit/no credit basis.

EDUC-87 STUDY SKILLS
3 units: 3 hours lecture.
Advisories: ENGL-80, ENGL-80L.
This course is designed to help improve study skills for succeeding in college. The course will emphasize effective reading of textbooks, improving concentration and memory, getting the main idea, summarizing and outlining information, taking notes, listening to lectures, preparing for and taking exams, and managing time.

EDUC-88 INFORMATION MANAGEMENT STRATEGIES
2 units: 1 hour lecture, 3 hours lab.
This course is designed to develop or enhance students' ability to manage and organize information. Multimedia instruction is utilized. Individualized computer-assisted instruction, specific to word processing skill development, is available in the lab setting. This course is offered on a credit/no credit basis.

EDUC-89 IMPROVING LEARNING POTENTIAL
2 units: 1 hour lecture, 3 hours lab.
Prerequisite/Advisory: None.
This course is designed to offer specialized computer-assisted instruction for students with learning disabilities or acquired brain injuries. It will provide these students with an opportunity to maximize their learning potential and increase their academic efficiency. This course is offered on a credit/no credit basis only and may be repeated five times.

ELECTRICITY – ELECTRONICS
(Industrial Technology Division)

ELCT-30 INTRODUCTION TO ELECTRICITY AND ELECTRONICS
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
This is an introductory course in electrical and electronic fundamentals including past, present, and future applications in the home, automobile, medicine, and industry. Also included will be computer technology, direct and alternating current circuits, magnetics, circuit applications, and test equipment. (1/04)

ELCT-31 DIRECT CURRENT AND ALTERNATING CURRENT CIRCUITS (FOUNDATIONS OF ELECTRONICS)
5 units: 3 hours lecture, 6 hours lab.
Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
This is a course in basic electronics/electricity theory that investigates the behavior of resistance, capacitance in alternating current circuits, including transformer action and AC test equipment. Also covered are AC circuit construction techniques and the utilization of electronic equipment in circuit construction and troubleshooting. The use of circuit simulation software for alternating current circuit analysis is an integral part of this course. (3/06)

ELCT-31B ALTERNATING CURRENT CIRCUITS (FOUNDATIONS OF ELECTRONICS)
3 units: 1.5 hours lecture, 4.5 hours lab.
Prerequisite: ELCT-31A. Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
This is a course in AC electronics/electricity theory that investigates the behavior of resistance, inductance, and capacitance in alternating current circuits, including transformer action and AC test equipment. Also covered are AC circuit construction techniques and the utilization of electronic equipment in circuit construction and troubleshooting. The use of circuit simulation software for alternating current circuit analysis is an integral part of this course. (3/06)

ELCT-32 SEMICONDUCTORS AND INTEGRATED CIRCUITS (FOUNDATIONS OF ELECTRONICS)
5 units: 2 hours lecture, 9 hours lab.
Prerequisite: ELCT-31. Advisories: ENGL-A; MATH-80 or MATH-83.
This course introduces students to fundamentals of semiconductor devices and analog integrated circuits. The course covers circuit analysis of diodes, BJTs, FETs, and MOSFETs transistors with emphasis on their practical applications as rectifiers, single and multiple stage amplifiers, oscillators and power amplifiers. Integrated circuits as operational amplifiers, timers, instrumentation amplifiers, active filters, digital-to-analog (ADC) and analog-to-digital (DAC) converters are also covered. Laboratory activities equip students with real job skills in the utilization of various electronic test equipment during circuit construction and troubleshooting. (3/06)

ELCT-32SL SEMICONDUCTORS AND INTEGRATED CIRCUITS SOFTWARE LAB
(Formerly ELCT-49B) 2 units: 6 hours lab.
One-way corequisite: ELCT-32. Advisories: ENGL-A; MATH-80 or MATH-83.
This course is designed to supplement the electronics course ELCT-32 but can be taken concurrently or after ELCT-32 by any student desiring instruction in the use of computer-aided instruction (CAI) software for semiconductors and integrated circuits, circuit simulation, and virtual instrumentation. (3/06)
ELCT-34 DIGITAL LOGIC, CIRCUITS, AND SYSTEMS  
(FOUNDATIONS OF ELECTRONICS)  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-80 or MATH-83.  
The course covers the theory of digital logic circuits and systems.  
Analog and digital conversion circuits, number systems and  
codes, Boolean algebra, Karnaugh maps, logic gates, counters,  
multi-vibrators, registers, decoders, counters, memories, and  
clock and timing circuits are also studied. Programmable logic  
device and microprocessors will be introduced. (3/06)

ELCT-34SL DIGITAL LOGIC CIRCUITS AND SYSTEMS  
SOFTWARE LAB  
(Formerly ELCT-49D) 1 unit: 3 hours lab.  
On-way corequisite: ELCT-34.  
Advisory: ENGL-A.  
This course is designed to supplement digital electronics course  
ELCT-34 but can be taken by any student desiring instruction in  
use of computer-aided instruction (CAI) software for digital logic  
circuit and digital system simulation and virtual instrumentation.  
The course may be repeated once. (3/06)

ELCT-35 MICROCONTROLLERS, PROGRAMMING, AND  
INTERFACING WITH ROBOTICS APPLICATIONS  
(FOUNDATIONS OF ELECTRONICS)  
4 units: 2 hours lecture, 6 hours lab.  
Prerequisite: ELCT-34. Advisories: ENGL-A, ENGL-41.  
This course covers basic constructing and programming 8-bit  
Programmable Intelligent Computer (PICmicro) microcontrollers  
found in computerized systems with emphasis on robotics  
applications. Characteristics, capabilities, and limitations of other  
microcontrollers are discussed. RISC (Reduced Instructions Set  
Computing), hardware structure, programming, and interfacing  
methods are also covered. (3/06)

ELCT-36 NETWORKING TOPOLOGIES AND CABLING  
(FOUNDATIONS OF ELECTRONICS)  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-80 or MATH-83.  
This is a course designed to provide the student with information  
and knowledge to prepare for the industry-standard Building  
Industry Consulting Service International (BICS) Register  
installer. Level I exam, and employment as a a  
telecommunications cabing installer. Students will gain an  
understanding of the cabling industry, U.S. and international  
standards, basic networking, signal transmission, copper cabling,  
fiber optics, installation, safety, structured cabling system basics,  
cable management, cable testing, and emerging technologies.  
Students will also be prepared to read network design  
documentation, architectural blueprints, set up part sets parts,  
purchase components, pull and mount cable, choose wiring  
closets, install jacks, and perform cable testing. This course is  
repeatable three times. (3/06)

ELCT-37 LASER ELECTRONICS  
(Also: LEOT-37)  
3 units: 2 hours lecture, 3 hours lab.  
Prerequisites: ELCT-32, ELCT-33.  
This electronics application course covers the electronics  
segments of laser equipment. Subjects studied include laser high  
voltage power supplies, flashlamps and arc lamp circuits, electro- 
optic and acousto-optic circuits, optical detectors, and electro- 
optic electronic instrumentation. (12/00)

ELCT-40A CISCO CERTIFIED NETWORKING ASSOCIATE  
(CCNA) COURSE I  
(Also: CPSC-40A)  
[CILC areas A,B,C,D,E,F] 3 units: 2 hours lecture, 3 hours lab.  
Advisories: ELCT-36, ELCT-51; ENGL-81; MATH-80 or  
MATH-83.  
This is the first of four semester courses (or four 9-week courses)  
designed to provide students with classroom and laboratory  
experience in current and emerging networking technologies and  
initial preparation for CCNA testing. The complete series of  
training experiences will empower them to enter employment  
and/or further education and training in the computer-networking  
field. Instruction includes, but is not limited to, electrical safety,  
network terminology and protocols, network standards, local area  
networks (LANs), wide area networks (WANs), open system  
interconnection (OSI) models, physical cabling, cabling tools,  
electronics test equipment, routers, router programming, star  
topology, transmission control protocol/Internet protocol (TCP/IP)  
addressing, and network standards. (10/00)

ELCT-40B CISCO CERTIFIED NETWORKING ASSOCIATE  
(CCNA) COURSE II  
(Also: CPSC-40B)  
[CILC areas A,B,C,D,E,F] 2 units: 1 hour lecture,  
3 hours lab.  
Prerequisite: CPSC/ELCT-40A.  
This second course is designed to provide students with  
classroom and laboratory experience in current and emerging  
networking technologies and initial preparation for CCNA testing.  
The complete series of training experiences will empower them  
to enter employment and/or further education and training in the  
computer-networking field. Instruction includes electrical safety,  
network terminology and protocols, and network standards. Local  
area networks (LANs), wide area networks (WANs), open system  
interconnection/Internet operating systems (OSI/ISO) models,  
physical cabling, cabling tools, electronics test equipment,  
routers, router programming, star topology, transmission control  
protocol/Internet protocol (TCP/IP) addressing, and network  
standards are also covered. (11/00)

ELCT-40C CISCO CERTIFIED NETWORKING ASSOCIATE  
(CCNA) COURSE III  
(Also: CPSC-40C)  
[CILC areas C,E,F] 2 units: 1 hour lecture, 3 hours lab.  
Prerequisite: CPSC/ELCT-40B.  
This third course is designed to provide students with classroom  
and laboratory experience in electrical safety, network technology  
and protocols, and network standards. Local area networks  
(LANs), virtual LANs (VLANs), wide area networks (WANs), open  
system interconnection (OSI) models, Internet work packet  
exchange (IPX), Ethernet operation, spanning tree protocol,  
physical cabling, cabling tools, electronics test equipment,  
bridges, routers, switches, transmission control protocol/Internet  
protocol (TCP/IP) addressing, network standards, and network  
troubleshooting are also covered. (11/00)

ELCT-40D CISCO CERTIFIED NETWORKING ASSOCIATE  
(CCNA) COURSE IV  
(Also: CPSC-40D)  
[CILC areas C,E,F] 2 units: 1 hour lecture, 3 hours lab.  
Prerequisite: CPSC/ELCT-40C.  
This fourth course is designed to provide students with  
knowledge concerning electrical safety, network terminology and  
protocols, and network standards. Local area networks (LANs),  
wide area networks (WANs), open system interconnection (OSI)  
models, point-to-point protocol (PPP), integrated services digital  
network (ISDN) protocol, physical cabling, cabling tools,  
electronics test equipment, routers, router programming,  
transmission control protocol/Internet protocol (TCP/IP)  
addressing, frame relay operation, network standards, and  
network troubleshooting are also covered. This course also  
revises the entire level 1 training that has been accomplished to  
this point in preparation for Network+ and CCNA examinations.  
(11/00)
ELCT-41 INDUSTRIAL MOTOR AND EQUIPMENT CONTROL (APPLICATIONS OF ELECTRONICS)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84; ELCT-31 or ELCT-52.
This course is designed to present the principles and applications of electrical motor and equipment control techniques used in industry. Ladder logic diagrams, contactors, motor starters, and electronic controls and sensors are among the subjects to be studied. Lectures, demonstrations, and laboratory experiments will be the methods used to present and enrich the material to be learned. (11/99)

ELCT-42A PRINCIPLES AND APPLICATIONS OF PROGRAMMABLE LOGIC CONTROLLERS (APPLICATIONS OF ELECTRONICS)
2 units: 1 hour lecture, 3 hours lab.
Advisory: ELCT-42A.
This course provides electrical and industrial electronic students with basic skills and technical exposure to programmable logic controllers (PLCs). The subjects studied include terminology, programming methods, and operation of the programmable logic controller. The students will program and operate modern PLCs as a part of laboratory assignments.

ELCT-42B ADVANCED PROGRAMMING AND INDUSTRIAL APPLICATIONS OF PROGRAMMABLE LOGIC CONTROLLERS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisory: ELCT-42A.
This course will provide advanced exposure to programmable logic controllers (PLCs). The subjects studied will include advanced topics in PLC programming, industrial applications, operator interfaces, PLC networking, and communications protocols. The student will program and operate modern PLCs as a part of laboratory assignments. (3/01)

ELCT-43A INDUSTRIAL INSTRUMENTATION AND PROCESS CONTROL (APPLICATIONS OF ELECTRONICS)
3 units: 2.5 hours lecture, 1.5 hours lab.
Advisories: ELCT-31 or ELCT-31B or ELCT-52; ENGL-A, ENGL-41.
This course is designed to study instrumentation sensors and controls that are used in industrial process control and automation. The course includes the study of the principles of operation and the practical applications of instrumentation in industry. Topics such as decibels, micro-controllers, levers, friction, clutches and brakes, tooth rotor tachometers, vision sensors, dynamic braking of DC motors, and flux vector AC drives will be addressed. (2/02)

ELCT-43B GRAPHICAL PROGRAMMING FOR ELECTRONICS DATA ACQUISITION
1.5 units: 0.5 hours lecture, 3 hours lab.
Advisories: CPS-01; ELCT-43A; MATH-C or MATH-D (preferred).
This course is designed to teach the basic functionality of analysis and instrumentation programming software using National Instruments graphics software package, LabVIEW™. This software not only reinforces basic scientific, mathematical, and engineering principles but also provides students with theoretical knowledge necessary to develop their own instrumentation and data acquisition solutions. LabVIEW™ is a real-world, hands-on experience in graphical programming for industrial and scientific applications. (2/02)

ELCT-44 ELECTRONIC SHOP PRACTICES: TECHNIQUES OF FABRICATION, SOLDERING, REWORK AND EQUIPMENT REPAIR
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This course provides students with a basic understanding of the fabrication, soldering, rework, and repair techniques necessary to prepare them for entry-level employment in the fields of electronic fabrication, assembly, and repair. There will be emphasis on techniques needed for a broad range of non-destructive electronic repairs once the diagnostic procedures have been completed. This course emphasizes techniques commonly used in industry. (2/02)

ELCT-47 ELECTRICAL MACHINES, GENERATORS, TRANSFORMERS, AND AC DISTRIBUTION (APPLICATIONS OF ELECTRONICS)
3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-81, ENGL-84; ELCT-31 or ELCT-52, ELCT-41.
This course covers principles of AC and DC motors, generators, transformers, three-phase generation, and AC distribution systems. The course content will include lecture, demonstration, and laboratory projects using motors and transformers. (11/99)

ELCT-51A PERSONAL COMPUTER CONFIGURATION, ASSEMBLY AND REPAIR
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This is a course designed to provide the student with a working knowledge of the hardware of the IBM personal computer (PC), its clones, and successors. The course will cover basic principles of operation, established standards for maintaining compatibility between components and boards, use of diagnostic software and hardware, various types of operating systems, and standard troubleshooting techniques. (3/01)

ELCT-51B A+ CERTIFICATION TRAINING
[CILC area A] 3 units: 2 hours lecture, 3 hours lab.
Advisory: ELCT-51A.
This course provides the electronics student with advanced knowledge of the system hardware and software available for personal computers (PCs). The course will cover the principles of operation, standards for maintaining compatibility between computer systems, the use of advanced diagnostic software and hardware, various types of operating systems, and standard troubleshooting techniques. The course will also cover networking principles, and software and hardware as they apply to the personal computer. (3/01)

ELCT-52 INTRODUCTION TO ELECTRICITY AND ELECTRONICS
3 units: 2.5 hours lecture, 1.5 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This is an introductory course in basic electronics/electricity theory and covers resistance, inductance, capacitance in the series, parallel, and series-parallel circuits with DC and AC power sources. Circuit analysis is accomplished through basic circuit formulas according to Ohm’s and Kirchhoff’s laws. Fundamentals of magnetism, DC and AC motors, diodes, transistors and integrated circuits, and the utilization of basic test equipment in electrical circuit construction and troubleshooting are also covered. (3/06)
ENGR-10 ENGINEERING MATERIALS (CAN ENGR 4)
3 units: 3 hours lecture.
Prerequisites: CHEM-04A; PHYS-04A.
Advisories: ENGL-A, ENGL-41.
This course is an introduction to the atomic and microscopic structure of modern engineering materials. The effects of structure and manufacturing processes on the mechanical, electrical, and other physical properties of materials are studied. Metals, alloys, ceramics, polymers, and composites are explored. (3/00)

ENGR-12 FORTRAN PROGRAMMING
(Also: CPSC-12 and MATH-12)
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This course teaches students to use the FORTRAN programming language to solve problems in a wide variety of areas. Programming design, problem-solving, and debugging techniques are emphasized throughout the course. (3/00)

ENGR-14 C++ PROGRAMMING (Also: MATH-14)
3 units: 2 hours lecture, 3 hours lab.
One-way corequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This is the entry-level comprehensive concepts course for computer science majors, and recommended for science and math majors. Algorithm design, logic diagrams, problem-solving, coding, and debugging are emphasized using a structured language such as C++. (3/00)

ENGR-15 ELEMENTARY MECHANICS (STATICS)
(CAN ENGR 8)
3 units: 3 hours lecture.
Prerequisite: PHYS-04A. One-way corequisite: MATH-04C.
Advisories: ENGL-A, ENGL-41.
This course is the study of rigid bodies when acted upon by forces and couples in 2-D and 3-D space. Included are trusses, frames, machines, beams, friction, centroids, centers of mass, and moments of inertia. (1/01)

ENGR-18 ELECTRICAL CIRCUITS ANALYSIS (CAN ENGR 6)
4 units: 3 hours lecture, 3 hours lab.
Prerequisite: PHYS-04B. One-way corequisite: MATH-04C.
Advisories: ENGL-A, ENGL-41.
This course covers basic circuit analysis emphasizing resistive circuits, natural and forced response of inductive and capacitive circuits, phasor analysis, and semiconductor elements. Lab involves construction and measurement of circuits using power supplies, breadboards, multimeters, oscilloscopes, and function generators. (1/01)

ENGR-25 GRAPHICS (CAN ENGR 2) (Also: DRFT-25)
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: DRFT-04A. Advisory: MATH-04A.
This course involves use of computer-aided drafting and hand sketching to solve problems and communicate ideas. The course is also an introduction to descriptive geometry, using computers and more traditional methods of problem solving through the auxiliary view and two-view methods. The development of graphical methods in their application to graphs, charts, and spatial and vector geometry will be studied. (1/02)

ENGR-30 INTRODUCTION TO ENGINEERING
[CILC area C] 2 units: 1 hour lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41; MATH-C or MATH-D.
This course covers three areas: a description of engineering careers, a factual comparison of engineering degrees and transfer universities, and a discussion of the academic skills required to earn an engineering degree. Successful students will be able to articulate their engineering career goals. The course includes laboratory activities and field trips to engineering companies. (10/04)

ENGR-49A-ZZ SPECIAL TOPICS IN ENGINEERING
0.5 - 3 units: 0-3 hours lecture, 0-9 hours lab.
Advisories: ENGL-A, ENGL-41.
This course covers special topics in engineering to meet needs that cannot be included in the current engineering courses. It will assist students in acquiring the most up-to-date information possible in order to cope with the rapidly changing world of technology and design. (2/01)
**ENGLISH**

(Humanities Division)

**ENGL-A BASIC COMPOSITION AND READING**
[CILC area G] 3 units: 3 hours lecture.
Prerequisites: ENGL-81, ENGL-84.
Two-way corequisite: ENGL-AL.
This course is designed for students not qualified for ENGL-01A and for students who desire a review of the conventions of written communication. It offers a review of grammar and usage in conjunction with the writing assignments. Reading assignments cover a variety of subjects for class discussion and provide a means for increasing reading comprehension. Writing assignments include an introduction to library research skills.
(1/03)

**ENGL-AL PRE-COLLEGIATE WRITING LAB**
1 unit: 3 hours lab.
Two-way corequisite: ENGL-A. Advisory: OFCT-50B.
The writing lab is required of all students registered in ENGL-A. It is designed to improve writing skills by providing individualized assistance through a prescriptive program based on individual writing strengths and needs.
(12/02)

**ENGL-B INTRODUCTION TO APPLIED WRITING**
3 units: 3 hours lecture.
Advisory: LRNR-30.
This course is designed for students who desire to learn or polish skills in writing for the workplace or public arena. Writing assignments include reports, inter-office memos, public relations letters, public announcements, and other workplace documents for a variety of vocational occupations and public situations.
(11/04)

**ENGL-L WRITING PRACTICE AND IMPROVEMENT**
1 unit: 3 hours lab.
Advisories: ENGL-A; LRNR-30; OFCT-50B.
This course provides computer-assisted writing instruction designed to improve writing skills.
(1/05)

**ENGL-01A COMPOSITION AND READING I (CAN ENGL 2)**
(CSU breadth area A2) [CILC area G] 3 units: 3 hours lecture.
Prerequisite: ENGL-A or appropriate assessment process.
ENGL-01A is a course that stresses critical readings, scholarly compositions, and research applications. Students write exploratory and argumentative essays—at least one of which is fully annotated—based on class readings and discussions. Students are expected to understand basic English skills upon entering the course and are expected to acquire more sophisticated reading and composition skills throughout the term. Students apply matters and measures of critical thinking skills to their assignments.
(11/03)

**ENGL-01B INTRODUCTION TO LITERATURE (CAN ENGL 4)**
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A.
This is a course in writing and literary analysis based upon reading and studying major literary types: short story, novel, drama, and poetry. Writers of various countries and periods are read in order to encourage an appreciation of literature's range, artistry, and insight into the human experience.
(11/04)

**ENGL-02 ORAL INTERPRETATION (Also: COMM-02)**
3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-41.
This course is designed to help students understand, appreciate, and convey the power of the written word through performance. A variety of writings will be analyzed in their rhetorical, historical, and cultural contexts, and will be brought to life by students communicating them to others through their voices and bodies.
(4/99)

**ENGL-03 HISTORY OF DRAMATIC LITERATURE (Also: DRAM-03)**
(CSU breadth area C1) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course examines the history and subsequent developments of world literatures and cultures from the ancients to 1650 through various literary genres and cultural traditions. Primary focus will fall on major works of certain periods and of geographic origins. Students will engage in comparative analysis and evaluation of the literary works as well as close study of the works in addition to the study of each text's merits.
(5/05)

**ENGL-04A INTRODUCTION TO WORLD LITERATURE: ANCIENTS TO 1650**
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course examines the origins and subsequent developments of world literatures and cultures from 1650 to the present. Representative works of major authors are read as examples of the various genres, literary trends, and historical eras in which they were written.
(12/04)

**ENGL-04B INTRODUCTION TO WORLD LITERATURE: 1650 TO PRESENT**
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course introduces students to the history and variety of English literature from its beginnings to the early 18th century. Representative works of major authors are read as examples of the various genres, literary trends, and historical eras in which they were written.
(12/04)

**ENGL-05 INTRODUCTION TO FICTION (CAN ENGL 18)**
3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course traces the origins and subsequent developments of short fiction and longer fiction (novels), and signals the specific characteristics of respective genres. Students will read a number of books of short fiction and three to five novels in order to study the various developments of style, form, structure, and other artistic choices associated with the history of fiction.
(12/04)

**ENGL-06A MAJOR ENGLISH WRITERS (CAN ENGL 8)**
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course introduces students to the history and variety of English literature from the eighteenth to the twentieth, to the twenty-first centuries. Representative works of major authors are read as examples of the various genres, literary trends, and historical eras in which they were written.
(12/04)

**ENGL-06B MAJOR ENGLISH WRITERS (CAN ENGL 10)**
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course examines the history and subsequent developments of world literatures and cultures from 1650 to the present. Representative works of major authors are read as examples of the various genres, literary trends, and historical eras in which they were written.
(12/04)
Merced College 2006-2007 Catalog

Course Descriptions

ENGL-07 STUDIES IN LITERATURE: POETRY
3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course traces origins and developments of the poem as a major literary genre. Assignments include an intensive study of the poetic process. Poems from ancient times to the present are analyzed in terms of form, idea, and language. (1/05)

ENGL-08 INTRODUCTION TO SHAKESPEARE
3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
Introduction to Shakespeare is a course of literary analysis based on reading and studying the major works of William Shakespeare. The course focuses on a number of Shakespeare's plays, especially the most widely-known ones, from the categories Comedy, History, and Tragedy, as well as a survey of his non-dramatic poetry. As this course is an introductory course, students will receive the opportunity to learn about Elizabethan England -- the England of the time of Shakespeare. (12/04)

ENGL-10 AMERICAN LITERATURE FROM BEGINNINGS TO CIVIL WAR (CAN ENGL 14)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course is designed to introduce students to the history and variety of literature from American Literature's beginnings to the Civil War. Representative works are read as examples of various genres, literary trends, and historical eras. (11/04)

ENGL-11 AMERICAN LITERATURE FROM POST-CIVIL WAR TO PRESENT (CAN ENGL 16)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This is a course designed to introduce students to the history and variety of American literature from the end of 1865 to the present. Representative works are read as examples of various genres, literary trends, and historical eras. (11/04)

ENGL-12 CREATIVE WRITING (CAN ENGL 6)
3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This is a course designed to provide experience in the writing of poetry, drama, fiction, and essay and to aid the student in becoming aware of the craft of writing as described and/or demonstrated by professional writers. The class is conducted primarily as a workshop in which students read their materials for constructive criticism. (11/04)

ENGL-13 CRITICAL REASONING AND WRITING
(Also: PHIL-13)
(CSU breadth area A3) [CILC area G] 3 units: 3 hours lecture. Prerequisite: ENGL-01A.
ENGL-13/PHIL-13 meets the IGETC critical thinking/composition requirement. The course emphasizes the development of critical thinking skills through instruction in reading and writing arguments. Readings feature mostly non-fictional essays and books that reflect diverse cultural and gender perspectives on a variety of contemporary political and social issues, especially those involving race, ethnicity, and gender. (1/05)

ENGL-13H HONORS CRITICAL REASONING AND WRITING
(Also: PHIL-13H)
(CSU breadth area A3) [CILC area G] 3 units: 3 hours lecture.
Prerequisite: ENGL-01A.
Limitation on enrollment: Enrollment in the Honors Program. ENGL-13H emphasizes the development of critical thinking skills through instruction in reading and writing arguments. Readings feature mostly non-fictional essays and books that reflect diverse cultural and gender perspectives on a variety of contemporary political and social issues, especially those involving race, ethnicity, and gender. (3/00)

ENGL-14 INTRODUCTION TO FILM
(CSU breadth area C1) 3 units: 2 hours lecture, 3 hours lab.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This course includes critical and popular approaches to film. Students will study film form, genre, style, criticism, and history. They will read screenplays and film criticism and theory, and view the films under consideration to obtain a better understanding of the film discipline. (1/03)

ENGL-18 AFRICAN AND AFRICAN-AMERICAN LITERATURE
(Also: HUM-18)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B.
This is an introductory course in African literature written in English or translated from African languages or French into English. It will represent a survey of major works from colonial and post-colonial literature to introduce students to African literature and films of merit, cultural relevance, and universal application. In addition to enabling students to view African works within a global context, its goal will be to show the connection of themes, issues, and styles between African and African-American literature and experience as well. Works studied will include epics and narratives, poetry and song lyrics, short fiction, novels, essays, films, and drama in an effort to assist students in acquiring an appreciation of important literary voices that have heretofore been neglected in literature studies. (11/00)

ENGL-22 RESEARCH, COMPOSITION, AND BIBLIOGRAPHY
1 unit: 1 hour lecture.
Advisory: ENGL-A.
This course introduces students to the research and composing processes of the discipline-specific writing conventions of their fields. Students will be introduced to Internet search engines, library catalogs, indices, abstracts, bibliographies, reference books, and specialized sources. Research and writing include an annotated bibliography and an article-length essay. (11/04)

ENGL-30A BEGINNING AMERICAN SIGN LANGUAGE
3 units: 3 hours lecture.
Prerequisite/Advisory: None.
This course is an introduction to understanding and signing American Sign Language and appreciating the basic elements of the deaf culture. Emphasis is on obtaining a practical command of the language, including major grammatical components, basic ASL sentence structures, non-manual gestures, expression of spatial relationships in a visual-gestural language, and beginning conversational skills. (12/05)

ENGL-30B INTERMEDIATE AMERICAN SIGN LANGUAGE
3 units: 3 hours lecture.
Prerequisite/Advisory: ENGL-30A.
This course provides intermediate practice understanding and signing American Sign Language and appreciating the basic elements of the deaf culture. Emphasis is on obtaining a practical command of the language including major grammatical components, basic ASL sentence structures, non-manual gestures, expression of spatial relationships in a visual-gestural language, and intermediate conversational skills. (12/05)
ENGL-30C ADVANCED AMERICAN SIGN LANGUAGE
3 units: 3 hours lecture.
Prerequisite: ENGL-30B.
This course provides advanced practice in understanding and signing American Sign Language and appreciating the basic elements of the deaf culture. Emphasis is on obtaining a practical command of the language, including major grammatical components, basic ASL sentence structures, non-manual gestures, expression of spatial relationships in a visual-gestural language, and advanced conversational skills. (12/05)

ENGL-31 CHILDREN'S LITERATURE
3 units: 3 hours lecture.
Prerequisite: ENGL-01A.
This course explores children’s literature as a special topic of English literature. Students will read and write about children’s literature, exploring a range of cultures for both literary elements and structural features. The class will identify themes derived from cultural patterns and symbols from rituals, mythologies, and traditions by identifying and evaluating structural and organizational devices in prose and poetry. Students will read various literary genres, including but not limited to novels, short stories, folk and fairy tales, and poetry. (5/05)

ENGL-39 INDEPENDENT STUDY/TUTORING
2 units: 1 hour lecture, 3 hours lab. Prerequisite: ENGL-01A.
The course is designed to give pre-professional training to prospective teachers. It provides practical experience in a tutorial workshop atmosphere helping basic writers become more proficient. Tutors will work with full-time English teachers in the writing center at Merced College to establish and apply teaching and tutorial methods. (3/00)

ENGL-41 COLLEGE-LEVEL READING
2 units: 2 hours lecture.
Prerequisite: ENGL-81, ENGL-A. Two-way corequisite: ENGL-41L.
This class emphasizes critical reading and thinking skills appropriate to college reading needs. This course is for students who already have a knowledge of word analysis and comprehension techniques but need work in applying critical reading and thinking strategies to college-level material. (12/02)

ENGL-41L COLLEGE-LEVEL READING LABORATORY
1 unit: 3 hours lab.
Prerequisite: ENGL-81L. Two-way corequisite: ENGL-41.
The reading lab is required of all students registered in ENGL-41. It is designed to improve college-level critical reading and thinking skills by providing individualized assistance through a prescriptive program based on individual reading strengths and needs. (12/02)

ENGL-47ABCD SPECIAL TOPICS IN LANGUAGE AND LITERATURE (Also: HUM-47ABCD)
3 units: 3 hours lecture. Prerequisite: ENGL-A.
This course engages students in the study of language and literature, and topics will vary from semester to semester. (1/05)

ENGLISH, DEVELOPMENTAL (Developmental and Educational Studies)

ENGL-80 BASIC READING TACTICS I
3 units: 3 hours lecture.
Prerequisite: ENGL-90 or ESL-91.
Two-way corequisite: ENGL-80L.
This course is designed to diagnose reading deficiencies and improve basic reading skills, primarily comprehension. This course is for students who already have a basic understanding of phonics and word analysis but who need additional work in building basic comprehension skills. This course will emphasize identifying the main idea and supporting details, improving factual recall, recognizing context clues, making inferences, and drawing conclusions. Vocabulary improvement will also be stressed. (2/04)

ENGL-80L READING TACTICS LABORATORY
1 unit: 3 hours lab.
Prerequisite: ENGL-90 or ESL-91. Two-way corequisite: ENGL-80. Advisory: Concurrent enrollment in ENGL-83. The reading lab is required of all students registered in ENGL-80. It is designed to improve reading skills by providing individualized assistance through a prescriptive program based on individual reading strengths and needs. (4/04)

ENGL-81 BASIC READING TACTICS II
3 units: 3 hours lecture.
Prerequisite: ENGL-80, 80L. Two-way corequisite: ENGL-81L. Advisory: Concurrent enrollment in ENGL-84. This class emphasizes comprehension and critical thinking skills at a pre-college reading level. This course is for students who need to work applying reading comprehension skills and critical reading/thinking skills to pre-college level reading materials. Instruction will focus on strategies used to build reading skills. (11/04)

ENGL-81L READING TACTICS LABORATORY
1 unit: 3 hours lab.
Prerequisite: ENGL-80, ENGL-80L. Two-way corequisite: ENGL-81L. Advisory: Concurrent enrollment in ENGL-84. The reading lab is required of all students registered in ENGL-81. It is designed to improve reading skills by providing individualized assistance through a prescriptive program based on individual reading strengths and needs. (4/04)

ENGL-83 BASIC WRITING I - SENTENCE TO PARAGRAPH
5 units: 5 hours lecture.
Prerequisite: ENGL-90 or ESL-94. Advisories: Concurrent enrollment in ENGL-80, ENGL-80L; concurrent enrollment in ENGL-85 is also recommended for non-native speakers. This course is devoted to developing competency in basic English grammar, sentence construction, and paragraph development. The student will have practice in constructing original sentences and paragraphs which demonstrate comprehension and application of basic grammatical concepts and patterns of standard English sentences and paragraphs. (2/04)

ENGL-83L SENTENCE STRUCTURE
1 unit: 3 hours lab.
Advisory: ENGL-83. This course is a laboratory experience to help students at developmental levels to improve their sentence structure. The program is basically self-paced. (4/04)

ENGL-84 BASIC WRITING SKILLS II - PARAGRAPH TO ESSAY
5 units: 5 hours lecture.
Prerequisite: ENGL-83. Advisory: Concurrent enrollment in ENGL-81. This course is devoted to developing competency in writing paragraphs and short essays by means of intensive practice in writing, including paragraph structure and development, focusing on short essays. (5/01)
ENGL-66L SPELLING
1 unit: 3 hours lab.
Advisory: ENGL-90 or ENGL-94B.
This course is designed to provide additional instruction or
reinforcement for students who have difficulty in spelling. This
course is generally tailored to the individual student's needs and
is basically self-paced. (4/04)

ENGL-87L VOCABULARY
1 unit: 3 hours lab.
Advisory: ENGL-90 or ESL-91.
This course is a laboratory experience to help students at
developmental levels to enlarge their vocabularies. This program
is basically self-paced. (4/04)

ENGL-89ABCD COMMUNICATION SKILLS LABORATORY
0.5 - 2 units: 1.5 - 6 hours lab.
Advisory: ENGL-80 or ENGL-83. (Note: The letter
designation indicates unit value, "A" being for 0.5 unit, "B"
for 1 unit, etc., in 0.5-unit increments.)
This course is a laboratory experience primarily to help students
who have taken a writing class but who still need additional work
before they progress to the next writing class. It is designed to
provide individualized assistance and assignments to improve
a student's deficient areas. The number of hours and the number
of assignments vary based on the units enrolled in. Each letter
(i.e., A, B, C, or D) may be taken only once. (4/04)

ENGL-90 BASIC LANGUAGE AND LEARNING SKILLS
4 units: 4 hours lecture.
Prerequisite/Advisory: None.
This course is to assist language skill development of students.
Instruction will place emphasis on phonics, fundamental reading
comprehension, and basic sentence writing skills. It will also
cover basic spelling and vocabulary skills. (2/00)

ENGLISH AS A SECOND LANGUAGE
(Developmental and Educational Studies)
This three-level ESL program helps students whose primary
language is not English to acquire the English language skills and
cultural awareness necessary to begin a program of study that
prepare them to succeed in college level courses. Separate
courses in grammar and linguistic competence, pronunciation,
and speaking, reading, and paragraph development prepare
students to enter developmental reading and writing classes and
do not count toward graduation. Because credit ESL courses
begin on an intermediate level, it is recommended that students
have three years of prior instruction in ESL, or speak, read, and
write English regularly in their daily lives.

ESL-85 HIGH-INTERMEDIATE ESL GRAMMAR II
3 units: 3 hours lecture.
Prerequisite: ESL-96.
This is the second part of a high-intermediate English grammar
course (ESL) for students whose native language is not English.
This course focuses on understanding time in compound and
complex sentences, adjective clauses, noun clauses and
conditionals. It introduces the coordinating and subordinating
conjunctions and transitions words. Use of the language lab to
complete some assignments may be required. It is
recommended that this course be taken concurrently with ENGL-
83. (12/02)

ESL-90 INTERMEDIATE ESL: READING
3 units: 3 hours lecture.
Advisories: Student has completed Non-credit ESL Level 5
or at least three years of the study of ESL/ELD in a high
school or adult school program; OR the student 1) has the
ability to use complete English sentences to carry on a
telephone conversation with a native speaker, 2) is able to
read English magazines and newspapers, and 3) is able to
write complete sentences (although they may have some
grammatical errors).
This is an intermediate reading course for students whose native
language is not English (ESL). This course focuses on strategies
for recognizing the main idea, topic sentence, and details in a
variety of contexts. It stresses using context to understand the
meaning of vocabulary, and presents the use of suffixes to
understand the functions of words. It is recommended that this
course be taken concurrently with ESL-93. (12/02)

ESL-91 HIGH-INTERMEDIATE ESL: READING
3 units: 3 hours lecture. Prerequisite: ESL-90.
This is a high-intermediate reading course for students whose
native language is not English (ESL). This course focuses on vocabulary
development, including word roots and affixes, and
reading strategies, including previewing, predicting, identifying
main ideas and details, inferences, outlines, and summaries. It
is recommended that this course be taken concurrently with ESL-
94. (12/02)

ESL-93 INTERMEDIATE ESL: WRITING
3 units: 3 hours lecture.
Advisories: Student has completed Non-credit ESL Level 5
or at least three years of the study of ESL/ELD in a high
school or adult school program; OR the student 1) has the
ability to use complete English sentences to carry on a
telephone conversation with a native speaker, 2) is able to
read English magazines and newspapers, and 3) is able to
write complete sentences (although they may have some
grammatical errors).
This is an intermediate writing course for students whose native
language is not English (ESL). Students will read short essays
and write about them. This course focuses on using a step-by-
step process to write well ordered paragraphs. It is
recommended that this course be taken concurrently with ESL-90
and ESL-95. Students may be required to use the language lab
a minimum of one hour per week. (12/02)

ESL-94 HIGH-INTERMEDIATE ESL: WRITING
3 units: 3 hours lecture.
Prerequisite: ESL-93. Advisories: ESL-90, ESL-95.
This is a high-intermediate writing course for students whose
native language is not English (ESL). Students will read short
essays and write about them. This course focuses on using a
step-by-step process to write well ordered paragraphs and short
essays that contain a variety of sentence structures. It is
recommended that this course be taken concurrently with ESL-91
and ESL-96. Students may be required to use the language lab
a minimum of one hour per week. (12/02)

ESL-95 INTERMEDIATE ESL GRAMMAR
3 units: 3 hours lecture.
Advisories: Student has completed Non-credit ESL Level 5
or at least three years of the study of ESL/ELD in a high
school or adult school program; OR the student 1) has the
ability to use complete English sentences to carry on a
telephone conversation with a native speaker, 2) is able to
read English magazines and newspapers, and 3) is able to
write complete sentences (although they may have some
grammatical errors).
This is an intermediate English grammar course (ESL) for students
whose native language is not English. Focusing on the
simple sentence, this course deals with five basic sentence
patterns. It also deals with nouns, pronouns, verb tense and
form, adjectives, and adverbs. Use of the language lab to
complete some assignments may be required. It is
recommended that this course be taken concurrently with
ESL-93. (12/02)
ESL-96 HIGH-INTERMEDIATE ESL GRAMMAR I
3 units: 3 hours lecture.
Prerequisite: ESL-95.
This is a high-intermediate English grammar course (ESL) for students whose native language is not English. This course focuses on the proper use of verb forms, phrasal verbs, passive voice, descriptive phrases, participles, gerunds and infinitives. Use of the language lab to complete some assignments may be required. It is recommended that this course be taken concurrently with ESL-94. (12/02)

ESL-98 ESL PRONUNCIATION AND SPEAKING
3 units: 3 hours lecture.
Advisories: Completion of non-credit ESL Level 5; or at least three years of the study of ESL/EFL in high school or adult school programs; or use complete English sentences to carry on a conversation with a native speaker while using the telephone, read English magazines and newspapers, and write complete sentences that may have some grammatical errors.
This is an intermediate level pronunciation and speaking course. In this course students will practice the consonant and vowel sounds as well as learn how stress and intonation affect a person’s ability to understand what is said. Students will use the pronunciation skills and vocabulary presented while practicing conversations on topics related to assigned readings. It is recommended that students take this course concurrently with ESL-93 Reading. Use of the language lab may be required. (12/02)

ENVIRONMENTAL TECHNOLOGIES
(Science, Math and Engineering Division)

ENTC-30 INTRODUCTION TO ENVIRONMENTAL TECHNOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course will provide the student with an overview of the history and effects of pollution, and an examination of the early legislation that was formulated in attempts to clean up the environment. The course provides students with an introduction to ecological principles and an overview of the biological effects on humans and other organisms of toxins and other pollutants. The course focuses on two approaches to resolving environmental issues, attacking the problems through the legal process by application of regulations and by use of scientific control and clean-up techniques through modern technology. This course will provide an introduction to the basic scientific principles as they relate to monitor pollution control equipment. Students will be introduced to techniques of monitoring and sampling the three regions of the environment and the importance of working toward compliance as guided by federal, state, and local regulations. (12/02)

ENTC-32 INDUSTRIAL PROCESSES AND WASTE STREAM MANAGEMENT
3 units: 3 hours lecture.
One-way corequisite: CHEM-02A.
Advisories: ENGL-A, ENGL-41; MATH-A or MATH-B.
In this course students will study a variety of processes used by the industry in the production of goods and the provision of services. Early legislation will be examined in its historical setting as the Federal government responded to ecological catastrophes in attempts to halt pollution and protect environmental systems. Treatment technologies will be examined as methods to reduce hazardous waste, and issues of pollution (P2) will be examined. Students will view industrial operations with visits to local manufacturing and waste reduction facilities. A minimum of four specific industries will be examined, following the process of conversion of raw materials into finished products with special attention to the generation of waste, and the Best Available Technology (BAT) for minimizing impact on air, land, and water resources. (3/06)

ENTC-34 HEALTH EFFECTS OF HAZARDOUS MATERIALS
3 units: 3 hours lecture.
This course covers the acute and chronic health effects produced by exposure to chemical, physical, and biological agents. Emphasis will be on those hazardous materials commonly associated with industrial operations, waste disposal, and remediation sites. Topics will include routes of entry, toxic effects, risk evaluation, permissible exposure limits, medical surveillance, control methods for reducing exposure, and understanding Material Safety Data Sheets (MSDS). (3/00)

ENTC-36 HAZARDOUS WASTE MANAGEMENT APPLICATIONS
4 units: 3 hours lecture, 3 hours lab.
Prerequisite: ENTC-30.
Advisories: BIOL-06; CHEM-02B; ENGL-A, ENGL-41.
This course provides an overview of hazardous waste regulation with emphasis in generator compliance, site investigation and remediation, permitting, enforcement, and liability. The lecture portion of the course explains the hazardous waste regulatory framework, introduces the student to the wide variety and types of environmental resources available, and develops research skills in the hazardous waste area. The laboratory portion of the course complements the lectures by providing hands-on application of regulations at the technician level. Proper methods of preparing a hazardous waste manifest, labeling of storage containers, sampling and analysis, preparing a Phase I Environmental Audit, and selecting environmental consultants are among the many skills developed in the laboratory. (3/00)

ENTC-38 SAFETY AND EMERGENCY RESPONSE
4 units: 3 hours lecture, 3 hours lab.
Prerequisites: ENTC-30, ENTC-34. Advisories: ENGL-A, ENGL-41.
This course is designed to provide students with hands-on instruction in safety and emergency response to chemical and physical exposures in industrial and field settings. Topics include: hazard analysis, contingency planning, housekeeping and safety practices, including proper use and selection of PPE, site control and evaluation, handling drums and containers, field sampling and monitoring, proper use of instruments, incident response planning, emergency response including field exercises in the use of PAPR and SCBA, and an understanding of the ICS system. This course, along with ENTC-34, satisfies the requirements for 40-hour employee training under OSHA[1910.120]. (4/00)

ENTC-40 HAZARDOUS MATERIALS MANAGEMENT APPLICATIONS
4 units: 3 hours lecture, 3 hours lab.
Prerequisite: ENTC-30.
Advisories: BIOL-06; CHEM-02B; ENGL-A, ENGL-41.
This course is a study of requirements and applications of federal, state, and local laws relating to hazardous materials. The course will emphasize compliance with Department of Transportation, OSHA Hazard Communication, SARA Title III Community Right-to-Know, Underground Tank, Asbestos, Proposition 65, and Air Toxics Regulations. The lecture portion of the course will provide the student with an understanding of the legal framework of hazardous materials laws; the laboratory portion will focus on applications of these laws, such as proper labeling, shipping and handling of hazardous materials, obtaining and interpreting MSDSs, permitting and monitoring functions, as well as planning and reporting functions. (3/00)
Merced College 2006-2007 Catalog

FIRE TECHNOLOGY
(Business Division)

FIRE-30 FIRE PROTECTION ORGANIZATION
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course provides an introduction to fire protection; career opportunities in fire protection and related fields; philosophy and history of fire protection; fire loss analysis; organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; and introduction to fire strategy and tactics. (11/04)

FIRE-31 FIRE BEHAVIOR AND COMBUSTION
3 units: 3 hours lecture.
One-way corequisite: FIRE-30.
Advisories: ENGL-A, ENGL-41.
This course presents the theory and fundamentals of how and why fires start, spread, and are controlled; an in-depth study of fire chemistry and physics; fire characteristics of materials; extinguishing agents; and fire control techniques. (11/04)

FIRE-32 FIRE PREVENTION TECHNOLOGY
3 units: 3 hours lecture.
One-way corequisite: FIRE-30.
Advisories: ENGL-A, ENGL-41.
This course provides fundamental information regarding the history and philosophy of fire prevention, organization and operation of fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationship of fire prevention with fire safety education and detection and suppression systems. (11/04)

FIRE-33 FIRE PROTECTION EQUIPMENT AND SYSTEMS
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course provides information relating to features of design and operation of fire detection and alarm systems, heat and smoke control systems, special protection and sprinkler systems, water supply for fire protection, and portable fire extinguishers. (11/04)

FIRE-34 BUILDING CONSTRUCTION FOR FIRE PROTECTION
3 units: 3 hours lecture.
One-way corequisite: FIRE-30.
Advisories: ENGL-A, ENGL-41.
This course is the study of components of building construction that relate to fire safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at fires. The development and evolution of building and fire codes will be studied in relationship to past fires in residential, commercial, and industrial occupancies. (11/04)

FIRE-35 FIREFIGHTING TACTICS AND STRATEGY
3 units: 3 hours lecture.
This course is a review of fire chemistry, equipment and manpower, basic firefighting tactics and strategy, methods of attack, and pre-planning. (11/04)

FIRE-36 HAZARDOUS MATERIALS
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course introduces the student to the world of hazardous chemicals including their physical properties, uses in industry, and characteristics when involved in spills, fires, and accidents. Basic information regarding emergency procedures, legal requirements, compliance to regulations, health effects and treatment, and fire department protocols and responsibilities are also covered. (11/04)

FIRE-37 FIRE HYDRAULICS
3 units: 3 hours lecture.
Prerequisite: FIRE-30. Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
This course is a basic review of mathematics, hydraulic laws and formulas, and water supply and pump requirements as applied to fire service. (11/04)

FIRE-38 FIRE APPARATUS AND EQUIPMENT
3 units: 3 hours lecture.
Prerequisite: FIRE-30. Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83.
This course pertains to driving laws and driving techniques, and the construction and operation of pumping engines, ladder trucks, aerial platforms, specialized equipment, and apparatus maintenance. (11/04)

FIRE-39 FIRE COMPANY ORGANIZATION AND PROCEDURE
3 units: 3 hours lecture.
This course is a review of fire department organization, fire company organizations, the company officer, fire equipment, maintenance training, fire prevention, firefighting, company firefighting capability, and records and reports. (11/04)

FIRE-47A FIRE INVESTIGATION - IA
2 units: 40 total hours lecture.
Prerequisite: FIRE-47A. Advisories: ENGL-A, ENGL-41.
This course is an introduction to arson, laws related to arson, types of incendiary fires, and methods of determining fire cause and recognizing and preserving evidence. A special emphasis will be placed on report-writing techniques. (12/04)

FIRE-47B FIRE INVESTIGATION - IB
2 units: 40 total hours lecture.
Prerequisite: FIRE-47A. Advisories: ENGL-A, ENGL-41.
This course covers evidence related to arson and fire deaths, interviewing, and interrogating. Investigation of structure, wildland, and vehicle fires are covered as well as fire scene documentation; search and seizure laws are also covered. (12/04)

FIRE-49A-ZZ SPECIAL PROBLEMS IN FIRE TECHNOLOGY
0.5 - 4 units: 0.5 - 4 hours lecture, 0 - 12 hours lab.
Prerequisite: FIRE-30. Advisory: ENGL-84.
This course is designed to address special topics in fire technology to meet current needs of students. The course will allow pre-service and in-service personnel to maintain the most current training standards in the field. (12/04)
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIRE-61</td>
<td>EMT 1 - NA/FS - EMERGENCY MEDICAL TECHNICIAN I NON-AMBULANCE/FS</td>
<td>5</td>
<td>This course is designed to prepare fire service personnel to render pre-hospital basic life support services under field emergency conditions, and to extricate and transport victims to an acute care hospital. In contrast to other EMS Authority-approved programs, the EMT-1 NA/FS program emphasizes those skills most used in the fire service, including extrication skills. (12/04)</td>
</tr>
<tr>
<td>FIRE-63A</td>
<td>BASIC FIREFIGHTER I, ACADEMY</td>
<td>8</td>
<td>This course provides manipulative and technical training in basic concepts of fire department organization, miscellaneous equipment and tools, fire behavior and extinguishment theory, fire fighter safety, self-contained breathing apparatus, and portable fire extinguishers. The course also provides training in ropes, knots, hitches, hoses, nozzles, appliances, ground ladders, forcible entry, and confined space rescue. The student is responsible for obtaining an EMT or first responder rating. Students must supply instructor-approved personal protective equipment (required instructional material). (11/02)</td>
</tr>
<tr>
<td>FIRE-63B</td>
<td>BASIC FIREFIGHTER I, ACADEMY</td>
<td>8</td>
<td>This course provides manipulative and technical training in basic concepts of ventilation, fire control, salvage and overhaul operations, fire protection water systems, fire protection systems, fire prevention and investigation, communications, vehicle extrication, wildland fire fighting, urban interface, and hazardous materials. The student is responsible for obtaining an EMT or first responder rating. Students must supply instructor-approved personal protective equipment (required instructional supply). (11/02)</td>
</tr>
<tr>
<td>FIRE-64</td>
<td>BASIC FIREFIGHTER II, ACADEMY</td>
<td>4</td>
<td>The Firefighter II course emphasizes inspection and maintenance of fire department stations and equipment, laws and regulations of fire service, fire prevention, fire characteristics, water supplies, apparatus and equipment inspection, and the use of apparatuses and heavy equipment. (12/04)</td>
</tr>
<tr>
<td>FIRE-65C</td>
<td>WILDLAND FIREFIGHTING STRATEGY AND TACTICS</td>
<td>1</td>
<td>This course stresses the fundamentals of initial-attack wildland firefighting and how to apply wildland firefighting strategy and tactics during the suppression effort. The course also includes live fire control. Students must have instructor-approved fire protective gear. (12/04)</td>
</tr>
<tr>
<td>FIRE-65D</td>
<td>WILDLAND FIREFIGHTING CONTROL</td>
<td>3</td>
<td>This course provides fundamental principles of wildland fire control and management. Topics to be covered include firefighter safety, wildland fire behavior, strategy and tactics, wildland-urban intermix fires, the Incident Command System, and large fire organization. Special attention will be focused on the role fulfilled by individual engine companies during fire control operations. (12/04)</td>
</tr>
<tr>
<td>FIRE-65E</td>
<td>INTRODUCTION TO HAZARDOUS MATERIALS AWARENESS</td>
<td>0.5</td>
<td>This course is a general introduction to hazardous materials awareness with emphasis on placards, identification and recognition, decision-making in emergencies, detecting hazardous materials presence, and estimating the likely harm without intervention. (12/04)</td>
</tr>
<tr>
<td>FIRE-65F</td>
<td>HAZARDOUS MATERIALS – FIRST RESPONDER OPERATIONS (HAZ MAT PRO)</td>
<td>1</td>
<td>This course covers how hazardous materials can harm people, the environment, and property, and how the first responder may use clues to recognize a hazardous materials incident and implement actions to protect themselves and the public. (11/05)</td>
</tr>
<tr>
<td>FIRE-65G</td>
<td>FIRST RESPONDER OPERATIONS – DECONTAMINATION (DECON FRO)</td>
<td>0.5</td>
<td>This course covers how to safely and competently perform “Fully/Primary” decontamination in at least “Level B” personal protective equipment based on agency or generic Decon SOP. This course builds upon FRO competencies to perform decontamination functions within the contamination reduction zone. (11/05)</td>
</tr>
<tr>
<td>FIRE-66A</td>
<td>VOLUNTEER FIREFIGHTER BASIC SKILLS</td>
<td>2.5</td>
<td>This course provides the firefighter with basic knowledge of fire behavior and control and basic skills to safely perform essential fire ground tasks with minimal supervision. Students must supply instructor-approved personal protective equipment (a required instructional supply). (12/04)</td>
</tr>
</tbody>
</table>
FIRE-66D EQUIPMENT OPERATOR FOR VOLUNTEER FIREFIGHTERS
2 units: 2 hours lecture.
Prerequisite: FIRE-30 or current volunteer, paid call, or seasonal or full-time firefighter for a certified fire protection department. Advisory: ENGL-84. Limitations on enrollment: Full-time firefighter or minimum of one continuous year as a paid-call firefighter. valid California Class B (commercial or firefighter) permit with tank and air brake endorsements. If the student has a commercial California Driver’s License, it must indicate manual transmission and have a current health questionnaire.
This course provides the firefighter with basic knowledge of radio communications use regarding size-up and report conditions. Forms and reports related to operating equipment and incidents are covered as well as emergency equipment placement, and strategy and tactics for structure, wildland, and vehicle fires. Auto extrication and defensive driving and pump theory are included. (12/04)

FIRE-67A ROPE RESCUE
1 unit: 1 hour lecture.
Prerequisite: FIRE-30. Advisory: ENGL-84.
This course is designed to introduce the novice to the basics of equipment nomenclature, rope design and construction, care and maintenance, and knots and webbing as they apply to rope rescue emergencies. (12/04)

FIRE-67B AUTO EXTRICATION
0.5 unit: 0.5 hours lecture.
Advisories: ENGL-A, ENGL-41; FIRE-30 or currently a paid call, seasonal, or full-time firefighter.
This course provides classroom instruction of vehicle rescue concepts. It introduces students to common vehicle rescue tools and hands-on practice of basic techniques used to free persons entrapped in vehicles as a result of traffic collisions. To successfully complete the skills portion, students must have the ability to lift tools that may weigh in excess of 50 pounds and perform other rigorous physical tasks. Students must supply instructor-approved personal protective equipment (required instructional material) equivalent to that of a structural firefighting ensemble. This shall, at a minimum, include a helmet with face shield and/or goggles, leather gloves, turnout coat and pants, and turnout boots (or steel-toed lace-up leather boots at least 8” in height with lugged soles). This course is repeatable three times. (11/05)

FIRE-68B BASIC INCIDENT COMMAND SYSTEM (I-200)
1 unit: 1 hour lecture.
Limitation on enrollment: Student must have instructor-verified ICS (I-100) completion.
This course is designed for the entry-level and veteran firefighter. The subject matter relates to principles and features of ICS, organization, incident facilities, incident resources, and responsibilities associated with ICS assignments. (12/04)

FIRE-68C INCIDENT COMMAND SYSTEM - INTERMEDIATE (I-300)
1.5 units: 1.5 hours lecture.
Prerequisite: FIRE-68B. Advisory: ENGL-84.
The subject matter relates to organization and staffing for incidents or events, incident resources management, air operations, and incident event planning. (12/04)

FIRE-68D ADVANCED INCIDENT COMMAND SYSTEM (I-400)
2 units: 2 hours lecture.
Prerequisite: FIRE-68C. Advisories: ENGL-A, ENGL-41.
This is an advanced course in Incident Command System. (01/05)

FIRE-69A FIRST RESPONDER
2.5 units: 2.5 hours lecture.
Prerequisite: FIRE-30 or currently a paid call, seasonal, or full-time firefighter. Advisories: ENGL-A, ENGL-41.
This course is designed to meet the state requirements for emergency medical personnel. The course relates to patient assessment, cardiovascular systems, fractures, splinting, childbirth, and environmental emergencies. (11/05)

FIRE-69B FIRST RESPONDER RE-CERTIFICATION
1.5 units: 1.5 hours lecture.
Prerequisite: FIRE-69A. Limitation on enrollment: Must possess a current valid CPR card in Basic Life Support of Health Care Providers (or equivalent) as outlined by the American Heart Association. Advisory: ENGL-84.
This course is designed to meet the state re-certification requirements for emergency medical personnel. The course relates to patient assessment, cardiovascular systems, fractures, splinting, childbirth, and environmental emergencies. This course may be repeated three times. (12/04)

FIRE-70 FIRE DEPARTMENT ADMINISTRATION
3 units: 3 hours lecture.
Prerequisite: FIRE-30 or current volunteer, paid call, or seasonal or full-time firefighter for a certified fire protection department. Advisory: ENGL-84.
This course is designed to cover all subject matter necessary to organize and administer a fire department. (12/04)

FIRE-71A FIRE INSTRUCTOR I -- MODULE A
2 units: 40 total hours lecture.
Prerequisite: FIRE-30 or current volunteer, paid call, or seasonal or full-time firefighter for a certified fire protection department.
Advisory: ENGL-84.
This course is designed for the fire company officer who conducts in-service training programs. The course provides a variety of methods and techniques to help personnel select, develop, and organize material for in-service programs. Methods of evaluation and opportunity to apply the major principles of learning through demonstrations are stressed. The course is certified by the office of the California State Fire Marshal. (12/04)

FIRE-71B FIRE INSTRUCTOR I -- MODULE B
2 units: 2 hours lecture.
Prerequisite: FIRE-71A.
This course is designed for the fire company officer who conducts in-service training programs. The course provides instruction in the use of visual aids, test construction, and teaching demonstrations. The successful completion of this course and the State Fire Marshal’s examination will result in State certification. (12/04)

FIRE-72A FIRE COMMAND I -- MODULE A
2 units: 40 total hours lecture.
Prerequisite: FIRE-35. Advisory: ENGL-84.
This course is designed to provide the fire company officer with information and experience in command and control techniques at the scene of an emergency. (12/04)

FIRE-72B FIRE COMMAND I -- MODULE B
2 units: 40 total hours lecture.
Prerequisite: FIRE-72A. Advisories: ENGL-A, ENGL-41.
This course is designed to provide the fire company officer with information and experience in command and control techniques at the scene of a hazardous materials emergency. (12/04)
FIRE-73A FIRE PREVENTION I -- MODULE A
2 units: 40 total hours lecture.
Prerequisite: FIRE-30 or current volunteer, paid call, or seasonal or full-time firefighter for a certified fire protection department.
Advisory: ENGL-84.
This course will provide instruction in basic fire prevention management for company officers and fire prevention personnel. It will teach the response to a variety of fire prevention situations in a professional and effective manner. The course will prepare first-level fire officers to deal with responsibilities of fire prevention in his/her jurisdiction. (12/04)

FIRE-73B FIRE PREVENTION I -- MODULE B
2 units: 40 total hours lecture.
Prerequisite: FIRE-73A, Advisory: ENGL-84.
This course will provide instruction in basic fire prevention management for company officers and fire prevention personnel. It will teach the response to a variety of fire prevention situations in a professional and effective manner. The course will prepare first-level fire officers to deal with responsibilities of fire prevention in his/her jurisdiction. (12/04)

FIRE-75 FIRE MANAGEMENT I
2 units: 40 total hours lecture.
Prerequisite: FIRE-30 or current volunteer, paid call, or seasonal or full-time firefighter for a certified fire protection department. Advisory: ENGL-84.
This course will provide instruction to improve the student's managerial effectiveness and will require demonstration of growth and development in the use of managerial skills. The course will stress resource identification and utilization. (12/04)

FIRE-76A FIRE APPARATUS DRIVER/OPERATOR 1A (EMERGENCY VEHICLE OPERATIONS)
2 units: 40 total hours lecture.
Prerequisites: FIRE-63A, FIRE-63B. Advisory: ENGL-A, ENGL-41.
Limitations on enrollment: Must possess a valid California Drivers License, Class B, firefighter restricted (minimum); must be physically fit per department standards; must not have a hearing loss of 25 decibels or more in 3 of 4 frequencies; must have vision better than, or corrected to, far visual acuity of 20/30 with contact lenses or spectacles; and must be a paid call, volunteer, or full-time firefighter at a certified fire protection agency.
This course will provide fire service personnel with knowledge of the laws and requirements that pertain to emergency vehicle operation, basic maintenance and troubleshooting, and documentation of fire apparatus. (1/05)

FIRE-76B FIRE APPARATUS DRIVER/OPERATOR 1B (EMERGENCY VEHICLE OPERATIONS)
2 units: 40 total hours lecture.
Prerequisite: FIRE-76A. Advisors: ENGL-A, ENGL-41; MATH-83.
Limitations on enrollment: Must possess a valid California Drivers License, Class B, firefighter restricted (minimum); must be physically fit per department standards; must not have a hearing loss of 25 decibels or more in 3 of 4 frequencies; must have vision better than, or corrected to, far visual acuity of 20/30 with contact lenses or spectacles; and must be a paid call, volunteer, or full-time firefighter at a certified fire protection agency.
This course will provide fire service personnel with information on pump construction, theory of pump operation, and methods of performing basic hydraulics. Further, students will receive information and techniques on basic inspections, documentation, maintenance, and troubleshooting fire pumps. This course will provide fire service personnel with the knowledge of the laws and requirements that pertain to emergency vehicle operation and basic maintenance, troubleshooting, and documentation of fire apparatus. (1/05)

FRENCH (Humanities Division)
FREN-01 ELEMENTARY FRENCH
(CSU breadth area C2) 5 units: 5 hours lecture.
Advisory: ENGL-84.
FREN-01 is an introduction to the basics of modern French: understanding the spoken word, speaking, reading, and writing. Students will learn standard French pronunciation. They will be given instruction and grammar and idiomatic usage and will study various aspects of Francophone culture such as history, literature, art, music, painting, and architecture. (4/00)

FREN-02 ELEMENTARY FRENCH
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: FREN-01.
FREN-02 will provide a review of grammar studied in FREN-01 and will introduce additional basics of modern French grammar and idiomatic usage. Students will continue to increase skill in understanding the spoken word, speaking, reading, and writing. Students will gain further understanding of Francophone culture through reading selected materials, watching videos, and listening to cassettes and CDs. (4/00)

FREN-03 INTERMEDIATE FRENCH
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: FREN-02.
FREN-03 is a continuation of FREN-02. It offers an intensive review of grammar basics and introduces additional verbal and other grammatical structure. Students in this intermediate class will increase their understanding of the spoken word, and will advance in their ability to speak, read, and write modern French. They will study various aspects of Francophone culture such as history, literature, art, music, painting, and architecture. (4/00)

FREN-04 INTERMEDIATE FRENCH
5 units: 5 hours lecture.
Prerequisite: FREN-03.
FREN-04 is a continuation of FREN-03. This is an intermediate course in modern French which offers instruction in more difficult grammatical and idiomatic usages and more challenging culture content. (4/00)

FREN-39 ADVANCED FRENCH
1 unit: 3 hours lab. Prerequisite: FREN-03.
This course is designed to acquaint the advanced student with specific items of French language, literature, and culture, including history, political thought, and sociological change. Papers will be written which will enforce knowledge of these areas and critical analysis of current French intellectual and social thinking. May be repeated three times. (4/00)
regions will enable the student to better understand contemporary world problems and potentials. (5/03)

**GEOG-30 GEOGRAPHY OF CALIFORNIA**
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This is a survey course of California's physical regions and cultural and economic patterns. The development of the state's varied landscapes as they have occurred in recent history will be covered. The dynamic utilization of unique resources by ambitious settlers will be presented as a lesson in developmental geography. (11/99)

**GEOLOGY**
(Science, Math and Engineering Division)

**GEOL-01 PHYSICAL GEOLOGY (CAN GEOL 2)**
(CSU breadth area B1/B3) 4 units: 3 hours lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41.
This is a beginning course in geology stressing the beneficial and destructive forces of nature and their causes. The course includes a study of the development of landscapes, origin of minerals and rocks, geologic work of ground water, the phenomena of earthquakes, volcanism, metamorphism, and other fundamental concepts of geology. Lab work includes the identification and study of rocks and minerals, study of topographic and geologic maps and aerial photographs, and an introduction to cross-section and profiles of topographic maps. (2/01)

**GEOL-02 HISTORICAL GEOLOGY**
3 units: 3 hours lecture.
Prerequisite: GEOL-01. Advisories: ENGL-A, ENGL-41.
This course covers the geological history of the earth and the development of plant and animal life as traced through rock and fossil records. The correlation between geologic changes through time and the formation of economic mineral deposits is emphasized throughout the course. (2/02)

**GERMAN**
(Humanities Division)

**GERM-01 ELEMENTARY GERMAN**
(CSU breadth area C2) 5 units: 5 hours lecture.
Advisory: ENGL-84.
This is a beginner's course. The course will focus on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in German the most basic functions of everyday life. (11/03)

**GERM-02 ELEMENTARY GERMAN**
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: GERM-01 or two years of high school German. GERM-02 is a continuation of GERM-01. This course will focus on the further development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in German basic functions of everyday life. (11/03)

**GERM-03 INTERMEDIATE GERMAN**
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: GERM-02. Advisory: LRNR-30.
GERM-03 is a continuation of GERM-02. This course reviews and further develops grammatical concepts introduced in GERM-01 and GERM-02, as well as introduces the student to new concepts. Through varied readings, composition, and discussion, the student will increase his or her vocabulary and cultural knowledge. (11/03)
GERM-04 INTERMEDIATE GERMAN  
5 units: 5 hours lecture.  
Prerequisite: GERM-03. Advisory: LRNR-30.  
This course is a review of the fundamentals of reading, writing, speaking, and understanding German, designed to aid the student in preparing for advanced studies in German composition, grammar, and conversation, as well as literature in German, history, and culture. (11/03)

GERM-39 ADVANCED GERMAN  
1 unit: .5 hour lecture, 1.5 hours lab.  
Prerequisite: GERM-04. Advisory: LRNR-30.  
This course is designed to acquaint the advanced student with specific items of the German language, literature, and culture, including history, political thought, and sociological change. The student will engage in activities that will reinforce knowledge of these areas and critical analysis of current German intellectual and social thinking. This course may be repeated three times. (9/04)

GUIDANCE  
(Guidance Division)

GUID-30 FOUNDATIONS AND STRATEGIES FOR COLLEGE SUCCESS  
(CSU breadth area E) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This comprehensive course integrates the cultivation of skills, values, and attitudes indicative of confident, capable students/individuals with problem solving and critical/creative thinking. The course focuses on the following topics: life management, goal setting, career decision making, educational planning, college expectations and opportunities, instructor-student relationships, cultural diversity, lifestyle choices affecting health maintenance, stress management, campus resources, learning styles and strategies, and study skills. This course is recommended for all new students. (10/03)

GUID-47 CAREER GUIDANCE  
0.5 unit: 9 total hours lecture.  
Prerequisite/Advisory: None.  
This is an introductory course in career planning for high school students. The importance of post-secondary education will be explained and various options will be introduced. Students will develop an understanding of a wide assortment of career information resources, both written and computer-assisted. This course is offered on a credit/no credit basis. (2/98)

GUID-48 LIFE AND CAREER PLANNING  
3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This is a structured sequential course in life and career planning. Experiences are provided that encompass education, occupation, and job trends. The total individual is explored; issues such as life roles, values, goals, life styles, preferences, coping skills, and personal barriers as they relate to decisions will be covered. (4/03)

GUID-48A CAREER SELF-ASSESSMENT  
1 unit: 1 hour lecture.  
Advisory: ENGL-A.  
In this course students will learn to appraise their self-esteem, values, skills and personality, and understand the implication of these factors in the selection of a vocational/educational goal. (4/03)

GUID-48B CAREER RESEARCH  
1 unit: 1 hour lecture.  
Advisory: ENGL-A.  
Research is a necessary component in career decision making. In this course the student will develop an understanding of a wide assortment of career information resources, both written and computer-assisted. The focus of the course is to introduce the student to the use of the most recent career-related technologies. (4/03)

GUID-48C EMPLOYMENT SEARCH AND READINESS SKILLS  
1 unit: 1 hour lecture.  
Advisory: ENGL-A.  
In this course the student will be introduced to the importance and preparation of job applications, resume types, cover letters, interviewing techniques, and other strategies for successfully obtaining employment. (4/03)

GUID-49A-ZZ SPECIAL TOPICS IN GUIDANCE  
0.5 - 3 units: 0.5 - 3 hours lecture, 0-9 hours lab.  
Advisory: ENGL-A.  
This course is designed to address special topics in guidance to meet the needs of students. Specific classes will be offered to help students understand and develop personal, social, and academic skills useful in the educational environment. (11/05)

GUID-52 COLLEGE SUCCESS STRATEGIES FOR STUDENT ATHLETES  
3 units: 3 hours lecture.  
Advisories: ENGL-81, ENGL-84.  
This course provides the student athlete with an opportunity to cultivate the skills, values, and attitudes necessary to become a confident, capable, and successful student and athlete. The student will identify his/her educational and athletic goals and will develop an appropriate plan for achieving those goals. Through learning and study strategy inventories the student will assess his/her attitude, motivation, time management skills, basic study skills, test anxiety, etc. Each student will develop an individualized action plan to remediate problem areas. Students will examine the roles of procrastination, self-responsibility, and multiple intelligences and will be introduced to various problem solving and decision-making strategies. Appropriate classroom behavior and personal conduct will be stressed and behavior modification techniques will be studied. National Collegiate Athletic Association and National Association for Intercollegiate Athletics eligibility and transfer rules will be discussed, as will the California Community College athletic eligibility rules. This course is strongly recommended for all student athletes. (11/05)

GUID-54 FOUNDATIONS AND STRATEGIES FOR ACADEMIC RECOVERY  
3 units: 3 hours lecture.  
Advisories: ENGL-81, ENGL-81L, ENGL-84.  
This course is appropriate for students wishing to improve their academic standing. In this course the students will have an opportunity to cultivate the skills, values, and attitudes necessary to become confident, capable students. Each student will identify his/her educational goal and develop an appropriate plan for achieving that goal. Using a learning and study strategies inventory, each student will assess his/her attitude, motivation, time management skills, test anxiety, etc., and will develop an action plan to remediate problem areas. Students will examine the roles of procrastination, multiple intelligences, self-responsibility and health and wellness related to academic success. Academic policies will be addressed and strategies to get off and stay off probation, such as informed decision-making, problem-solving, and classroom behavior. Behavior modification will also be studied. This course is recommended for all students on academic and/or progress probation. (11/03)
GUID-70A-ZZ SPECIAL TOPICS IN GUIDANCE
0.5 - 3 units: 0.5 - 3 hours lecture, 0-9 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is designed to address specific topics in guidance to meet the needs of students. Specific classes will be offered to help students understand and develop personal, social, and academic skills useful in the educational environment. (11/05)

GUID-80 COLLEGE SURVIVAL
1 unit: 1 hour lecture.
Advisories: ENGL-80, ENGL-83.
College Survival is a course designed to increase the student's success in college and employment by assisting the student in obtaining information and skills necessary to reach his/her educational or employment objectives. (12/05)

HEALTH
(Life Fitness and Health Division)
HLTH-10 CONTEMPORARY HEALTH
(CSU breadth area E) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course surveys the human condition from birth to death. Emphasis is placed on the impact of personal choice throughout life. Mental health, stress, alcohol, drugs, tobacco, disease processes, nutrition, fitness, sexuality, aging, environmental issues, and other related topics are studied and examined. The student is challenged to assume responsibility for his or her own health, well being, and lifestyle. (4/01)

HLTH-11 ADVANCED FIRST AID AND EMERGENCY CARE
3 units: 3 hours lecture.
Advisory: ENGL-84.
This is a class designed to teach theory and practice in the techniques of administering first aid to victims of accidents and illness. This class fulfills requirements for Advanced First Aid and Emergency Care, Red Cross Certificates, and CPR Certification. (3/00)

HLTH-15 DRUGS, ALCOHOL, AND TOBACCO
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course will give students a basic understanding of the psycho-physiological effects of drugs, alcohol, and tobacco. Included in the study will be use patterns, individual and societal problems that arise from abuse, and the medicinal effects. Personal coping skills will be included that can help individuals develop drug-free lifestyles. (3/00)

HLTH-16 HEALTH EDUCATION
1 unit: 1 hour lecture.
Advisory: ENGL-A.
This course covers the basics of physiological and sociological effects of alcohol, tobacco, narcotics, and drug use. Basic nutrition will also be covered. (1/06)

HISTORY
(Social Science Division)
HIST-04A HISTORY OF CIVILIZATION: PART I
(CSU breadth area C2/D6) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course provides a broad historical survey of mankind's social, political, and intellectual experiences for all major world civilizations from pre-history through approximately 1650. (11/02)

HIST-04B HISTORY OF CIVILIZATION: PART II (CAN HIST 4)
(CSU breadth area C2/D6) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course provides a broad historical survey of humanity's social, political, economic and intellectual experiences for all major world civilizations from the 17th century to the present. (2/06)

HIST-05 HISTORY OF EUROPE SINCE 1901
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
HIST-05 is a one-semester survey course on 20th century Europe. The political, economic, cultural, and social development of 20th century Europe will be covered. There will be emphasis on the traumatic changes brought about by political realignment, colonialism, war, revolution, and economic upheaval. (9/99)

HIST-08A HISTORY OF THE AMERICAS PART I: PREHISTORY TO INDEPENDENCE
(CSU breadth area C2/D6) 3 units: 3 hours lecture.
Advisories: ENGL-A; LRNR-30; PHIL-10.
This course provides a broad historical survey of Latin America from pre-history to independence. The course covers pre-Columbia Amerindian civilizations and cultures; Iberian background, New World conquests, and New World occupation; and colonial development of Latin America’s Hispanic cultures and institutions. (12/03)

HIST-08B HISTORY OF THE AMERICAS PART II: INDEPENDENCE TO THE PRESENT
(CSU breadth area C2/D6) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; LRNR-30; PHIL-10.
This course provides a broad historical survey of modern American nations with emphasis on Latin America from 1821 to the present. Special emphasis is given to the political evolution of these nations and the social and economic institutions that characterize the region. (2/06)

HIST-09A INTRODUCTION TO EAST ASIAN CIVILIZATION: CHINA
(CSU breadth area C2) 3 units: 3 hours lecture.
Advisories: ENGL-A; LRNR-30; PHIL-10.
This course provides a broad historical survey of China, the Far East's oldest civilization, from prehistoric times to the present, with emphasis on China's cultural achievements and contributions to both Eastern and Western civilizations. (12/03)

HIST-09B INTRODUCTION TO EAST ASIAN CIVILIZATION: JAPAN
(CSU breadth area C2) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course provides a broad historical survey of Japan from prehistoric times to the present. The course includes the study of traditional and modern Japan's significant institutions, cultural achievements, and contributions to both Eastern and Western civilizations. (10/99)

HIST-17A UNITED STATES HISTORY AND UNITED STATES CONSTITUTION (CAN HIST 8)
(CSU breadth area C2/D6) 3 units: 3 hours lecture.
Advisories: ENGL-01A, ENGL-41.
This is an extensive survey course of United States history from the period of exploration to the Reconstruction Period. The course covers the social, political, economic, and constitutional development of the nation. (4/05)
HIST-17AH HONORS UNITED STATES HISTORY AND UNITED STATES CONSTITUTION
(CSU breadth area C2/D6) 3 units: 3 hours lecture. Limitation on enrollment: Enrollment in the Honors Program. (See the college catalog for a description of enrollment requirements.)
Advisories: ENGL-01A, ENGL-41; PHIL-13H/ENGL-13H.
This course presents in-depth the historical background and development of American institutions and ideals. (11/03)

HIST-17B UNITED STATES HISTORY AND CALIFORNIA STATE AND LOCAL GOVERNMENT (CAN HIST 10)
(CSU breadth area C2/D6) 3 units: 3 hours lecture. Advisories: ENGL-01A, ENGL-41.
This course is a political and social history of American society to the Reconstruction Period. HIST-80B covers the period from the discovery of America to the Reconstruction. (09/99)

HIST-17BH HONORS UNITED STATES HISTORY AND CALIFORNIA STATE AND LOCAL GOVERNMENT
(CSU breadth area C2/D6) 3 units: 3 hours lecture. Limitation on enrollment: Enrollment in the Honors Program. (See the college catalog for a description of enrollment requirements.)
Advisories: ENGL-01A, ENGL-41; PHIL-13H/ENGL-13H.
This course provides a broad historical survey of social, political, and economic developments from the discovery of America to the Reconstruction. (11/99)

HIST-21 THE HISTORY OF MINORITIES IN AMERICA -- ETHNIC GROUPS, 19th CENTURY TO PRESENT
3 units: 3 hours lecture. Advisories: ENGL-01A, ENGL-41.
This course surveys the historical and legal position of ethnic groups 1800 to the present in America. Emphasis is placed on the role of minorities in American society, the development of ethnic identity, and the contributions of minority Americans. (1/06)

HIST-22 HISTORY OF MINORITIES -- BLACK EMPHASIS
(CSU breadth area D3/D6) 3 units: 3 hours lecture. Advisories: ENGL-A; LRNR-30; PHIL-10.
This course is a political and social history of American society and culture as seen from the Black perspective. It is a survey course covering the period from 1600 to the present. This course presents in-depth the historical background and development of American institutions and ideals. (11/03)

HIST-23 THE HISTORY OF HISPANIC-AMERICANS IN THE SOUTHWEST U.S.
(CSU breadth area D6) 3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course is an introduction to the history of the Mexican-American, and is designed to examine the contributions of Hispanics to the U.S. Emphasis will be placed upon the exploration, settlement, and ideology of Hispanics throughout the U.S. The course has pragmatic and relevant historical coverage that includes pre-Columbian to Hispanic civil rights movements. (9/99)

HIST-24 HISTORY OF THE NATIVE AMERICAN
3 units: 3 hours lecture. Advisories: ENGL-01A, ENGL-41.
This course is an ethnic historical survey of Native Americans. Special emphasis will be placed on major Native American groups, the impact of European contact, social-cultural patterns and organizations, government policies, reservation status, Native American contributions to the development of American societies, and contemporary issues and problems. (1/06)

HIST-29 HISTORY OF CALIFORNIA
(CSU breadth area D6) 3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-41.
This course surveys the historical development of California from pre-Columbian Indians through Spanish, Mexican, and American rule to the present. (11/02)

HIST-39A THE BASIC HISTORY OF HISPANIC-AMERICANS IN THE SOUTHWESTERN UNITED STATES
3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L; HIST-29.
This course surveys the historical development of California from pre-Columbian Indians through Spanish, Mexican, and American rule to the present. (11/02)

HIST-39ABC EXPLORING CALIFORNIA'S PAST: PRE-EUROPEAN CONTACT TO THE 20th CENTURY
1 unit: 18 total hours Internet/MC computer laboratory assigned activity. Advisories: ENGL-A; LRNR-30.
“Exploring California’s Past” is a series of three one-unit six-week Internet courses surveying California’s history from before European contact to the 20th century. HIST-39A explores California’s peoples, cultures, and historical developments from before European contact through the Mexican-American War; HIST-39B, the Gold Rush to the completion of the transcontinental railroads; and HIST-39C, the 1870s through World War II. The course requires Internet literacy and actual visits to California historic sites. (2/99)

HIST-40ABCD CALIFORNIA FIELD STUDIES
0.5 - 1 unit: 0 - 9 hours total lecture, 0 - 27 hours lab. Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L; HIST-29.
This course consists of weekend field studies of specific California historical sites. (12/99)

HIST-51A BASIC AMERICAN HISTORY
3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course provides a broad historical survey of social, political, and economic developments from the discovery of America to the Reconstruction. (11/99)

HIST-51B BASIC AMERICAN HISTORY
3 units: 3 hours lecture. Advisory: ENGL-84.
This course provides a broad historical survey of social, political, and economic developments from the Reconstruction to the present. (11/99)

HIST-80A BASIC AMERICAN HISTORY
3 units: 3 hours lecture. Prerequisite/Advisory: None.
This course is a basic American history course for non-transfer students. HIST-80A includes the period from the discovery of America to the Reconstruction Period. HIST-80B covers the period from Reconstruction to the present. (11/99)

HIST-81A THE BASIC HISTORY OF HISPANIC-AMERICANS IN THE SOUTHWESTERN UNITED STATES
3 units: 3 hours lecture. Advisories: ENGL-80, ENGL-83.
This course provides a basic historical survey of the Southwestern area of the United States from early Indian times to the Mexican-American War. The course emphasizes the developments and contributions of the area’s Indian cultures to Spanish America and Mexico. (12/99)
HIST-81B THE BASIC HISTORY OF HISPANIC-AMERICANS IN THE SOUTHWESTERN UNITED STATES
3 units: 3 hours lecture.
Advisories: ENGL-80, ENGL-83; HIST-81A.
This course provides a basic historical survey of the Southwestern area of the United States from the Mexican-American War to the present. The course emphasizes the economic, political, and social developments of this area as seen from the Hispanic-American cultural perspective. (12/99)

HMONG
(Humanities Division)
HMNG-01 ELEMENTARY HMONG
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: HMNG-01.
Study includes the fundamentals of pronunciation, audio-lingual training, and phonology; syllabication; appreciation of basic elements of the Hmong culture; use of the most frequent words in Hmong; basic sentences in conversation; reading and mastery of verb forms; practical vocabulary through conversation and practice in class and at home; and elementary composition. (2/00)

HMNG-02 ELEMENTARY HMONG
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: HMNG-01.
This course is a continuation of HMNG-01. The focus will be on the further development of listening, speaking, reading, and writing in a cultural context. There will be intensive use of Hmong grammar, written composition, and oral communication. Selections from Hmong literature and history will be read and discussed in Hmong. Stress is given to reading, writing, speaking, and understanding Hmong as these communication skills apply to practical situations. (1/02)

HUMANSITIES
(Humanities Division)
HNRS-39 CREATIVE LEADERSHIP
1 unit: 1 hour lecture.
The nature of being human, in ALL its potential, is exemplified by an individual that has solved the mystery of learning to be one’s own leader. The more one knows about one’s potential and limitations, the more effectively one can use it. This course will explore the application and understanding of human potential as a resource in creative leadership, uniting leadership skills and a leader’s way of life. This course also examines and compares the traditional models of leadership and models of creative leadership with particular emphasis on the role and the thinking processes of the leader. (12/88)

HNRS-40 HONORS SEMINAR
2 units: 2 hours lecture.
Limitation on enrollment: Enrollment in the Honors Program. This course will focus on the in-depth discussion and analysis of a topic of interest to honors program students. Students may repeat the class three times. (1/03)

HUMAN SERVICES
(Social Science Division)
HMSV-50 SURVEY AND UTILIZATION OF COMMUNITY RESOURCES
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course is a survey of major health and welfare resources available to the community. Emphasis is community resources for special groups such as persons and families afflicted with chemical dependency, the handicapped, and victims of crime. Students will learn the utilization of resources by community aides and other paraprofessional helpers. (10/99)

HMSV-51 HUMAN BEHAVIOR AND THE HELPING PROCESS
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course prepares the student for entry level in public service employment such as community aide, social service aide, and occupational assistant. Emphasis is on increasing skills in communication and interpersonal relations. The course includes how personality develops, including social and political influences, normal and exceptional behavior, and practical ways of helping people who have problems in living. (10/99)

HMSV-61 SOCIAL WELFARE
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course covers the development and growth of public and social welfare concepts and programs; organization of federal, state, and county social and financial assistance programs; and the review of employment opportunities and requirements in social welfare. (10/99)

HUM-01 STUDIES IN HUMANITIES -- ANCIENT TO EARLY RENAISSANCE
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-01A.
The principal aim of this course is to examine human existence and cultural endeavors from earliest ancient civilizations to the beginnings of the Renaissance. Students will examine the continuities of human endeavor through fine arts, literatures, philosophies, religions, and the sciences, with an integration of certain non-Western cultures. (12/04)

HUM-01H HONORS STUDIES IN HUMANITIES -- ANCIENT TO EARLY RENAISSANCE
(CSU breadth area C2) 3 units: 3 hours lecture.
Limitation on enrollment: Enrollment in the Honors Program.
See the college catalog for a description of enrollment requirements.
The principal aim of this course is to examine human existence and cultural endeavor from the earliest ancient civilizations to the beginnings of the Renaissance. Students will examine developments in the fine arts, literatures, philosophy, religion, and the sciences from a variety of cultures, both Western and non-Western. There will be an emphasis on collaborative learning, research, and writing. (1/03)

HUM-02 STUDIES IN HUMANITIES -- RENAISSANCE TO PRESENT
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: ENGL-01A.
The principal aims of this course are to examine human existence and cultural contributions from the Renaissance to the present. Students will examine the continuities of human endeavor through fine arts, literatures, philosophies, religions, and the sciences, with an integration of certain non-Western and/or multi-cultural influences. (12/04)
HUM-02H HONORS STUDIES IN HUMANITIES -- RENAISSANCE TO PRESENT
(CSU breadth area C2) 3 units: 3 hours lecture.
Limitation on enrollment: Enrollment in the Honors Program.
See the college catalog for a description of enrollment requirements.
The principal aim of this course is to examine human existence and cultural endeavor from the Renaissance to the present. Students will examine developments in the fine arts, literature, philosophy, religion, and the sciences from a variety of cultures, both Western and non-Western. There will be an emphasis on collaborative learning, research, and writing. (1/03)

HUM-15 COMPARATIVE CULTURES
(CSU breadth area C2) 3 units: 3 hours lecture.
This course surveys the historical development and social structures of several different cultures in the United States. Cultures discussed will normally include African American, Asian American, Hispanic American, and Native American. Emphasis will be placed on issues of ethnicity and pluralism. (12/05)

HUM-18 AFRICAN AND AFRICAN-AMERICAN LITERATURE
(Also: ENGL-18)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: ENGL-01B. This is an introductory course in African literature written in English or translated from African languages or French into English. It will represent a survey of major works from colonial and post-colonial literature to introduce students to African literature and films of merit, cultural relevance, and universal application. In addition to enabling students to view African works within a global context, its goal will be to show the connection of themes, issues, and styles between African and African-American literature and experience as well. Works studied will include epics and narratives, poetry and song lyrics, short fiction, novels, essays, films, and drama in an effort to assist students in acquiring an appreciation of important literary voices that have heretofore been neglected in literature studies. (11/00)

HUM-21 HUMANITIES AND FILM
(CSU breadth area C2) 3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-01A. This course is an introduction to the humanities through the study of film. Film criticism will be combined with the analysis of philosophic, literary, and/or artistic themes. Feature-length films will be screened. (12/05)

HUM-47ABCD SPECIAL TOPICS IN LANGUAGE AND LITERATURE
(Also: ENGL-47ABCD)
3 units: 3 hours lecture.
Prerequisite: ENGL-A. This course engages students in the study of language and literature, and topics will vary from semester to semester. (1/05)

INDT-15 SMALL GAS ENGINES
(Also: MECH-15)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-83. This course is a complete introduction to the operation, construction, maintenance, repair, and adjustment of two-cycle and four-cycle engines. It is designed for persons without prior experience in small engines. Theory and practical work including safety and the care and use of specialized tools used in small engine repair and maintenance will be covered. Examples of types of engines to be used will include lawn mower, power saw, pump, conveyor, self-propelled small carts, and any other small engines. (10/04)

INDT-20 MICROCOMPUTER OPERATING SYSTEMS FOR INDUSTRIAL TECHNOLOGY
[CSU areas A,B] 1 unit: 1 hour lecture.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course will provide students with a working knowledge of file manipulation and DOS operating systems as related to AutoCAD, Windows applications, and technical software. Features such as the basic commands, file management, control of the work flow, print control functions, file configurations, and pathing as related to AutoCAD and associated industrial technology software will be discussed and explored. (2/00)

INDT-25 FLUID POWER
3 units: 2 hours lecture, 3 hours lab.
This course covers the operational theory and practical applications of hydraulics, pneumatics, and vacuum components and systems. This includes adjustment, service, and functional operation of pumps, controls, transmission systems, actuators, and fluidics. The design and application of fluidic systems as they relate to industrial machinery will be covered together with systematic methods of troubleshooting. (4/99)

INDT-32 BUILDING CONSTRUCTION CONCEPTS
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course will provide the student with an understanding of construction concepts by building scaled modulars of each area of house construction (floor, wall, and roof framing; installation of windows and doors). The student will learn the concepts of stairwell and fireplace framing. (3/06)

INDT-36A-Z ELECTRICAL WIRING: RESIDENTIAL AND INDUSTRIAL
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course covers basic residential and industrial theory. Topics include electrical theory, wiring in accordance with the latest version of the National Electrical Code, blueprint reading, layout of electrical circuits according to blueprints, switches, electrical connections, grounding and electrical safety, materials, appliance connections, industrial wiring and components, power poles, and low voltage remote control devices. This course may be repeated when the course number letter changes that reflects National Electrical Code changes. (1/00)
INDT-38 INDUSTRIAL TECHNOLOGY COMPUTER APPLICATIONS AND LITERACY  
[CILC areas A.B.C.D,E,F] 3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A, ENGL-41; MATH-80 or MATH-83 (preferred); OFCT-50B.  
This course explores computer usage in the workplace with emphasis on industrial technology (IT) situations and applications. Computer applications including word processing, spreadsheets, databases, and presentation managers will be covered. Included will be methods of accessing information through various formats and levels including standard print resources and the Internet. Also included will be an introduction to web page design and other software and hardware appropriate to industrial technology. (2/02)

INDT-40 COMMERCIAL REFRIGERATION SYSTEMS: INSTALLATION, SERVICE, AND MAINTENANCE  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84.  
This course presents commercial refrigeration systems to students. Systems studied will range from fractional to large tonnage refrigeration units. Medium and low temperature units, multiple defrost methods, and energy efficiency will be studied. Diagnostic and repair procedures on commercial systems and related equipment will be covered. (3/06)

INDT-41 POWER TRANSMISSION  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course covers theory and application of power transmission through chains, belts, gear trains, and augers, including system layout, set up, alignment, adjustment, timing, and maintenance. The student will study peripheral components and systems typical of industrial applications and their related components, such as bearings, seals, shafts, and safety devices. Requirements of preventive maintenance, system troubleshooting, and lubrication schedules are also covered. (2/00)

INDT-42 PROCESS VACUUM TECHNOLOGY (Also: LEOT-42)  
3 units: 2 hours lecture, 3 hours lab.  
Advisory: INDT-25 or PHYS-10.  
This course is designed to provide the student with classroom and laboratory experience in creation and control of the vacuum process environment. The course will cover rou h to ultra-high vacuum environments used in the fluid power, semiconductor manufacturing, and laser generation processes. Instruction includes vacuum safety, gas laws, vacuum measurement, pressure and flow control, viscous flow, molecular flow, conductance, pumping systems, connectors, base pressure, cleanliness, vacuum gauging, mass flow control, vacuum processes, residual gas analysis, and process troubleshooting. (2/02)

INDT-49A-Z ELECTRICAL CODES AND ORDINANCES  
3 units: 3 hours lecture. Advisory: ENGL-A.  
This is a course in the interpretation and application of the National Electrical Code (NEC), and other national, state, and local electrical codes and ordinances which regulate the installation, alteration, and maintenance of electrical circuits, systems, and equipment. Each letter (i.e., A,B,C, etc.) may be taken only once and represents, when changed, the latest version of the National Electrical Code being taught. (3/05)

INDT-50 HVAC -- HEATING AND CONTROL SYSTEMS  
6 units: 4 hours lecture, 6 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course will enable students to identify and understand the operation of the various components found in heating and air conditioning units. Students will perform diagnostic and repair procedures on the above units and apply basic electrical concepts as they relate to HVAC industry heating and control technology. (11/02)

INDT-51 HVAC -- VENTILATION AND AIR CONDITIONING SYSTEMS  
6 units: 4 hours lecture, 6 hours lab.  
Advisories: ENGL-81, ENGL-84; INDT-50, INDT-52; MATH-80 or MATH-83.  
This course will enable students to identify and understand the operation of various components and systems found in air conditioning refrigeration systems. Students will perform diagnostic and repair procedures on air conditioning refrigeration systems and related equipment. Thermodynamic and psychometric principles as they relate to air conditioning systems will be covered. (11/02)

INDT-52 REFRIGERANT USAGE CERTIFICATION -- ENVIRONMENTAL PROTECTION AGENCY (EPA) REQUIREMENTS  
1 unit: 1 hour lecture.  
Advisory: ENGL-81.  
This course prepares students for EPA certification in refrigerant handling. The Clean Air Act and Montreal protocol will be discussed. Types I, II, and III certification test requirements will be discussed. EPA testing will be accomplished as a component of the course. A testing fee will be required for those who wish certification. (3/06)

INDT-62 BASIC ELECTRONICS FOR INDUSTRY  
(Also: AUTO-62, ELCT-62, MECH-62)  
3 units: 2.5 hours lecture, 1.5 hours lab.  
Advisories: ENGL-81, ENGL-83; MATH-80 or MATH-83.  
This course is designed to provide the automotive student and heavy-duty mechanic with a strong background in basic electrical concepts. This will allow the student to troubleshoot electrical system problems with the aid of technical information and test equipment. The class will also provide the necessary electrical theory for the more advanced electrical classes. (4/04)

INDT-71A-ZZ INDUSTRIAL TECHNOLOGY SPECIAL TOPICS  
0.5-4 units: lecture/lab hours will vary, depending on topic.  
Prerequisite/Advisory: None.  
This course is the study of basic principles, processes, and theories of the special topic being presented during the semester. (11/90)

INDT-85 BASIC INDUSTRIAL TECHNICAL SKILLS  
(Also: MECH-85)  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH 80 or MATH-83.  
This course provides a basic introduction to technical skills required throughout the industrial areas. The course includes identification and use of tools and materials, tool sharpening and care, hot and cold metal work, pipefitting, electric wiring fundamentals, basic woodworking, concrete materials and mixes, and sketching and estimating. (3/06)

ITALIAN  
(Humanities Division)

ITAL-01 ELEMENTARY ITALIAN  
(CSU breadth area C2) 5 units: 5 hours lecture.  
Advisory: ENGL-84.  
This course will focus on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Italian the most basic functions of everyday life. This course is not recommended for native speakers. (3/00)
ITAL-01B ELEMENTARY ITALIAN
(CSU breadth area C2) 2.5 units: 2.5 hours lecture.
This course will include spoken language, pronunciation, reading simple material, and an elementary knowledge of grammar. The pace will be such that a student will complete the first regular semester of language in two semesters, at which time he or she will be ready for ITAL-02. This course is designed for students who are uncertain about attempting a foreign language, and for which the regular program might be too fast or concentrated and for the terminal student who wishes to become familiar with a foreign language.

ITAL-02 ELEMENTARY ITALIAN
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: ITAL-01.
This course will continue where ITAL-01 left off, focusing on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Italian the most basic functions of everyday life. This course is recommended for students who have completed one year of high school Italian; it is not recommended for native speakers. (3/00)

ITAL-03 INTERMEDIATE ITALIAN
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisites: ITAL-02.
Intermediate Italian is a continuation of ITAL-02. This course reviews and further develops grammatical concepts introduced in ITAL-01 and ITAL-02, as well as introduces the student to new concepts. Through varied readings, composition, and discussion, the student will increase his or her vocabulary and cultural knowledge. This course is recommended for new students who have completed two (2) years of high school Italian. (3/00)

JAPANESE
(Humanities Division)

JPNS-01A ELEMENTARY JAPANESE
(CSU breadth area C2) 2.5 units: 2.5 hours lecture.
Advisory: ENGL-84.
This course will focus on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Japanese the most basic functions of everyday life. (11/02)

JPNS-01B ELEMENTARY JAPANESE
(CSU breadth area C2) 2.5 units: 2.5 hours lecture.
Prerequisite: JPNS-01A.
This course focuses on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Japanese the most basic functions of everyday life. (4/00)

JPNS-02 ELEMENTARY JAPANESE
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: JPNS-01B.
JPNS-02 is a continuation of JPNS-01B. This course will focus on the further development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Japanese basic functions of everyday life. (1/03)

JOURNALISM
(Humanities Division)

JOUR-01 MASS MEDIA AND SOCIETY (CAN JOUR 4)
3 units: 3 hours lecture.
Prerequisite: ENGL-A. Advisory: OFCT-50B.
This is a general, non-technical survey of the media which includes the history, organization, social role, functions, limitations, and responsibilities of newspapers, magazines, radio, television, public relations, advertising, and the Internet. Emphasis is placed on the political, social, and economic impact of the media upon government and public opinion. (2/04)

JOUR-08 INTRODUCTION TO NEWSWRITING AND REPORTING (CAN JOUR 2)
3 units: 3 hours lecture.
Prerequisite: ENGL-01A. Advisory: OFCT-50B.
This is a beginning course providing instruction and practice in language and style of news writing and reporting. Basic skills will be taught in the balanced and objective writing of news events, interviews, speeches, meetings, and features. Instruction will be given in copyreading, and the class will include a brief review of the laws of libel and the responsibilities of the mass media. This course may be repeated once. (02/04)

JOUR-32 NEWSPAPER STAFF
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; JOUR-08; OFCT-50B; PHOT-10A.
This is a practical course in gathering news, judging news value, writing or photographing news events and features while working as a staff member or editor of the Merced College student newspaper. This course may be repeated two times. (2/04)

LANDSCAPE HORTICULTURE
(Agriculture Division)

LAND-10A PLANT IDENTIFICATION AND USAGE: FALL
3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-A.
This course covers the identification, growth habits, culture and ornamental use of landscape and indoor plants adapted to climates of California. Plants emphasized will come from the current California Association of Nursery and Garden Centers (CAN & GC), and California Landscape Contractors Association (CLCA) plant lists. Topics include botanical nomenclature, plant hardiness and growth zones, growth habits, plant structural characteristics, and soil nutritional requirements. Landscape uses are stressed along with cultural practices. Plants covered are those best observed and identified in the fall of the year. (1/06)

LAND-10B PLANT IDENTIFICATION AND USAGE: SPRING
3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-A.
This course covers the identification, growth habits, culture and ornamental use of landscape and indoor plants adapted to climates of California. Plants emphasized will come from the current California Association of Nursery and Garden Centers (CAN & GC), and California Landscape Contractors Association (CLCA) plant lists. Topics include botanical nomenclature, plant hardiness and growth zones, growth habits, plant structural characteristics, and soil nutritional requirements. Landscape uses are stressed along with cultural practices. Plants covered are those best observed and identified in the spring of the year. (1/06)

LAND-11 ELEMENTS OF ENVIRONMENTAL HORTICULTURE
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This is a course in the study of environmental horticulture with emphasis on nursery operations, landscaping, turf management, and floral industries. Topics include basic botany, cultural practices, propagation, structures and layout, pest management, planting, container gardening and houseplants, floral design, plant identification, turf grass installation and care, and a survey of career opportunities. (1/06)
This course covers the fundamentals of landscape construction including soil preparation, paving and construction materials, hand and power tool use, turf and plant installation, plan reading, estimating and bid preparation. The course also covers local codes and state requirements and prepares students to pass the C-27 Landscaping Contractor’s License Exam. (10/05)

LAND-12 LANDSCAPE DESIGN
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-80; MATH-80 or MATH-83.
This course covers the fundamentals of landscape design and studies in form, space, color, texture, scale, balance, utility, and contrast. Materials used in landscape developments, site analysis, problems of design, correct use of plant material relating to ecology and function of landscape structures in the plan will be encompassed in this course. Basic irrigation design is also a component of the course. (1/06)

LAND-14 LANDSCAPE CONSTRUCTION AND INSTALLATION
2 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This course covers the fundamentals of landscape construction including soil preparation, paving and construction materials, hand and power tool use, turf and plant installation, plan reading, estimating and bid preparation. The course also covers local codes and state requirements and prepares students to pass the C-27 Landscaping Contractor’s License Exam. (10/05)

LAND-15 LANDSCAPE MAINTENANCE
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This course teaches basic needs in residential gardening. Included in this course are plant identification, basic landscape design, sprinkler installation and care, fumigation and lawn installation, pruning, pest and disease recognition and control, soils, fertilization, and weed control. Also included will be foliage plant care for interiors. (1/06)

LAND-17 NURSERY AND GARDEN CENTER PRACTICE
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A; MATH-80 or MATH-83.
This course is a study of commercial retail nursery and garden center operations dealing with wholesale and retail nursery practices, including plant care, merchandising, and management practices. (1/06)

LAND-50 RESIDENTIAL GARDENING
3 units: 3 hours lecture.
Advisory: ENGL-81.
This course teaches basic needs in residential gardening. Included in this course are plant identification, basic landscape design, sprinkler installation and care, fumigation and lawn installation, pruning, pest and disease recognition and control, soils, fertilization, and weed control. Also included will be foliage plant care for interiors. (1/06)

LEOT-30 INTRODUCTION TO LASER ELECTRO-OPTICS TECHNOLOGY
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41; MATH-C or MATH-D.
This course presents the principles and equations that are needed to understand the operation of lasers and how to modify their outputs. The course is designed for technologists who will design, build, modify, install, operate, troubleshoot and repair lasers and laser systems. (11/00)

LEOT-32 LASER TECHNOLOGY
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: LEOT-30.
This course is a continuation of topics presented in LEOT-30 Introduction to Laser Electro-Optics Technology with an emphasis on light sources, optics, and experimental optics methods. The student will continue to develop laser electro-optics systems troubleshooting and problem solving. (12/00)

LEOT-34 LASER ELECTRO-OPTICS COMPONENTS AND DEVICES
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: LEOT-32.
This course is a continuation of the topics presented in the previous Laser Technology course with emphasis at the component level. Troubleshooting and problem-solving skills will also be emphasized at the component level. Subjects covered include optical, electro-optic, and photographic equipment and methods. (12/00)

LEOT-36 LASER APPLICATIONS
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: LEOT-34.
This course applies the material covered in previous Laser Electro-Optics classes to actual equipment and test configurations. The student will apply troubleshooting and problem-solving skills to laser equipment and laser systems in practical applications. (12/00)

LEOT-37 LASER ELECTRONICS (APPLICATIONS OF ELECTRONICS) (Also: ELCT-37)
3 units: 2 hours lecture, 3 hours lab.
Prerequisites: ELCT-32, ELCT-33.
This electronics application course covers the electronics segments of laser equipment. Subjects studied include laser high-voltage power supplies, flashlamps and arc lamp circuits, electro-optic and acousto-optic circuits, optical detectors, and electro-optic electronic instrumentation. (12/00)

LEOT-42 PROCESS VACUUM TECHNOLOGY (Also: INDT-42)
3 units: 2 hours lecture, 3 hours lab.
Advisory: INDT-25 or PHYS-10.
This course is designed to provide the student with classroom and laboratory experience in creation and control of the vacuum process environment. The course will cover rough to ultra-high vacuum environments used in the fluid power, semiconductor manufacturing, and laser generation processes. Instruction includes vacuum safety, gas laws, vacuum measurement, pressure and flow control, viscous flow, molecular flow, conductance, pumping systems, connectors, base pressure, cleanliness, vacuum gauging, mass flow control, vacuum processes, residual gas analysis, and process troubleshooting. (2/02)
LEARNING RESOURCES

(learning Resources Center)

LRNR-30 INFORMATION COMPETENCY IN THE
ELECTRONIC AGE
[CLIC areas A,B,C,D,E,F,G] 3 units: 3 hours lecture.
Advisories: ENGL-A; OFCT-50B.
This course follows the guidelines of the California Community
College’s Academic Senate Information Competency Initiative
and the Computer and Information Literacy requirements of
Merced College. It is designed to introduce students to library
research and resources including information retrieval tools.
Course work will include library literacy, research methods, and
information technology literacy, including database applications,
as well as consideration of ethical and legal implications of
computer applications and information use. This course also
presents techniques for successful research including
documentation and citation of resources, evaluation of
information resources, and bibliography production. (2/04)

LRNR-40 RESEARCH ON THE INTERNET
1 unit: 1 hour lecture.
Prerequisite: LRNR-30. Advisories: CPSC-24; ENGL-A.
This course provides college-level knowledge and skills
necessary for effective research on the Internet, including
information technology literacy, evaluating, documenting, and
using Internet resources, developing research frameworks for the
Internet, using Internet subject directories and search engines,
developing strategies for accessing information not found through
typical Internet search engines (the “hidden we”), and Integrating
Internet research into academic assignments. Course work will
include advanced Internet research methods and information
technology research. (11/02)

LRNR-49A-ZZ SPECIAL TOPICS IN LEARNING RESOURCES
0.5 unit: 0.5 hour lecture.
Advisories: CPSC-24; ENGL-A.
This course is designed to address special topics in Learning
Resources to meet current needs of students. It will provide
students with access to instruction that will assist them in
acquiring up-to-date information and skills in order to cope with
the rapidly changing world of learning resources, particularly
information and technology and information applications. (9/00)

LIBERAL STUDIES

(Humanities Division)

LBST-10 CAREER EXPLORATION: TEACHING I
3 units: 2 hours lecture, 3 hours lab.
Limitations on enrollment: Students must obtain a fingerprint
clearance and negative TB clearance. Prerequisite: LRNR-30.
Advisories: ENGL-01A; CPSC-30; MATH-A.
Students are introduced to the profession of teaching through an
understanding of the California State Content Standards, the
credentialed program, the role of the public school teacher, and
the personal qualities necessary to be a successful teacher. Practical
experiences in the classroom will include tutoring in area schools.
Students will share observations with faculty and peers in weekly
meetings to note differences in students and in tutoring/learning
styles and to reflect on their personal experiences. This course
is intended for students who plan to teach in the K-8 grade levels.
The course is intended for students in their second year of the CSU
Stanislaus Transfer Liberal Studies “Blended Program” and
selected other four-year schools. Students must provide their own
transportation to off-campus school sites and must dress
professionally as determined by their school sites. Observation
placements are required for class and will not be available for
students with felony convictions. Insufficient tutoring exposure will
negatively affect grades. All students will be required to attend an
orientation session the first week of school. (3/03)

LBST-20 CAREER EXPLORATION: TEACHING II
3 units: 2 hours lecture, 3 hours lab.
Limitations on enrollment: Students must obtain a fingerprint
clearance and a negative TB clearance. Prerequisite: LBST-
10.
Students are provided additional opportunities to explore the
teaching profession and how their personalities will fit with their
career choice. Students will observe students and teachers in K-8
classroom environments and share observations with faulty and
peers in weekly meetings to note differences in students, in
teaching/learning styles, and in their personal reactions to the
classroom setting. placements for LBST-20 will be in a
classroom setting different from placements for LBST-10 so
students may obtain maximum variety of experience. This course
is intended for students who plan to teach in the K-8 levels; the
course is required of students in their second year of the CSU
Stanislaus Transfer Liberal Studies “Blended Program” and
selected other four-year schools. Students must provide their own
transportation to off-campus school sites and must dress
professionally as determined by their school sites. Observation
placements are required for class and will not be available for
students with felony convictions. Insufficient tutoring exposure will
negatively affect grades. All students will be required to attend an
orientation session the first week of school. (3/03)

MANAGEMENT

(Business Division)

MGMT-31 PRINCIPLES OF MANAGEMENT
3 units: 3 hours lecture.
Advisory: ENGL-A.
This course is designed to develop the techniques and
capabilities of those in supervisory positions and for those
aspiring toward supervisory positions in business and industry.
Topics covered include managerial functions of supervisors,
motivation and management styles, problem-solving and
decision-making, communication skills, planning, time
management, organizing, employee training, employee appraisal
and compensation, directing, controlling and labor/management
relations. (1/05)

MGMT-32 HUMAN RESOURCES MANAGEMENT
3 units: 3 hours lecture.
Advisory: ENGL-A.
This course involves the study of the principles and methods
involved in effective human resource utilization in organizations.
It provides an overview of responsibilities and practices involved
in recruiting, selecting, promoting, terminating and retiring
employees, performance appraisal, job development and
analysis, wage and salary administration, and effective working
relationships. (1/03)

MGMT-33 ELEMENTS OF EFFECTIVE LEADERSHIP
3 units: 3 hours lecture.
Advisory: ENGL-A.
This course deals primarily with the techniques of leadership in
organizational settings. Topics discussed include leadership
styles, the behavioral aspects of leadership, and effective
leadership characteristics. (1/03)

MGMT-34 EMPLOYMENT LAW
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41, ENGL-41L.
This course is designed to give the student an in-depth
understanding of employment law. The student will have an
opportunity, via court simulations, case presentations, mock
negotiations, etc., to apply the knowledge and skills learned.
These experiences will include the preparation of materials
necessary for trial, mediation, arbitration, and implementation of
labor-management rules and regulations. (12/01)
MGMT-35 ORGANIZATIONAL BEHAVIOR
3 units: 3 hours lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to investigate principles related to the proper use of human resources in business and industry, and their effects on administrative policies and decisions. This course emphasizes human needs and priorities, adjustment and preparation for job entry, development of proper attitudes, communication skills, leadership methods, group dynamics, and the implications of these elements in the operation of organizations. (2/00)

MGMT-37 SMALL BUSINESS MANAGEMENT
3 units: 3 hours lecture.
This course is designed to assist small business and prospective small business owners through the utilization of an entrepreneur's business plan. Topics include the environment and management of the small enterprise, legal considerations in starting a small business, financing a business, business record keeping and budgeting, insurance, marketing, and credit policies and procedures. Students will use microcomputers in the decision-making and business-planning process. (12/04)

MGMT-50A THE CHALLENGE OF SUPERVISION
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to acquaint the student with various concepts of supervision needed to be successful. The basic skills needed by supervisors, a supervisor's major responsibilities, and how the supervisor fits into the organization will be emphasized. This course is repeatable two times. Credit/No Credit only. (5/04)

MGMT-50B FOUNDATION ESSENTIALS: VALUES AND ETHICS
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to acquaint the student with the importance of values and ethics in the workplace. The importance of values and ethics involved in the supervisor's carrying out his/her duties will be emphasized. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50C TIME MANAGEMENT
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to introduce the student to time management principles and specific tools that assist in making maximum use of time. Basic concepts of managing space will also be covered. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50D COMMUNICATING WITH PEOPLE
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to introduce the student to key elements in communication within business organizations. Topics will include verbal and non-verbal communication, listening skills, and specific supervisory communication skills. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50F TEAM BUILDING
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide the student with an understanding of how teams work together, common problems teams encounter, and how to solve them. Students will learn to recognize various team player styles. Students will be introduced to team building in the workplace. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50G DECISION MAKING AND PROBLEM SOLVING
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to introduce the student to decision-making and problem-solving as a supervisor. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50H CUSTOMER SERVICE
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide the student with certain key skills and attitudes in order to effectively meet the needs of customers. The student will be introduced to the concept of internal and external customers, customer satisfaction, and customer retention. Topics will also include communicating with customers, developing a positive attitude, handling complaints, and sales skills. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50I ATTITUDE IN THE WORKPLACE
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide students with certain key skills in the area of attitude so that they may effectively maintain a positive attitude at the workplace and at home. Students will be introduced to the concepts of how attitudes are communicated, the three types of attitudes, and how to adjust one's attitude. Topics will also include the primary causes of a bad attitude, turnaround strategies to battle these bad attitudes, and specific techniques to raise the attitude of others. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-50J THRIVE AND SURVIVE IN THE WORKPLACE
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to introduce the student to time management principles and specific tools that assist in making maximum use of time. Basic concepts of managing space will also be covered. This course is repeatable two times. Credit/No Credit only. (1/02)

MGMT-51B MOTIVATION AND MORALE
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide an analysis of human behavior as it is related to the workplace. The student will be provided with various alternatives that can be utilized to motivate employees and improve employee morale. This course is repeatable two times. Credit/No Credit only. (11/03)

MGMT-51C LEADERSHIP
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to acquaint the student with the leadership role of the supervisor and introduce various leadership models to aid the student in developing his/her own leadership style. The attributes of a good leader will be discussed. This course is repeatable two times. Credit/No Credit only. (11/97)

MGMT-51F CONFLICT RESOLUTION
0.5 unit: 0.5 hour lecture.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide the student with an analysis of attitudes and behavior which create conflict between individuals and groups within an organization. This course is repeatable two times. Credit/No Credit only. (1/02)

**Marketing (Business Division)**

**MKTG-30 MARKETING**
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84.
This course provides a broad understanding of the promoting, pricing, and distribution of products and services. Promotional mixes are studied including sales promotion, advertising, packaging, personal selling, public relations, and publicity. A study is made of understanding customer needs and behaviors; developing a product and/or service mix to satisfy customer needs, and profitability. Legal, political, cultural, social, economic, competitive, and ethical aspects of marketing are discussed. (12/99)

**MKTG-31 RETAIL MANAGEMENT (Also: MDSE-31)**
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is a study of the principles and practices of retail merchandising. It is designed to help develop skills in organizing, operating, and managing in the retail merchandising industry. It will also provide students with the knowledge necessary to enter the field of merchandising and to provide a basis for advancement for those currently employed in the field. (4/04)
MATH-D  BASIC TECHNICAL MATHEMATICS
5 units: 5 hours lecture.
Prerequisite: MATH-A or MATH-B. Advisories: ENGL-A, ENGL-41.
This is a course in intermediate algebra and basic trigonometry which is designed to meet the needs of technical or engineering technology fields. Applications are stressed throughout and are drawn from a variety of vocational and technical areas. (2/01)

MATH-02  COLLEGE ALGEBRA AND TRIGONOMETRY
(CAN MATH 16)
(CSU breadth area B4) 4 units: 4 hours lecture.
Prerequisite: MATH-C or MATH-D.
Limitation on enrollment: This course is not open to students having credit in MATH-17, MATH-25, or MATH-26.
Advisories: ENGL-A, ENGL-41.
This course covers the system of real numbers, functions, trigonometric functions, the complex numbers, theory of equations, system of equations, matrices, composite and inverse functions, trigonometric equations, topics in analytic geometry, and vectors. (11/03)

MATH-04A  ANALYTICAL GEOMETRY AND CALCULUS
(CAN MATH 18)
(CSU breadth area B4) 4 units: 4 hours lecture.
Prerequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This course covers limits, continuity, differentiation and integration of algebraic and trigonometric functions along with their respective applications. (3/00)

MATH-04B  ANALYTICAL GEOMETRY AND CALCULUS
(CAN MATH 20)
4 units: 4 hours lecture.
Prerequisite: MATH-04A. Advisories: ENGL-A, ENGL-41.
This course is a continuation of MATH-04A to conic sections, transcendental functions, methods of integration, hyperbolic functions, improper integrals, Taylor’s Formula, infinite series, and plane curves and polar coordinates. (3/00)

MATH-04C  ANALYTICAL GEOMETRY AND CALCULUS
(CAN MATH 22)
4 units: 4 hours lecture.
Prerequisite: MATH-04B. Advisories: ENGL-A, ENGL-41.
This course covers vectors and solid analytic geometry, vector-valued functions, differentiation, multiple integrals, and topics in vector calculus including Green’s and Stokes’ theorems. (3/00)

MATH-05A  APPLIED CALCULUS
(CAN MATH 30)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This course is designed for the beginning calculus student majoring in the life sciences and/or students majoring in the areas of business, economics, management, and the social sciences. Students majoring in mathematics, engineering, or physical science should enroll in a more rigorous calculus series. This course will cover functions, differentiation, and exponential and natural logarithms, but the emphasis will be on using these topics as tools to solve applied problems in the areas listed above. (3/00)

MATH-05B  APPLIED CALCULUS
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-05A or MATH-04A.
Advisories: ENGL-A, ENGL-41.
This course is a continuation of MATH-05A, the study of beginning calculus, for the student majoring in the areas of business, economics, management, and the social sciences. The major topic of this course is the study of integration and the applications of integration in the areas described above. Other topics include trigonometry, differential equations, probability, Taylor polynomials and Infinite series. This course is not intended for the student majoring in mathematics, engineering, or the physical sciences. (3/00)

MATH-06  ELEMENTARY DIFFERENTIAL EQUATIONS
(CAN MATH 24)
3 units: 3 hours lecture.
Prerequisite: MATH-04C.
Advisories: ENGL-A, ENGL-41; MATH-08.
This course covers definitions, eliminations of arbitrary constants, equations of order one, elementary applications, linear differential equations, non-homogeneous equations, linear systems, the Laplace transforms, the power series method, numerical methods and Fourier series. (11/00)

MATH-08  LINEAR ALGEBRA
(CAN MATH 26)
3 units: 3 hours lecture.
Prerequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This course is suggested for computer science, engineering, math, and science majors. It is an introduction to systems of linear equations, matrix and determinant operations, vector spaces, linear transformations, eigenvalues, and eigenvectors with a strong emphasis on applications. (3/00)

MATH-10  ELEMENTARY STATISTICS
(CAN STAT 2)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D. Advisories: ENGL-A, ENGL-41.
This course covers descriptive statistics, including organization and presentation of data; elementary probability including permutations, combinations, binomial and normal distributions; inferential statistics, including random sampling, hypothesis testing, regression, and correlation and chi-square distribution. (3/00)

MATH-12  FORTRAN PROGRAMMING
(Also: CPSC-12 and ENGR-12)
3 units: 2 hours lecture, 3 hours lab.
Prerequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This course teaches students to use the FORTRAN programming language to solve problems in a wide variety of areas. Program design, problem-solving, and debugging techniques are emphasized throughout the course. (3/00)

MATH-14  C++ PROGRAMMING
(Also: ENGR-14)
3 units: 2 hours lecture, 3 hours lab.
One-way corequisite: MATH-02, or MATH-25 and MATH-26.
Advisories: ENGL-A, ENGL-41.
This is the entry-level comprehensive concepts course for computer science majors, and is recommended for science and math majors. Algorithm design, logic diagrams, problem-solving, coding, and debugging are emphasized using a structured language such as C++. (3/00)

MATH-15  FINITE MATHEMATICS
(CAN MATH 12)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D. Advisories: ENGL-A, ENGL-41.
This course covers algebra review, linear models, systems of linear equations, matrices, linear programming, mathematics of finance, set theory, and probability. This course includes applications to business, economics, psychology, and sociology. (3/00)
MATH-17 PRE-CALCULUS TECHNICAL MATHEMATICS
4 units: 4 hours lecture.
Prerequisite: MATH-C or MATH-D.
Advisories: ENGL-A, ENGL-41.
This is a pre-calculus mathematics course designed for students considering a career in a technical or engineering technical field. Topics include algebraic and transcendental functions, right-angle trigonometry, trigonometric functions, vectors, formulas and identities, complex numbers, analytic geometry, sequences and series, and an introduction to statistics. Technical applications will be stressed throughout the course. (2/01)

MATH-20A BASIC STRUCTURE OF MATHEMATICS I
(CAN MATH 4)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D.
Advisories: ENGL-A, ENGL-41.
This course is designed to complete the first course of a two-course sequence in basic concepts of mathematics required for the liberal studies major and the elementary teaching credential. It covers elementary set theory, numeration systems, number theory, the set of integers, the set of rational numbers, and the set of real numbers. (3/00)

MATH-20B BASIC STRUCTURE OF MATHEMATICS II
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D.
Advisories: ENGL-A, ENGL-41; MATH-20A.
This course is designed to complete the second course of a two-course sequence in basic concepts of mathematics required for the liberal studies major and the elementary teaching credential. This course covers the structure of plane and solid geometry, measure, introduction to coordinate geometry, elementary probability, and statistics. (3/00)

MATH-21 INTRODUCTION TO MATHEMATICAL REASONING
(CAN MATH 2)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D. Advisories: ENGL-A, ENGL-41.
This course is for the general student, such as a student majoring in University Studies. It will explore the mathematics involved in a variety of general topics from other disciplines. Rather than mere manipulations, the use of mathematics will be stressed as a tool to achieve other goals and to solve applied problems. Topics will include a history of mathematics, logic, number theory, geometry, consumer mathematics, probability, and statistics. This course is not designed for students entering elementary school teaching. (11/03)

MATH-25 TRIGONOMETRY (CAN MATH 8)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D.
Limitations on Enrollment: This course is not open to students having credit in MATH-02 or MATH-17.
Advisories: ENGL-A, ENGL-41.
This course is a review of right triangle geometry, real numbers, functions and graphs, trigonometric functions and their graphs, identities, inverse trigonometry functions, trigonometric equations, right angle trigonometry, the laws of sines and cosines, and application of polar and rectangular forms, including vectors and complex numbers. (2/02)

MATH-26 COLLEGE ALGEBRA (CAN MATH 10)
(CSU breadth area B4) 3 units: 3 hours lecture.
Prerequisite: MATH-C or MATH-D. (Note: This course is not open to students having credit in MATH-02.)
This is an advanced course in algebra including the study of real numbers, polynomials, equations and inequalities, factoring, rational expressions, exponents, roots, radicals, systems of equations, functions (including logarithmic and exponential) sequences and series, progressions and the binomial expansion. (3/00)

MATH-49ABCDE (1-2) LABORATORY EXPERIENCE IN MATHEMATICS (TRANSFER-LEVEL)
0.5 - 1 unit: 1.5 - 3 hours lab.
Prerequisite: MATH-C or MATH-D. Advisories: ENGL-A, ENGL-41.
This course provides individualized instruction and technology-based mathematics instruction at the lower-division college level. Technological applications may include a combination of work on computer algebra systems, graphing calculators, interactive CD-ROM, and computer tutorials and/or videotapes on mathematics subjects. Sections of MATH-49 may be scheduled to augment and enhance specific transfer-level math classes, or they may be offered independently of other math courses. Topics will enhance critical thinking, visualization of mathematical concepts, and/or computational skills. Each letter (i.e., ABCDE) may be taken only once. (3/04)

MATH-59ABC (1-2) LABORATORY EXPERIENCE IN MATHEMATICS (NON-TRANSFER LEVEL)
0.5 - 1 unit: 1.5 - 3 hours lab. Prerequisite: MATH-80.
One-way corequisite: MATH-A, MATH-B, MATH-C, or MATH-D.
This course provides individualized instruction and technology-based instruction to augment courses in beginning or intermediate algebra. Technological applications may include a combination of work on computer algebra systems, interactive CD-ROM, and computer tutorials and/or videotapes on mathematics subjects. Topics will be tailored to the supported course and will enhance critical thinking, visualization of mathematical concepts and/or computational skills. Each letter (i.e., ABC) may be taken only once. (3/04)

<tbody>
<tr>
<td>MATH-89ABCD</td>
<td>MATH LABORATORY</td>
<td>.5 - 2</td>
<td>1.5 - 6 hours</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Advisory: MATH-90. (Note: The letter designation indicates unit value, &quot;A&quot; being for 0.5 unit, &quot;B&quot; for 1 unit, etc., in 0.5 unit increments.)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course is a laboratory experience primarily to help students who have taken a math class but who still need additional work before they progress to the next math class. It is designed to provide individualized assistance to improve a student's deficient areas. The number of hours and the number of assignments vary based on the units enrolled in. Each letter (i.e., A, B, C, or D) may be taken only once. (4/04)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MATH-90</td>
<td>FUNDAMENTALS OF ARITHMETIC</td>
<td>3</td>
<td>3 hours lecture</td>
<td></td>
</tr>
<tr>
<td></td>
<td>This is an intensive review of the whole number system, including counting, notation, word names, and the number line. Particular emphasis is placed on the basic computational skills: addition, subtraction, multiplication, and division. Written problems and life skills will be emphasized throughout the course. Calculator skills as they relate to whole numbers will be introduced. (5/01)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MATH-91</td>
<td>FUNDAMENTALS OFDECIMALS AND FRACTIONS</td>
<td>3</td>
<td>3 hours lecture</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Prerequisite: MATH-90. Advisories: ENGL-80, ENGL-80L.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course begins with a short review of the whole number system using basic computational skills. The course covers the meaning of decimals and fractions, and the four basic operations using them: addition, subtraction, multiplication, and division. Special emphasis will be placed on thought problems, including life skills. The course will conclude with an introduction to prime factoring, exponents, basic geometry, and order of operation. (5/01)</td>

<td></td>
</tr>
<tr>
<td></td>
<td>This course is a study of the use, maintenance, adjustment, calibration, and repair of the equipment commonly used in California agriculture during the spring tillage season, with emphasis on primary and secondary tillage, planting, chemical application, and harvesting equipment. The selection and operation of both machinery and tractors will be practiced. Safety will be stressed throughout. (3/06)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MECH-15</td>
<td>SMALL GAS ENGINES (Also: INDT-15)</td>
<td>3</td>
<td>2 hours lecture, 3 hours lab</td>
<td>ENGL-A; MATH-83.</td>
</tr>
<tr>
<td></td>
<td>Advisories: ENGL-A; MATH-83.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course is a complete introduction to the operation, construction, maintenance, repair, and adjustment of two-cycle and four-cycle engines. It is designed for persons without prior experience in small engines. Theory and practical work including safety and the care and use of specialized tools used in small engine repair and maintenance will be covered. Examples of types of engines to be used will include lawn mower, power saw, pump, conveyor, self-propelled small carts, and any other small engines. (10/04)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>MECH-19A</td>
<td>WELDING DESIGN AND CONSTRUCTION (Also: WELD-40A)</td>

<tr>
<td></td>
<td>Advisories: ENGL-A; MATH-83.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>This is an introduction to the principles of hydraulics applied to farm and light industrial equipment. The course includes a study of the technical language of fluid power, including graphical symbols, industrial standards, components, and maintenance of hydraulic units. (10/04)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
MECH-22A  DIESEL ENGINES  
4 units: 2 hours lecture, 6 hours lab.  
Advisories: ENGL-A; MATH-83.  
This course explores the operation and repair of modern diesel engines. Principles and theories are studied by running, testing, diagnosing, disassembling and reassembling components, systems, and engines. (10/04)

MECH-22B  DIESEL ENGINES  
4 units: 2 hours lecture, 6 hours lab.  
Prerequisite: MECH-22A.  
This course includes principles of design and construction of heavy duty engines used throughout the power equipment and trucking industry. Emphasis is placed on engine chamber design and injection systems. Principles and theories are studied by running, testing, diagnosing, disassembling, and reassembling components, systems, and engines. Safety is emphasized throughout. (11/00)

MECH-23  DIESEL FUEL SYSTEM DIAGNOSTICS  
2 units: 1 hour lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83.  
This course introduces service department procedures for various fuel systems an important part of the course. Service and adjustments of injectors, nozzles, and governors will also be covered. (10/04)

MECH-24  POWER TRAINS  
4 units: 2 hours lecture, 6 hours lab.  
Advisories: ENGL-A; MATH-83.  
This course is a study of the function and repair of a power train from the clutch through the final drive. Topics will include the theory of operation, maintenance, diagnosis, and repair of clutches and torque converters, mechanical and hydraulic transmissions, differential, and final drives. Safety will be stressed throughout. (3/06)

MECH-25  AGRICULTURE ELECTRIFICATION  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-83.  
This course covers basic wiring single phase 120-140 volt together with three-phase motor and motor-control wiring, identification, troubleshooting, maintenance, and testing of electrical systems will be covered along with motors and motor controls. Also included in the course will be the operation, construction, and mechanical design features of single-phase, polyphase induction, synchronous and D.C. motors and the various controls for starting, braking, stopping, reversing, protection, and speed control. Maintenance and safety will be stressed throughout the course. (3/06)

MECH-26  POWER EQUIPMENT ELECTRICAL SYSTEMS  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83.  
This course is a study of the fundamentals of electricity with applications to current power equipment electrical systems. Theory and service procedures will include the following systems: starting, charging, lighting, and accessories. (10/04)

MECH-30  EQUIPMENT MECHANICS SKILLS  
2 units: 1 hour lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83.  
This course is an introduction to skills and safety required within the Diesel Mechanics and Mechanized Agriculture areas. The course will include identification and use of hand tools and power equipment used within the equipment mechanic area. Emphasis will be placed on precision measuring and use of the following equipment: hydraulic press, pullers, cleaners, hoists, jacks, securing, dynamometers, valve grinders, boring machines, sharpening tools, reamers, hones, glass bead machine, boil out tank, forklifts, and other specialty tools. An in-depth study will also occur on fasteners and plumbing used within the equipment mechanic area. (10/04)

MECH-31  EQUIPMENT SAFETY  
1 unit: 1 hour lecture.  
Advisories: ENGL-81, ENGL-84.  
This course is a study of safety on and about farm equipment and machines. The safe operation and daily maintenance of machines commonly used in the daily operation of farms will be covered along with hitching, driving, and operational skills of selected machines. Safety rules and laws that apply to agriculture equipment will be stressed. (3/00)

MECH-32  APPLIED ELECTRICAL AND HYDRAULIC SERVICE  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83; MECH-21, MECH-26.  
This course is designed to give the student knowledge and competencies in modern cab and chassis electrical, electronic, electron hydraulic, and hydraulic systems. Testing, diagnosis, repair, and replacement of computer-controlled systems, monitors, sensors, lighting systems, wiring harness, electro-hydraulic systems, and hydraulic systems will be emphasized throughout the course. (3/06)

MECH-33  POWER EQUIPMENT AIR CONDITIONING  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83.  
This is a study of power equipment air conditioning fundamentals designed to give the student knowledge and competencies in modern power equipment HVAC systems. Current EPA regulations that govern retrofit as well as the use of refrigerant installation, diagnostic, and recycling equipment are also covered. Environmental impacts by various protection procedures are emphasized. (3/06)

MECH-34  SERVICE FUNDAMENTALS  
3 units: 3 hours lecture.  
Advisories: ENGL-81, ENGL-84; MATH-83.  
This course introduces service department policies and procedures, including computer and microfiche applications common to the industry. Also emphasized in the course are parts orders, warranties, time management, and use of technical reference materials. (3/00)

MECH-35  COMPACT POWER EQUIPMENT  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-A; MATH-83; MECH-15.  
This is a study in basic principles of modern small equipment and engines and explores design, operation, and proper maintenance of equipment and current compact engines approved by the California Air Resources Board. Topics include application of compact engine systems to various machines, power transmission systems, attachments, related engine systems to various machines, power transmission systems, attachments, related engine systems, equipment operation, problem solving, and component failures. (9/06)

MECH-40  EQUIPMENT REPAIR  
2 units: 1 hour lecture, 3 hours lab.  
Advisories: ENGL-81, ENGL-84; MATH-83.  
This class is an introduction to skills of maintenance and repair of equipment. Renovation of equipment including tractor, machinery, and truck painting, retouching, and structural repairs will be covered. Replacement of worn cutting tools, hardfacing, sandblasting, metal preparation, and painting will be performed on a variety of equipment. Safety will be stressed throughout. (4/00)
MECH-45 ADVANCED ARC WELDING PROCEDURES
(Also: WELD-45)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-B; MATH-80 or MATH-83; WELD-06/MECH-06 and WELD-07/MECH-07.
This course is designed to emphasize advanced skills and techniques of Shielded Metal Arc Welding, Gas Metal Arc Welding, Gas Tungsten Arc Welding, Air Carbon Arc Cutting, and Oxycetylene Flame Cutting as related to pipe and structural members. Included will be welding assembly print interpretation, weld symbol interpretation, and weld joint preparation. Students will be prepared to take an AWS Welder Certification Test during this course. (2/06)

MECH-49 MECHANIZED AGRICULTURE: PROBLEMS
2 units: 6 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide supervised study and practices involving special problems in Mechanized Agriculture in addition to courses already completed by the student and includes special project work for additional knowledge and enrichment. Emphasis will be placed upon the needs and interest of the student. (4/00)

MECH-51 TRUCK BRAKE AND CHASSIS
4 units: 2 hours lecture, 6 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-83.
This course is a study of truck and bus mechanics. It includes a study of the running gear, tires, wheels, brakes, electrical systems wiring, services, maintenance, and safety inspection. Troubleshooting and servicing are major portions of this course. (3/00)

MECH-52 TRUCK/TRACTOR POWER FRAME
4 units: 2 hours lecture, 6 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-83.
This is a course of truck/tractor and bus power frame applications. It includes a study of, and practice in, removing, repairing, and replacing engines, engine components, clutches, transmissions, drive lines, and differentials. Also included in the course are electrical systems troubleshooting and service, in-frame overhaul of engines, cooling systems and other components or systems housed within the engine compartment. (3/00)

MECH-62 BASIC ELECTRONICS FOR MECHANIZED AGRICULTURE (Also: AUTO-62, ELCT-62, INDT-62)
3 units: 2.5 hours lecture, 1.5 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course is designed to provide the automotive student and heavy-duty mechanic with a strong background in basic electrical concepts. This will allow the student to troubleshoot electrical system problems with aid of technical information and test equipment. The class will also provide necessary electrical theory for more advanced electrical classes. (4/04)

MECH-70AA-ZZ SPECIAL TOPICS IN MECHANIZED AGRICULTURE
.5 - 4 units: 0 - 4 hours lecture, 0 - 12 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is the study of basic principles, processes, and theories of the special topic being presented during the semester. (3/00)

MECH-85 BASIC AGRICULTURAL SKILLS (Also: INDT-85)
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.
This course provides a basic introduction to technical skills required throughout the industrial areas. The course includes identification and use of tools and materials, tool sharpening and care, hot and cold metal work, pipefitting, electric wiring fundamentals, basic woodworking, concrete materials and mixes, and sketching and estimating. (3/06)

MERCHANDISING MANAGEMENT
(Business Division)

MDSE-31 RETAIL MANAGEMENT (Also: MKTG-31)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is a study of principles and practices of retail merchandising. It is designed to help develop skills in organizing, operating, and managing in the retail merchandising industry. It will also provide students with knowledge necessary to enter the field of merchandising and to provide a basis for advancement for those currently employed in the field. (4/04)

MDSE-32 SALESMANSHIP (Also: MKTG-32)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is designed to provide the student with a theoretical and practical background in salesmanship. Included in this course are the study of the psychology of selling, selling principles and techniques, advertising and sales promotion, and development of the individual for entry into the field of salesmanship. (3/00)

MDSE-33 ADVERTISING (Also: MKTG-33)
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This is an introductory course in advertising principles and techniques. Areas of study will include advertising agencies; preparation of advertisements, including copyrighting, illustration, and layouts; media selection; budgeting for advertising; psychology and persuasion of advertisements; and the use of advertising as a tool in sales promotion. (11/03)

MUSIC
(Arts Division)

MUS-01 FUNDAMENTALS OF MUSIC
(CSU breadth area C1) 3 units: 3 hours lecture.
Advisory: ENGL-84.
This course is a study of music fundamentals, including principles and procedures of rhythm and pitch notation, scales (major, minor, church, and other) and key signatures, intervals, chord structures and symbols. Harmonic analysis of chords and simple four-part writing is included. The course is applicable to those who have learned to play and sing without training in fundamentals, and to beginners in music. (2/01)

MUS-02 MUSICAL STAGE PRODUCTION
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-41, ENGL-84.
This course is an intensive study of musical stage productions, including musical theater, musical revues, opera, and operettas. It is open to students interested in singing and acting. A major musical stage production is prepared and performed by students at the end of the semester. Detailed study of mise-en-scene, makeup, stage vocal techniques, and scene staging are included. All students are expected to participate in every aspect of the musical stage production. This course may be repeated three times. (2/01)
MUS-04A MUSIC THEORY I  
3 units: 3 hours lecture. Advisory: MUS-01.  
This is the first of four sequential music theory courses. This sequence provides a comprehensive study of lower division music theory. Concurrent studies in melodic and rhythmic analysis and composition, in harmonic analysis, and an analysis of form are included. Principles of counterpoint (modal and tonal), harmony (diatonic and chromatic), and 20th century technique are included in the sequence. The student will also acquire the basis for an intelligent appraisal and study of individual styles of music (17th through 20th centuries), with attention directed toward 19th and 20th century styles. This course provides a thorough study of diatonic harmony found in music literature of the common practice period. This includes harmonic and voice leading principles, use of figured bass, triads and 7th chords, non-harmonic tones, and harmonic progression. (12/04)

MUS-04B MUSIC THEORY II  
3 units: 3 hours lecture. Prerequisite: MUS-04A.  
This is the second of four sequential music theory courses. This sequence provides a comprehensive study of lower division music theory. Concurrent studies in melodic and rhythmic analysis and composition, in harmonic analysis, and an analysis of form are included. Principles of counterpoint (modal and tonal), Harmony (diatonic and chromatic), and 20th century technique are included in the sequence. This course provides a thorough study of chromatic harmony found in music literature of the common practice period from the 20th century. This includes secondary dominants, modulation to closely related keys, modulation to distant keys, modal exchange and mixture chords, the (Neapolitan, German, French, Italian) 6th chord, added-ninth chords and larger vertical structures (9th, 11th, 13th), dominant prolongation, analysis of simple and complex forms, and chromatic voice leading. (12/04)

MUS-04C MUSIC THEORY III  
3 units: 3 hours lecture. Prerequisite: MUS-04B.  
This is the third of four sequential music theory courses. This sequence provides a comprehensive study of lower division music theory. Concurrent studies in melodic and rhythmic analysis and composition, harmonic analysis and an analysis of form are included. Principles of counterpoint (modal and tonal), harmony (diatonic and chromatic), and 20th century technique are included in the sequence. This course provides a thorough study of ear-training and sight-singing as it relates to the music found in the common practice period through the 20th century. Ear-training studies will include dictation (melodic, harmonic, and rhythmic), aural identification of scales, diatonic and chromatic intervals, triads, 7th chords, their functions, inversions, and qualities. An introduction to conducting patterns, fundamentals of acoustics, analysis of musical form as an aid to functional hearing, cadence identification, and error detection will be included. Sight-singing studies will include diatonic and chromatic melodies, and part-singing. The course will use theory taught in MUS-04A and MUS-04B to augment awareness of the ear training and sight-singing student. (12/04)

MUS-04D MUSIC THEORY IV  
3 units: 3 hours lecture. Prerequisite: MUS-04C.  
This is the fourth of four sequential music theory courses. This sequence provides a comprehensive study of lower division music theory. Concurrent studies in melodic and rhythmic analysis and composition, harmonic analysis, and an analysis of form are included. Principles of counterpoint (modal and tonal), harmony (diatonic and chromatic), and 20th century technique are included in the sequence. This course provides a thorough study of non-tonal harmony (e.g. quartal, pan-diatonic), introduction to set theory and basic twelve-tone technique, jazz harmony, and principles of improvisation. A survey of representative compositions of the 20th century with respect to style and structure is included. (12/04)

MUS-11 HISTORY AND APPRECIATION OF MUSIC  
(CSU breadth area C1) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course is a study of important composers and their works from the Gregorian chant to Bach (600 to 1750 A.D.). Students will develop understanding and appreciation of various types of music from different eras as a medium of cultural development and as a background toward further musical study. (4/00)

MUS-12 HISTORY AND APPRECIATION OF MUSIC  
(CSU breadth area C1) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course provides a study of important composers and their works, a continuation of the post-Baroque era up to the 20th century. Emphasis is on classical, romantic, impressionistic, nationalistic, and contemporary periods in music history. (4/00)

MUS-13 HISTORY AND APPRECIATION OF JAZZ  
(CSU breadth area C1) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course presents jazz literature of the important performance areas, 1890 to present, including analysis of representative works. International influences, including Africa and other non-Western regions, will be discussed. The course is a listener’s guide to appreciation of jazz and stresses principles of structure and expression, formal design, and stylistic tendencies of the chief historical eras. (11/02)

MUS-14 AMERICAN POPULAR MUSIC  
(CSU breadth area C1) 3 units: 3 hours lecture.  
Advisory: ENGL-A.  
This course presents an introduction to history and literature of the popular music movement in the United States; it is a study of the relationships of popular music to the social history of America. Emphasis is on styles and personalities of folk, blues, jazz, Broadway, country, and rock. This course is designed for the non-music major. (3/00)

MUS-24A BCD APPLIED MUSIC  
1 unit: 3 hours lab.  
Prerequisite/Advisory for MUS-24A: None.  
Prerequisite for MUS-24BCD: A is prerequisite for B, etc.  
This course provides for individual instruction in voice, piano, or traditional band or orchestra instruments. It requires one lesson per week with a private instructor approved by the Music Department staff. A minimum of 15 lessons must be verified. A jury examination by the Music Department staff is required at the conclusion of the course. (2/01)

MUS-27A ELEMENTARY PIANO  
2 units: 2 hours lecture.  
Advisory: ENGL-A.  
This course is a sequential program of instruction for the beginning piano student. It is designed to develop sight reading skill and keyboard technique incorporated into solo and ensemble music. (4/00)

MUS-27B INTERMEDIATE PIANO  
2 units: 2 hours lecture.  
Prerequisite: MUS-27A. Advisory: ENGL-A.  
This course is a continuation of MUS-27A, and introduces two octave scales, arpeggios, triads, damper pedal technique, and musical textures and rhythms that are more complex. (4/00)
MUS-27C ADVANCED PIANO
2 units: 2 hours lecture.
Prerequisite: MUS-27B. Advisory: ENGL-A.
This course is designed for the second year of piano instruction at the college level. Studies of diatonic and chromatic chord structures and their voicing (as found in piano literature), and the study of two-, three-, and four-part textures are included. This course will explore various piano styles found in the common practice period through the 20th century and introduce related piano techniques. (4/00)

MUS-27D ADVANCED PIANO
2 units: 2 hours lecture.
Prerequisite: MUS-27C. Advisory: ENGL-A.
This course is a continuation of MUS-27C. It offers a more advanced study of diatonic and chromatic chord structures and their voicing as found in piano literature. This course will continue to examine various piano styles found in the common practice period through the 20th century and introduce related piano techniques. (4/00)

MUS-28 JAZZ IMPROVISATION
2 units: 2 hours lecture.
Limitation on enrollment: Audition by instructor.
This course is an introduction to theory and performance of basic jazz improvisation. The study of scales, chords, major and minor keys, modes, and various jazz styles is included. (3/00)

MUS-36A BEGINNING GUITAR
2 units: 2 hours lecture. Advisory: ENGL-A.
This course provides opportunity to learn basic techniques of guitar performance. Instruction will be predominantly in the area of folk and classical techniques. (2/01)

MUS-36B INTERMEDIATE GUITAR
2 units: 2 hours lecture.
Prerequisite: MUS-36A. Advisory: ENGL-A.
This course is a continuation of skills and techniques learned in MUS-36A. Additional emphasis will be placed upon classical techniques. (2/01)

MUS-36C ADVANCED GUITAR
2 units: 2 hours lecture.
Prerequisite: MUS-36B. Advisory: ENGL-A.
This course is a study of advanced guitar techniques, including classical methods, scale forms, picking variations, extended chord forms, and development of individual style. (2/01)

MUS-41A CONCERT BAND I
2 units: 1 hour lecture, 3 hours lab.
Limitation on enrollment: Audition by instructor.
This course provides experience in performing concert and symphonic band literature. Public performance and exchange concerts are scheduled in addition to class rehearsals. (2/01)

MUS-41B CONCERT BAND II
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-41A. Limitation on enrollment: Audition by instructor.
This course provides experience in performing concert and symphonic band literature. Public performance and exchange concerts are scheduled in addition to class rehearsals. (2/01)

MUS-41C CONCERT BAND III
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-41B.
Limitation on enrollment: Audition by instructor.
This course provides experience in performing concert and symphonic band literature. Public performance and exchange concerts are scheduled in addition to class rehearsals. (2/01)

MUS-41D CONCERT BAND IV
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-41C. Limitation on enrollment: Audition by instructor.
This course provides experience in performing concert and symphonic band literature. Public performance and exchange concerts are scheduled in addition to class rehearsals. (2/01)

MUS-42A JAZZ ENSEMBLE I
2 units: 1 hour lecture, 3 hours lab.
Limitation on enrollment: Audition by instructor; student must be able to sight read and have some ensemble experience.
This course is a study of jazz music in the big band tradition. The course emphasizes individual, sectional, and ensemble instrumental performance. Tone, intonation, balance, precision, breath control, articulation, style, and improvisation are included. The jazz ensemble makes several public performances each year. (2/01)

MUS-42B JAZZ ENSEMBLE II
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-42A. Limitation on enrollment: Audition by instructor; student must be able to sight read and have some ensemble experience.
This course is a study of jazz music in the big band tradition. The course emphasizes individual, sectional, and ensemble instrumental performance. Tone, intonation, balance, precision, breath control, articulation, style, and improvisation are included. The jazz ensemble makes several public performances each year. (2/01)

MUS-42C JAZZ ENSEMBLE III
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-42B. Limitation on enrollment: Audition by instructor; student must be able to sight read and have some ensemble experience.
This course is a study of jazz music in the big band tradition. The course emphasizes individual, sectional, and ensemble instrumental performance. Tone, intonation, balance, precision, breath control, articulation, style, and improvisation are included. The jazz ensemble makes several public performances each year. (2/01)

MUS-42D JAZZ ENSEMBLE IV
2 units: 1 hour lecture, 3 hours lab.
Prerequisite: MUS-42C. Limitation on enrollment: Audition by instructor; student must be able to sight read and have some ensemble experience.
This course is a study of jazz music in the big band tradition. The course emphasizes individual, sectional, and ensemble instrumental performance. Tone, intonation, balance, precision, breath control, articulation, style, and improvisation are included. The jazz ensemble makes several public performances each year. (2/01)

MUS-43A ELEMENTARY VOICE
3 units: 3 hours lecture.
Limitation on enrollment: Must demonstrate ability to match pitch; see instructor. Advisories: ENGL-41, ENGL-84.
This is a course in elementary vocal training. It emphasizes posture, diaphragmatic-intercostal breathing, breath support and control, tonal placement, articulation, stage presence, and overcoming performance anxiety. Critical evaluation, demonstration, and written reviews will be required. A basic understanding of music fundamentals, although not required, would be highly desirable. (3/00)
MUS-43B ADVANCED VOICE
3 units: 3 hours lecture.
Prerequisite: MUS-43A. Advisories: ENGL-41, ENGL-84.
This is a course for those singers who desire more advanced vocal training. In-depth study, discussion, and personal application of vocal technique such as diaphragmatic-intercostal breathing, breath support and control, correct loral placement and articulation is a regular part of class activities. Correct pronunciation of English, Latin, Italian and German will be studied and performed with selections from classical vocal repertoire.

MUS-44 CHORUS
(Formerly MUS-44ABCD) 2 units: 1 hour lecture, 3 hours lab.
Limitation on enrollment: Audition by instructor.
This course is a study of standard choral literature. It emphasizes part-singing, intonation, breath control, vocal development, style, eras, musical devices, etc. The chorus makes several public appearances each year. This course may be repeated three times.

MUS-45 CHAMBER SINGERS
(Formerly MUS-45ABCD) 2 units: 1 hour lecture, 3 hours lab. Limitation on enrollment: Audition by instructor.
This course specializes in the study and performance of choral literature chosen from all major eras and genres of choral writing. Particular focus will be made on literature written or arranged for small vocal ensembles. Emphasis includes part-singing, intonation, breath control, vocal development, blend, tone coloring, and choral balance. The Chamber Singers perform several times throughout the year. This course may be repeated three times.

MUS-46 CHORAL AND INSTRUMENTAL CONDUCTING
3 units: 3 hours lecture.
Advisories: ENGL-41, ENGL-84; MUS-01, MUS-27A or MUS-45A.
This course covers the essential personal traits and baton techniques of conducting. Score reading, mastery of elementary patterns and techniques, repertoire for performing vocal and instrumental ensembles, and observance of successful conductors are included.

MUS-47 SONG INTERPRETATION: MUSIC THEATER
3 units: 3 hour lecture.
Prerequisite: MUS-43A. Advisories: ENGL-41, ENGL-84.
This is a course for those singers who desire to develop their abilities in song interpretation. Particular emphasis is placed on music theater literature and presentation. Character development, motivation, blocking, facial and body gestures, and emotional discovery are all incorporated into the song interpretation.

MUS-48A SIGHT-SINGING/EAR TRAINING
3 units: 3 hours lecture.
This course is planned to equip the student with the rudiments of rhythm, intervals, notation, and sight-reading. Fundamentals of musicianship, ear training, sight-singing, and facility in reading and singing music are emphasized. The course includes melodic and harmonic dictation. Critical written and vocal evaluation will be given by each student of his/her performance and progress.

MUS-61ABCD (1-4) FINE AND PERFORMING
ARTS -- SPECIAL TOPICS
.5 - 2 units: 0.5 - 1 hour lecture, 1.5 - 6 hours lab.
(Note: The number following the letter designation indicates unit value, “1” being for 0.5 unit, “2” for 1 unit, etc., in 0.5 unit increments.)
The course covers a variety of topics of current interest to students of music. Different topics will be emphasized each time the course is offered. Sections of this course may vary in unit value depending on subject matter, meeting time, and format. Each letter (i.e., A, B, C or D) may be taken only once.

NATURAL SCIENCE
(Science, Math and Engineering Division)
NTSC-39 PEOPLE AND LIVESTOCK IN THE SIERRAS
(Also: ANSC-39)
3 units: 3 hours lecture.
This class will present the history and impact of people and livestock in the back country of Yosemite and the surrounding wilderness areas, from earliest uses to present utilization.

NTSC-40 A-F NATURAL SCIENCE
1 unit each; 3 to 8 day excursions.
This is a field study on the natural history of a specific region. Educational institutions and areas of scientific interest will be visited. Lecture and examinations will be given en route. The academic areas of Anthropology, Botany, Biology, Geology, Astronomy, Physics, Chemistry, and Zoology will be investigated where applicable.

NTSC-40G GRAND CANYON
1 unit: 9 hours lecture, 50 hours total lab.
In this course, students traverse the Grand Canyon on foot from the North to South Rims and this involves a backpack trip of 24.5 miles in four days. There is usually space for 6-8 non-backpackers who stay with the bus to study the rims, the canyon at Page, Arizona, and the Painted Desert. The entire trip requires seven nights and eight days. Except for two nights on the ground for backpackers, lodging is in motels and hotels. There are two evening class meetings preceding and one following the trip.

NTSC-45L ABC FIELD STUDY
1-3 units: 1-3 hours lecture and/or 3-12 hours lab by arrangement.
(Note: The second letter designation indicates unit value, “A” being for 1 unit, “B” for 2 units, and “C” for 3 units.)
This course is offered as special opportunities arise for field study in the natural sciences, such as Biology, Ecology, Physical Anthropology, Geology, and Cultural Anthropology. Work will take place in the field, the laboratory, and/or the museum providing practical experiences in observation, collection, preservation, identification, preparation for exhibition or other work required of active scientists. This course is not repeatable.

NURSING, REGISTERED
(Allied Health Division)
REGN-10 FOUNDATIONS OF NURSING PRACTICE
9 units: 4 hours lecture, 15 hours lab.
This course presents basic concepts that provide the foundation upon which homeostasis is maintained in adults and/or children. Common threads integrated throughout the program are initiated: nursing process, nutrition, pharmacology, developmental levels, cultural diversity, communication, and professional role. Concurrent practice in the college laboratory and community agencies is required.

REGN-20 FOUNDATIONS OF NURSING PRACTICE (II)
9 units: 4 hours lecture, 15 hours lab.
This course presents basic concepts that provide the foundation upon which homeostasis is maintained in adults and/or children. Common threads integrated throughout the program are initiated: nursing process, nutrition, pharmacology, developmental levels, cultural diversity, communication, and professional role. Concurrent practice in the college laboratory and community agencies is required.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>REGN-11</td>
<td>Nursing in Health and Illness I</td>
<td>9</td>
<td>This course enlarges upon the concepts presented in REGN-10, introducing principles of care to maintain and restore normal homeostatic mechanisms in patients of all ages; study of the family unit throughout the life cycle is included, with emphasis on preventive care. Concurrent practice in the college laboratory and clinical experience in community facilities is required. (4/00)</td>
</tr>
<tr>
<td>REGN-13A</td>
<td>Nursing Skills Simulation I</td>
<td>2</td>
<td>This course involves lecture/demonstration and return demonstration of nursing skills related to first-year nursing courses. The course presents introductory concepts of pharmacology and drug administration. (4/00)</td>
</tr>
<tr>
<td>REGN-13B</td>
<td>Nursing Skills Simulation II</td>
<td>2</td>
<td>This course includes lecture/demonstration and return demonstration of nursing skills related to first-year nursing courses. The course presents introductory concepts of pharmacology and drug administration, with emphasis on skills and knowledge applications. (4/00)</td>
</tr>
<tr>
<td>REGN-19</td>
<td>Transition LVN to RN</td>
<td>3</td>
<td>The series of lectures and discussions will provide concepts and principles necessary to facilitate transition of the LVN to the changing role of the registered nurse. Emphasis will be placed upon the registered nurse as a decision-making member of the health team, and of responsibilities to be assumed by such a practitioner. (4/00)</td>
</tr>
<tr>
<td>REGN-20</td>
<td>Nursing in Health and Illness II</td>
<td>9</td>
<td>This course enlarges upon the concepts presented in REGN-10 and REGN-11 by introducing principles of care to maintain and/or restore homeostatic mechanisms in acute health problems. Prototype disease processes associated with each concept are studied in relation to preventive and restorative nursing care. Concurrent practice in the college laboratory and clinical experience in community facilities is required. (4/00)</td>
</tr>
<tr>
<td>REGN-21</td>
<td>Professional Relationships and Responsibilities I</td>
<td>1</td>
<td>The course introduces the student to the professional role of the registered nurse: its status, its responsibilities, and inherent problems as influenced by historical and social change. The focus is on the individual nurse and on the profession as a whole. (4/00)</td>
</tr>
<tr>
<td>REGN-22</td>
<td>Nursing in Health and Illness III</td>
<td>9</td>
<td>This course presents advanced concepts and skills in caring for the client with critical or multiple health problems. It emphasizes rehabilitation and adaptation to a compromised and/or declining health status. Concurrent practice in the college laboratory and clinical experience in community facilities is required. (4/00)</td>
</tr>
<tr>
<td>REGN-23</td>
<td>Professional Relationships and Responsibilities II</td>
<td>1</td>
<td>This course is an introduction to leadership and management principles applied to the health care field. Discussions will include leadership and management theories, organizational structure, problem-solving, decision-making, conflict management, effective communication, change process, planning process, motivational theories, and performance appraisal. (4/00)</td>
</tr>
<tr>
<td>REGN-24A</td>
<td>Nursing Concepts Simulation I</td>
<td>2</td>
<td>This course presents lecture and demonstration of higher-level nursing concepts related to second-year nursing courses. The second-year student will assume the facilitator role with other nursing students in skill check-offs. (4/00)</td>
</tr>
<tr>
<td>REGN-24B</td>
<td>Nursing Concepts Simulation II</td>
<td>2</td>
<td>This course presents lecture and demonstration of higher-level nursing concepts related to second-year nursing courses. The second-year student will assume the facilitator role with other nursing students in skill check-offs. (4/00)</td>
</tr>
<tr>
<td>REGN-50</td>
<td>Nursing Career Seminar</td>
<td>1/3</td>
<td>This course introduces students to the various roles and responsibilities of nursing practitioners, including knowledge of educational levels as well as behaviors and skills. Merced College nursing programs are described, including admission requirements and procedures. This course may be repeated once. Credit/No Credit only. (4/00)</td>
</tr>
</tbody>
</table>
This course covers theory, principles, and practice of fundamental nursing skills needed to care for adult patients. Health and its preservation is stressed. Interpersonal relationships, community resources, and prevention and treatment of disease are studied. Clinical experience is integrated with classroom theory, and is provided at affiliating hospitals, under direct supervision of Merced College nursing instructors. This is the first semester of nursing theory of a three-semester program. Clinical experience is integrated. (4/00)

VOCN-42 PRINCIPLES AND PRACTICES OF NURSING CARE
14 units: 8 hours lecture, 18 hours lab.
Limitation on enrollment: Enrollment in the Vocational Nursing program. Prerequisite: VOCN-40.
Two-way corequisite: VOCN-47B.
This course emphasizes theoretical principles and clinical experience in meeting Maslow's basic human needs of nutrition, oxygenation, elimination, and affiliation. It involves clinical experiences in meeting the basic human needs of individuals of all ages with commonly occurring health problems. This course is part of the second semester of a three-semester program. Clinical experience is integrated. (4/00)

VOCN-44 PRINCIPLES AND PRACTICES OF NURSING CARE
14 units: 8 hours lecture, 18 hours lab.
Limitation on enrollment: Enrollment in the Vocational Nursing Program. Prerequisite: VOCN-42.
Two-way corequisite: VOCN-47C.
This course emphasizes theoretical principles of Maslow's basic human needs of safety, hygiene, rest, activity, comfort, and self-actualization as it relates to common and complex health problems occurring in individuals of all age groups. Pathophysiological and psychosocial assessment and management of medical-surgical disorders are stressed. General pharmacological and nutritional considerations are included. This course is part of the third semester of a three-semester program. Clinical experience is integrated. (4/00)

VOCN-46A APPLIED MATHEMATICS FOR PHARMACOLOGY
1 unit: 1 hour lecture.
Prerequisites: ENGL-A, MATH-80. Advisory: ALLH-67.
This is an introductory pharmacology course which includes an introduction to the professional context of drug administration, and study of the metric, apothecary, and household systems of measurement. Nursing responsibility and patient safety is included. Completion of this course requires accurate interpretation of doctors' orders, reading medication bottles, calculating drug dosages, and the reason for their application. (11/02)

VOCN-46B PHARMACOLOGY FOR NURSES
2 units: 2 hours lecture.
Limitations on enrollment: Enrollment in the Vocational Nursing program; CPR card; physical; negative TB skin test or chest x-ray within past 6 months; immunizations; proof of completion of an educational course of study through 12th grade or evidence of completion of the equivalent thereof (C2530-VN Practice Act).
Prerequisites: ALLH-67; ANAT-50; NUTR-10; VOCN-46A.
Corequisites: VOCN-46B, VOCN-47A.
This is an introductory pharmacology course which includes uses, effects and safe administration of medications. Common local and systemic drugs are studied. Nursing responsibilities and client safety are emphasized. (4/00)

VOCN-47A NURSING GUIDANCE I
1 unit: 1 hour lecture.
Limitation on enrollment: Enrollment in the Vocational Nursing program. Two-way corequisites: VOCN-40, VOCN-46B.
This course examines socialization and interpersonal communications related to vocational nursing. Course topics include verbal and non-verbal communication; communication problems in the nurse-patient relationship; the hospital as a working and learning environment; self-actualization relating to the elderly; and death and dying. (4/00)

VOCN-47B NURSING GUIDANCE II
1 unit: 1 hour lecture.
Limitation on enrollment: Enrollment in the Vocational Nursing program. Prerequisite: VOCN-40. Two-way corequisite: VOCN-42.
This course examines the nature of stress and its influences on coping and adapting. Related topics examined include crisis and crisis intervention, and psychophysiological and somatopsychic responses to stress and anxiety. (4/00)

VOCN-47C NURSING GUIDANCE III
1 unit: 1 hour lecture.
Limitation on enrollment: Enrollment in the Vocational Nursing program. Prerequisite: VOCN-42. Two-way corequisite: VOCN-44.
This course examines current and evolving patterns of mental health care and the shifts from inpatient custodial care to community-based treatment for the mentally ill. This course also examines the health-illness continuum, psychopathology, neuroses and psychoses, clinical disorders and maladaptations of behavior, and psychopharmacological approaches to treatment. (4/00)

VOCN-48 INTRAVENOUS THERAPY/BLOOD WITHDRAWAL
2 units: 2 hours lecture.
Limitation on enrollment: Licensed as a Vocational Nurse or Registered Nurse (required by section 2860.5 of the Board of Vocational Nurses and Psychiatric Technicians).
This short-term course is designed to prepare nurses to start and superimpose intravenous fluid and perform blood withdrawal as ordered by the physician. The course will cover psychological preparation of the patient, selection of equipment, aseptic technique, relevant anatomy and physiology, pharmacology of intravenous solutions, and administering blood components. Students will perform simulated and actual intravenous catheterizations and blood withdrawals. (5/01)
NUTR-10 NUTRITION (CAN FCS 2)
(Formerly FCSC-10) (CSU breadth area E) 3 units: 3 hours lecture.
Advisory: ENGL-A.
This course provides information on scientific concepts of nutrition relating to functioning of nutrients in basic life processes. It includes special needs during stages of the life-cycle as well as food sources of nutrients, assessment of diets, special diets for health problems, and current nutritional issues. (12/04)

NUTR-20 PRINCIPLES OF FOODS
3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-A, ENGL-41; MATH-91; NUTR-44.
This course will study the scientific principles of food preparation techniques. Emphasis is on nutrient values of foods, food preservation, food and equipment safety and sanitation, product evaluation, and quality control. (11/04)

NUTR-26ABC INDEPENDENT STUDY IN FOODS AND NUTRITION
1-3 units: 3-9 hours lab.
Prerequisite: NUTR-20.
This course is a supervised study in the area of foods and nutrition. A special program in the student's area of interest will be planned, arranged, and carried out with approval and supervision of the instructor. Each student will submit a report or project upon completion. (3/05)

NUTR-36 NUTRITION AND FOOD SERVICE SUPERVISED FIELD EXPERIENCE
3.5 units: 1 hour lecture, 7.5 hours lab.
Limitation on enrollment: Students must provide evidence of negative TB test prior to participation in lab activities. This course is designed to help students learn problem solving and communication skills. Clinical experience and learning activities specific to food service management will be emphasized. The student is engaged in on-the-job learning activities under the supervision of a worksite supervisor and a college nutrition instructor. Learning objectives are established based on dietary service supervisor functions. Students rotate through experiences in skilled nursing facilities, schools and hospitals. Students will be required to follow dress standards required by the facility in which they work. This course is recommended at or near the completion of the Dietary Service Supervisory Program. The student who has not successfully completed the prerequisite of NUTR-44 but has passed with a “C” or higher the ServSafe Food Safety Certification should consider submitting a prerequisite challenge. Students may be required to show proof of a current negative TB clearance or other immunizations required by the clinical facility to which they are assigned. (3/06)

NUTR-39 NUTRITION FOR YOUNG CHILDREN
(Formerly FCSC-39) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41, ENGL-41L.
This course offers a study of nutrients and their function with an emphasis on the needs of children -- birth through adolescence. Cultural and socioeconomic influences on food practices, and methods of teaching good nutrition to children will be covered. Emphasis will be on improving the nutritional status of children. This course is designed for Early Childhood Education majors to fulfill state requirements for a Children’s Learning Center permit. The course is also for parents who wish to become more knowledgeable about nutrition for their children and for food service workers in child care programs. (12/04)

NUTR-40 MENU PLANNING
(Formerly FCSC-40) 3 units: 3 hours lecture.
Advisories: ENGL-81, ENGL-84; NUTR-10 or NUTR-39.
This course covers principles of menu planning for a variety of food services including child, school, and elder care, and restaurants. Emphasis is on development, types and uses, organization and significance of the menu, and cost and pricing of menu items. (12/04)

NUTR-41 INFANT AND TODDLER FEEDING
1 unit: 1 hour lecture.
Advisories: ENGL-A, ENGL-41.
This course focuses on feeding typical and atypical developing infants beginning at birth with breast milk, formulas, and first foods, and progresses to textures and foods appropriate for the toddler. The course focuses on how to feed a baby, prevent baby bottle tooth decay, and choking prevention. Students will learn about appropriate snacks, food safety aspects, and food preparation for children with varying needs. Finally, students will have the opportunity to design a menu meeting the Child Care Food Program Guidelines. This course is recommended for ECE and Early Intervention students. (11/05)

NUTR-42 QUANTITY FOOD PREPARATION
(Formerly FCSC-42) 3 units: 2.5 hours lecture, 1.5 hours lab. Advisories: ENGL-A; MATH-91; NUTR-20 or some experience in food preparation, NUTR-44.
This quantity food service course is designed for child care, school food service, catering, and elderly care programs. This class includes food production, use of small and large equipment, sanitation and safety, record keeping, work improvement, the supervisor’s role, communication, and nutrition for quantity food preparation. (12/04)

NUTR-43 CHILDREN AND WEIGHT CONCERNS
1 unit: 1 hour lecture.
Advisories: ENGL-A, ENGL-41.
This course is designed to provide an overview of the problem of childhood obesity. Students will explore reasons for the recent epidemic in our country and review the trends. Factors including pressure by the media and the connection to eating disorders will be studied. Finally, students will look at the role of the family, school, and community in addressing childhood obesity. This course is recommended for ECE students. (11/04)

NUTR-44 FOOD SAFETY AND SANITATION
2 units: 2 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course offers basic principles of personal and institutional sanitation and application of these principles to food preparation, sanitation, food allergies, HACCP, and sanitary facilities including accident prevention, regulations, and pest management. An emphasis is placed on the supervisor’s role in maintaining high standards for these principles. This course meets the California Health and Safety Code and training for certification requirements for food handlers. (11/04)

NUTR-70A-ZZ SPECIAL TOPICS IN FOODS AND NUTRITION
(Formerly FCSC-70A-ZZ) 1-3 units: 1-3 hours lecture, 0-9 hours lab. Prerequisite/advisory: None.
This is a course designed to address special topics in Foods and Nutrition to meet current needs of students. Specific classes will be offered to help them cope with the rapidly-changing environment and its effect on everyday living. (12/04)
OFFICE TECHNOLOGY
(Business Division)

OFCT-50A KEYBOARDING
(Formerly OFCT-50) 1 unit: .5 hour lecture, 1.5 hours lab. Advisories: ENGL-81, ENGL-84.
This course includes development of basic computerized keyboarding techniques by touch, and speed and accuracy. (1/06)

OFCT-50B KEYBOARDING AND DOCUMENT FORMATTING
(Formerly OFCT-50) 3 units: 2 hours lecture, 3 hours lab. Advisories: ENGL-81, ENGL-84.
This course includes development of basic computerized keyboarding techniques by touch, fundamental knowledge of word processing software, document formatting (memorandums, letters, reports, tables), and speed and accuracy. (1/06)

OFCT-51 KEYBOARDING/WORD PROCESSING
3 units: 2 hours lecture, 3 hours lab. Prerequisite: OFCT-50B (35 wpm, 95% accuracy). Advisories: ENGL-81, ENGL-84.
This course provides instruction and review of computerized keyboarding using word processing software; emphasis is placed on formatting memorandums, business letters, business forms, legal and medical documents, tables, and reports, as well as keyboarding with speed and accuracy. (11/02)

OFCT-52A KEYBOARDING SPEED AND ACCURACY
(Formerly OFCT-52) 1 unit: .5 hour lecture, 1.5 hours lab. Advisories: Know the keyboard and be able to key at least 20 wpm with 85% accuracy; ENGL-81, ENGL-84.
This course is designed to increase keyboarding speed and accuracy through the use of individualized evaluation. The course helps bridge the speed gap between each level of keyboarding instruction. It is designed for the person who has been away from keyboarding for an extended period of time and wishes to regain keyboarding speed and accuracy. This course may be repeated two times. (1/06)

OFCT-52B KEYBOARDING SPEED AND ACCURACY
(Formerly OFCT-52) 2 units: 1 hour lecture, 3 hours lab. Advisories: Know the keyboard and be able to key at least 20 wpm with 85% accuracy; ENGL-81, ENGL-84.
This course is designed to increase keyboarding speed and accuracy through the use of individualized evaluation. The course helps bridge the speed gap between each level of keyboarding instruction. It is designed for the person who has been away from keyboarding for an extended period of time and wishes to regain keyboarding speed and accuracy. This course may be repeated two times. (1/06)

OFCT-53 ADVANCED OFFICE APPLICATIONS
4 units: 3 hours lecture, 3 hours lab. Prerequisite: OFCT-51. Advisories: BUS-53; ENGL-81.
The student will learn about electronic office concepts, the role of word processing and the Internet in the modern office, and the transformation of ideas into readable forms of communication. This course will include advanced word processing, desktop publishing, multi-media presentations, e-mail, and Internet practices and procedures. (12/00)

OFCT-54 MACHINE TRANSCRIPTION
2 units: 1 hour lecture, 3 hours lab. Prerequisite: OFCT-51. Advisories: BUS-53; ENGL-81.
The student will review the principles of good grammar and use this knowledge when transcribing actual business documents. The student will learn to type mailable business documents using transcription machines. (3/06)

OFCT-55A LEGAL OFFICE TECHNOLOGY SEMINAR
This course examines situations, questions, and problems related to workplace activities within the Legal Office Technology field. The student will develop a portfolio that may be used as part of their preparation for employment. (2/04)

OFCT-55B MEDICAL OFFICE TECHNOLOGY SEMINAR
1 unit: 18 hours lecture. Prerequisites: ACTG-51; BUS-43; OFCT-53, OFCT-54, OFCT-57. One-way corequisite: OFCT-68. Two-way corequisite: Enrollment in 2 units of Cooperative Education. Advisories: ENGL-81, ENGL-84; MATH-80.
This course examines situations, questions, and problems related to workplace activities within the Medical Office Technology field. The student will develop a portfolio that may be used as part of their preparation for employment. (2/04)

OFCT-55C CLERICAL OFFICE ADMINISTRATION AND INFORMATION/WORD PROCESSING OFFICE TECHNOLOGY SEMINAR
This course examines situations, questions, and problems related to workplace activities within the Office Technology field. The student will develop a portfolio that may be used as part of their preparation for employment. (2/04)

OFCT-57 RECORDS MANAGEMENT
2 units: 1 hour lecture, 3 hours lab. Advisories: ENGL-81, ENGL-84; keyboarding speed of 20 wpm.
This course is planned to provide the student with information concerning manual and computer filing methods, procedures, and equipment. Emphasis is on these basic filing systems: alphabetic, numeric, geographic, subject, and non-correspondence. (11/02)

OFCT-68 MEDICAL OFFICE PRACTICE
3 units: 2 hours lecture, 3 hours lab. Prerequisites: OFCT-51; ALLH-67. Advisories: ANAT-50; BUS-53; ENGL-81, ENGL-84.
The student will develop the skills required of a secretary in a modern medical office. The student will become acquainted with medical documents, procedures, and correspondence involved in medical offices and hospitals. The student will integrate previously and concurrently learned skills and theory in simulated medical office procedures, including hospital records, office and hospital reports, insurance forms, and correspondence. The course will help the student develop leadership ability and human relations techniques. (11/02)

OFCT-69 LEGAL OFFICE PRACTICE
3 units: 2 hours lecture, 3 hours lab. Prerequisite: OFCT-51. Advisories: BUS-53; ENGL-81, ENGL-84.
The student will develop the skills required for a secretary in a modern law office. The course introduces and illustrates client language and the form and style of legal documents, develops skills to handle communications through the use of office technology, and the importance of public relations in the law office. The course will help the student to develop leadership ability and human relations techniques. (11/02)
OFCT-72 OFFICE PRACTICE  
3 units: 2 hours lecture, 3 hours lab.  
Prerequisite: OFCT-51.  
Advisories: BUS-53, ENGL-81, ENGL-84.  
The student will review office and communications skills needed to prepare for employment, handle communications, keep simple records, and utilize office technology. The student will also integrate previously and concurrently learned office skills and theory in a simulated office operation. This course will help the student to develop leadership ability and human relations techniques. (11/02)

PARALEGAL STUDIES  
(Business Division)

PLGL-50 INTRODUCTION TO PARALEGAL STUDIES  
3 units: 3 hours lecture.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course provides an overview of substantive and procedural law, legal theory, the legal system, legal research and writing, and paralegal employment. (11/01)

PLGL-51A LEGAL RESEARCH AND WRITING  
4 units: 4 hours lecture.  
One-way corequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is designed to develop the student’s library and computer research skills in finding and validating relevant legal authority. The student will develop legal analysis methods for identifying key facts and issues in factual situations, and learn to apply relevant law to those facts and issues. Writing skills will be developed utilizing correct grammar, format, terminology, and citations for letters and legal memoranda and briefs. (11/01)

PLGL-51B ADVANCED LEGAL RESEARCH AND WRITING  
3 units: 3 hours lecture.  
Prerequisite: PLGL-51A.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is designed to further develop the student’s library and computer research skills in in identifying, analyzing, and validating relevant legal authority. The student will further develop legal analysis procedures for identifying key facts and issues in fact situations, and applying relevant law to those facts and issues. Advanced writing skills will be developed for complex legal correspondence, motions, trial and appellate briefs, utilizing appropriate terminology and citation format. (11/01)

PLGL-52A CIVIL LITIGATION  
4 units: 4 hours lecture.  
One-way corequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is designed to prepare the student for his/her role as a paralegal in the litigation process. The course covers the court system, and jurisdictional issue types and forms or pleadings; and initiation and defense of a civil litigation action, including initial client contact, calendaring, discovery, law and motion, summary proceedings, alternate dispute resolution, and trial preparation and proceedings. (11/01)

PLGL-52B ADVANCED CIVIL LITIGATION  
3 units: 3 hours lecture.  
Prerequisite: PLGL-52A.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is designed to further enhance the student’s knowledge of the procedure and relevant case law and statutes relevant to civil litigation. During this course the student will maintain two civil litigation files. One file will be a personal injury claim and the other contract dispute. The student will set up the file, and prepare all documents necessary in both files from the initial client contact, through mediation, arbitration, and trial, just as they would handle them as a paralegal in a law office. From the file documents, class discussions, and textbook information, each student will prepare a civil litigation procedure manual for the student’s future reference. (11/01)

PLGL-53 LAW OFFICE PRACTICES  
3 units: 2 hours lecture, 3 hours lab.  
Prerequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L; CPSC-24 or CPSC-30.  
This course is designed to train the student in the operation of a law office. Content of the course includes law office organization, timekeeping and time management, accounting systems, the application of computer software specifically designed for the law office, scheduling, calendaring, management of personnel, and retrieval systems for law. (11/01)

PLGL-54 TORTS  
3 units: 3 hours lecture.  
Prerequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course provides an overview of tort law doctrine. Areas of study include tort concepts and terminology; negligence; strict liability; intentional torts; family torts; property torts; business torts; workers’ compensation; defenses; and immunities. (1/02)

PLGL-57 ESTATE PLANNING AND PROBATE PROCEDURES  
3 units: 3 hours lecture.  
One-way corequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course introduces the student to basic legal concepts involving wills, trusts, and probate procedures. Areas of study include the fundamental principles of estates; trusts; wills; probate procedures; real and personal property; sales; taxes; and the administration of fiduciary accounting. (1/02)

PLGL-59 EVIDENCE/TRIAL PREPARATION  
3 units: 3 hours lecture.  
Prerequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41, ENGL-41L.  
This course is designed to give the student an in-depth understanding of evidence, trial preparation, and presentation in a civil case. The student will have “hands-on” experience applying the knowledge and skills learned, such as discovery procedures, utilizing discovery at trial, motions, and how rules of evidence relate to discovery and trial. Trial objectives will also be covered in this course. (11/01)

PLGL-60 FAMILY LAW  
3 units: 3 hours lecture.  
One-way corequisite: PLGL-50.  
Advisories: ENGL-A, ENGL-41; PLGL-51A.  
This course introduces the student to the area of family law. Areas of study include marriage; divorce; non-marital cohabitation; invalid marriages; separation; annulment; client interviewing; commencing the proceedings; orders pending trial; support; child custody and visitation; marital property; and adoption and parentage. (3/06)
PHILOSOPHY (Humanities Division)

PHIL-01 INTRODUCTION TO PHILOSOPHY (CAN PHIL 2)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This course presents an introduction to perennial problems in philosophy, such as personal identity, the existence of God, the essence of reality, the nature of justice, and the possibility of knowledge. These issues will be discussed in light of philosophical positions stemming from classical and modern Western and non-Western philosophical sources. (3/02)

PHIL-01H HONORS INTRODUCTION TO PHILOSOPHY
(CSU breadth area C2) 3 units: 3 hours lecture.
Limitation on enrollment: Enrollment in the Honors program.
See the college catalog for a description of enrollment requirements.
This course introduces perennial problems in philosophy, such as: Who am I? What is the nature of reality? How do we know what we know? What is the nature of religious belief? These questions will be discussed in light of philosophical readings taken from classical and modern Western sources, as well as from non-Western sources. There will be an emphasis on collaborative learning, research, and writing. (3/00)

PHIL-03 ANCIENT PHILOSOPHY (CAN PHIL 8)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This course presents an introduction to the history of philosophy from the Pre-Socratics to the Renaissance, with emphasis on the Pre-Socratics through Aristotle. (9/01)

PHIL-04 MODERN PHILOSOPHY (CAN PHIL 10)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This course presents an introduction to the history of philosophy from the Renaissance to the present, with emphasis on Descartes through Kant. (9/01)

PHIL-05 CONTEMPORARY MORAL AND SOCIAL ISSUES (CAN PHIL 4)
(CSU breadth area C2) 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This course is concerned with the philosophical examination of moral and social issues, such as capital punishment, abortion, war, animal rights, and economic justice. These issues will be discussed in light of ethical theories and moral reasoning stemming from Western and non-Western philosophical sources. (3/02)

PHIL-10 CRITICAL THINKING
(CSU breadth area A3) [CILC area G] 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This is a practical course in sound and logical reasoning. The focus of this course is to develop the abilities to analyze, to criticize, and to reach reasoned conclusions. This includes the ability to recognize and avoid common fallacies in reasoning, and to construct cogent arguments and essays. (3/02)

PHIL-12 LOGIC (CAN PHIL 6)
(CSU breadth area A3) 3 units: 3 hours lecture.
Prerequisites: ENGL-A, ENGL-AL.
Advisories: ENGL-41, ENGL-41L.
This course presents a study of correct reasoning, concentrating on developing the skills for distinguishing logically correct from logically incorrect arguments. The emphasis is on informal fallacies and modern symbolic logic, although the classical syllogism and scientific method are also covered. (9/01)

PHIL-13 CRITICAL REASONING AND WRITING
(Also: ENGL-13)
(CSU breadth area A3) [CILC area G] 3 units: 3 hours lecture.
Prerequisite: ENGL-01A.
ENGL-13/PHIL-13 meets the IGETC critical thinking/composition requirement. The course emphasizes the development of critical thinking skills through instruction in reading and writing arguments. Readings feature mostly non-fictional essays and books that reflect diverse cultural and gender perspectives on a variety of contemporary political and social issues, especially those involving race, ethnicity, and gender. (1/05)

PHIL-13H HONORS CRITICAL REASONING AND WRITING
(Also: ENGL-13H)
(CSU breadth area A3) [CILC area G]
3 units: 3 hours lecture.
Prerequisite: ENGL-01A.
Limitation on enrollment: Enrollment in the Honors program.
PHIL-13H emphasizes the development of critical thinking skills through instruction in reading and writing arguments. Readings feature mostly non-fictional essays and books that reflect diverse cultural and gender perspectives on a variety of contemporary political and social issues, especially those involving race, ethnicity, and gender. (3/00)

PHIL-15 COMPARATIVE RELIGIONS
(CSU breadth area C2) 3 units: 3 hours lecture.
Advisory: ENGL-01A.
This course surveys the historical background and fundamental philosophical concepts of the major religions of the world, including Hinduism, Buddhism, Shinto, Confucianism, Judaism, Christianity, Islam, and some typical basic religions. (3/00)

PHIL-39H SPECIAL TOPICS IN PHILOSOPHY
1 unit: 1 hour lecture.
Limitation on enrollment: Admission to the Honors Program.
This course is designed to allow students to do specialized reading and research in areas of philosophy not offered in regular classes or to do advanced reading and research on topics that were introduced in survey classes. Areas of study may include environmental ethics, Native American philosophy, aesthetics, or a particular philosopher or school of philosophy. (11/04)

PHOTOGRAPHY (Arts Division)

PHOT-10A BASIC PHOTOGRAPHY (CAN ART 18)
3 units: 2 hours lecture, 3 hours lab.
Advisory: ENGL-A.
This is an elementary course covering camera and darkroom techniques of black and white photography. Topics include exposure control, film development, contact printing, enlarging, composition, lighting, filters, print finishing, and mounting. (11/04)

PHOT-10B INTERMEDIATE PHOTOGRAPHY
3 units: 2 hours lecture, 3 hours lab.
Prerequisites: PHOT-10A or PHOT-11A.
This is a course dealing with the practical application of the basic principles of photography, emphasizing technical and artistic control and the perfection of processing, and composition. The course also provides a broad introduction to studio lighting. (11/04)
PHOT-11A DIGITAL CAMERA BASICS  
3 units: 2 hours lecture, 3 hours lab.  
Advisory: ENGL-A.  
This course introduces students to digital cameras through lectures, hands-on experience, and computer use. Instruction includes digital camera functions, technical and creative control, computer processing of images, and digital output options. (11/04)

PHOT-30 INTRODUCTION TO COLOR PHOTOGRAPHY  
3 units: 2 hours lecture, 3 hours lab.  
Prerequisite: PHOT-10B.  
This course covers the introduction to theory and practice of color photography. Students will learn color processing and printing as well as lighting and exposure for color. (11/0/4)

PHOT-31 BASIC VIEW CAMERA  
2 units: 1 hour lecture, 3 hours lab.  
Prerequisite: PHOT-10B.  
Basic view camera is a class in the fundamentals of operating a 4x5 view camera in the studio and the field. Processing and printing of large format film is included as a regular part of class assignments. (11/04)

PHOT-32 STUDIO PHOTOGRAPHY  
2 units: 1 hour lecture, 3 hours lab.  
Prerequisite: PHOT-10B.  
This course includes advanced black and white and some color assignments. Students will become acquainted with commercial equipment and processing. Assignments will include portraiture, lighting, and small and large products. Design and layout may be incorporated into assignments. (11/04)

PHOT-34 PHOTO EXPRESSION  
2 units: 1 hour lecture, 3 hours lab.  
Prerequisite: PHOT-10B.  
Photo expression is a course which explores the possibilities of the use of visual language in relation to the thought process. Advanced techniques of camera use, film handling, and printing will be included, but emphasis will be placed on the personal expression of ideas. (11/04)

PHOT-49 INDEPENDENT STUDY IN PHOTOGRAPHY  
1 unit: 3 hours lab.  
Prerequisite: PHOT-10A or PHOT-11A.  
This course covers a variety of topics and/or activities of current interest in the field of photography. This course may be repeated three times. (11/04)

PHED-01 INTERCOLLEGIATE ATHLETICS  
2 units: 10 hours lab.  
Limitation on enrollment: This is a varsity team sport requiring coach’s or academic athletic advisor’s approval.  
This is a course teaching theory, practice, and game performance of the designated competitive sport. This course may be repeated two times. (2/00)

PHED-02 PEP SQUAD  
2 units: 1 hour lecture, 3 hours lab.  
Limitation on enrollment: Enrollment limited to result of tryouts. Advisories: PHED-10A or PHED-14D1.  
This is a course designed to teach the cheerleaders/pep squad members the drill routines and activities for athletic events. This course may be repeated three times. (3/00)

PHED-03 VARSITY CONDITIONING  
1-2 units: 3-6 hours lab.  
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.  
This is an open laboratory experience designed for those people who desire an individualized strength and conditioning program using a combination of exercise machines, free weights, and aerobic training methods. This class is geared to athletes and individuals who are interested in preparing for varsity competition. Multiple workouts are required per week. This course may be repeated three times. (1/06)

PHED-10A AEROBICS  
0.5 - 1 unit: 1.5 - 3 hours lab.  
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.  
This is a choreographed exercise program set to music which improves cardiovascular fitness while conditioning and toning the whole body. Strenuous physical activity is required. Good general health is advised. This course may be repeated three times. (1/06)

PHED-10B AEROBIC CIRCUIT TRAINING  
1 unit: 3 hours lab.  
Advisory: Good general health; absence of medical conditions that would prevent physical activity.  
This class uses a variety of aerobic activities to improve cardiorespiratory endurance. Circuit machines used include steppers, treadmills, cycling, rowing, recumbent bikes, and cross trainers. Emphasis will be placed on monitoring psychological response to exercise and teaching proper stretching, warm-up, training at target rate, and warm down methods. A pre-test and post test will be administered to evaluate fitness level and monitor improvement. The course may be repeated three times. (4/04)

GENERAL INFORMATION: All physical education classes are co-ed unless otherwise stated in the course description and/or Schedule of Classes. The dress for Merced College Physical Education activities classes is dependent upon the nature of activity; students will be advised of proper dress at time of orientation.

Staff members of the Life Fitness and Health Division will screen all students participating in physical activity classes who show a medical problem which may adversely affect their participation. Students so identified will be required to obtain a physician’s clearance. When appropriate, screening may be achieved through the Disabled Student Services Office. Students who lead a sedentary lifestyle or who have a history of heart disease or other medical conditions should check with their physician before starting any exercise program.

Students are advised to use caution when participating in physical activity classes. Strains, pulls, and similar injuries may be caused by improper use of equipment, or failure to follow directions of instructors.
PHED-10C  CIRCUIT WEIGHT TRAINING
0.5 - 1 unit: 1.5 - 3 hours lab.
Advisory: Good general health; absence of medical conditions that would prevent physical activity.
This is a fitness class requiring three workouts per week. The equipment (single station exercise machines) and routine utilized in the fitness lab are designed to exercise all major muscle groups for a well-rounded fitness program with the non-athletic in mind. In addition to regular students, circuit training has proven especially beneficial for women, older men, and others not interested in weight training but who desire increased muscle tone and cardiovascular fitness. This course may be repeated three times. (1/06)

PHED-10D  WEIGHT TRAINING
0.5 - 1 unit: 1.5 - 3 hours lab.
Advisory: Good general health; absence of medical conditions that would prevent planned physical activity.
This is an open-laboratory experience for those people who desire an individualized strength program using a combination of exercise machines and free weights. This class is designed specifically to improve strength. The class is suited for athletes and men and women of all age groups who are interested in muscle toning and muscle building. This course may be repeated three times. (1/06)

PHED-10E  FITNESS THROUGH ACTIVITY
0.5 - 1 unit: 1.5 - 3 hours lab.
Advisory: Good general health; absence of medical conditions that would prevent planned physical activity.
Students will attain optimal levels of fitness by applying techniques used in a variety of team and/or individual activities. Drills and activities closely emulate actual conditions of competition performance. This course may be repeated three times. (1/06)

PHED-10F  FLEXIBILITY AND CARDIOVASCULAR FITNESS
2 units: 6 hours lab. Prerequisite/Advisory: None.
Practical applications of all aspects of flexibility and cardiovascular conditioning are presented and performed. A system of class presentation is used to insure a gradual, safe, and total physiological adaptation of the student to exercise. A gradual, progressive, safe, and eventually total body fitness experience is pursued. Geriatric fitness adaptations are emphasized. The course may be repeated three times. (3/00)

PHED-10G  FITNESS EVALUATION AND EXERCISE PRESCRIPTION
2 units: 1 hour lecture, 3 hours lab.
Prerequisite/Advisory: None.
Students in this physiologically-based program will receive individualized exercise programs based on results obtained from tests administered in the fitness laboratory. Tests given include VO2, strength, flexibility, body fat, cholesterol level, and nutritional analysis. In addition to fitness evaluation and exercise prescription, the course will include lectures, consultations, and demonstrations on a variety of physiologically-based exercise and nutrition material. Lab fees will be charged for some optional tests.

PHED-10H  WALKING FOR CARDIOVASCULAR CONDITIONING AND FLEXIBILITY
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This course is designed to improve cardiovascular efficiency, flexibility and strength through use of walking and related activities. Students will use the latest research techniques to improve knowledge of walking activities. This course may be repeated three times. (12/99)

PHED-11A  BADMINTON
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is a course teaching basic skills of badminton. The following shots, backhand and forehand smash, overhead clear, drop shot and serve, will be covered along with rules and strategy of the game. Class play will consist of singles, doubles, mixed doubles, and tournaments. This course may be repeated three times. (9/99)

PHED-11B  RACQUETBALL
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is an introductory course in racquetball that teaches the basic strokes, scoring, and strategy. Class play will consist of singles, doubles and tournaments. This course may be repeated three times. (9/99)

PHED-11C  TENNIS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This course will teach beginning, intermediate, and advanced skills of tennis including gripping the racket, body positioning, footwork, swing, and follow through. Also introduced will be the forehand drive, backhand drive, and the serve. The volley and half volley will be added, as well as the drop shot and underhand serve. Drills and actual game participation are emphasized. History, rules, scoring, and tennis etiquette are also taught. This course is repeatable three times. (9/99)

PHED-11D  GOLF
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
Through lecture, demonstration, video tapes, and drills, the basic, intermediate, and advanced principles of the golf swing will be studied and analyzed, as well as the principles of golf. The design of the golf course will be studied in addition to the types of equipment. Golf course and player etiquette will be stressed in addition to the rules of golf. The class is conducted as an instructional league. Class play will consist of singles, doubles, mixed doubles, and tournaments. This course is repeatable three times. (9/99)

PHED-11E  BOWLING
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is an introductory course in bowling that teaches delivery, scoring, and rules. The class is conducted as an instructional league. This course may be repeated three times. (9/99)

PHED-12A  BASEBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This is a course designed to teach fundamentals of baseball. Batting, throwing, catching, base running, team play, rules, and strategy will be covered in the class. Team competition is also included. This course may be repeated three times. (9/99)

PHED-12B  BASKETBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This course offers the student opportunity to develop and improve fundamental skills involved in basketball, such as ball handling, shooting, defensive and offensive tactics, and physical endurance. Rules, strategy and sportsmanship are also stressed. This course may be repeated three times. (9/99)
PHED-12C FOOTBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This course offers the student opportunity to develop and improve the fundamental skills involved in football, such as passing, receiving, kicking, blocking (with the aid of blocking dummies), team play, and strategy. Rules and class competition will also be included. This course may be repeated three times. (9/99)

PHED-12D SOCCER
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This is a course designed to present basic fundamentals, tactics, and techniques of soccer with emphasis on learning through playing. Rules, strategy, and class competition will be included. This course may be repeated three times. (9/99)

PHED-12E VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
The course begins with basic skills and court positions necessary to enjoy the sport. Intermediate and advanced skills and court positions are introduced as the level of ability of the class will allow, with classes progressing to playing multiple offenses. Each class session begins with warm-up exercises and "dry-land" drills. The skill period ends with class participation in a volleyball match. This course may be repeated three times. (9/99)

PHED-12F RECREATION VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
Recreation volleyball is designed to develop, through participation in team play, the basic skills and strategy of the sport. History, rules, officiating, and etiquette will be included. This course may be repeated three times. (9/99)

PHED-12G INTRAMURAL ACTIVITIES
0.5 unit: 1.5 hours lab.
Prerequisite/Advisory: None.
This course is designed to allow all students opportunity to engage in a variety of competitive sports and activities in an intramural environment. This course may be repeated three times. (9/99)

PHED-12H SOFTBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This is a course designed to teach fundamentals of softball. Batting, throwing, catching, base running, team play, rules, and strategy will be covered. Team competition is also included. This course may be repeated three times. (9/99)

PHED-12I AQUATICS
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This introductory course for non-swimmers or those with limited skills in swimming. Basic swimming strokes taught will be the crawl, back crawl, elementary backstroke, breaststroke, basic front dive, underwater swimming, and other related aquatic skills. May be repeated three times. (4/05)

PHED-12J DIVING
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
Basic techniques of diving are presented in this course, which includes approach, position, and form of water entry for front, reverse, inward and twisting dives. This course may be repeated three times. (3/00)

PHED-12K SWIMMING SKILLS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This course will include isometric calisthenics and aerobic types of exercise performed in water to increase one's strength, flexibility, and cardiovascular fitness. No swimming skills are required, as exercises are done in waist- to chest-deep water. Water games, relays, and music will add further interest to the exercising. Both swimmer and non-swimmer will benefit from this class. This course may be repeated three times. (10/99)

PHED-12L VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
The course begins with basic skills and court positions necessary to enjoy the sport. Intermediate and advanced skills and court positions are introduced as the level of ability of the class will allow, with classes progressing to playing multiple offenses. Each class session begins with warm-up exercises and "dry-land" drills. The skill period ends with class participation in a volleyball match. This course may be repeated three times. (9/99)

PHED-12M RECREATION VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
Recreation volleyball is designed to develop, through participation in team play, the basic skills and strategy of the sport. History, rules, officiating, and etiquette will be included. This course may be repeated three times. (9/99)

PHED-12N INTRAMURAL ACTIVITIES
0.5 unit: 1.5 hours lab.
Prerequisite/Advisory: None.
This course is designed to allow all students opportunity to engage in a variety of competitive sports and activities in an intramural environment. This course may be repeated three times. (9/99)

PHED-12O SOFTBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This is a course designed to teach fundamentals of softball. Batting, throwing, catching, base running, team play, rules, and strategy will be covered. Team competition is also included. This course may be repeated three times. (9/99)

PHED-12P AQUATICS
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This introductory course for non-swimmers or those with limited skills in swimming. Basic swimming strokes taught will be the crawl, back crawl, elementary backstroke, breaststroke, basic front dive, underwater swimming, and other related aquatic skills. May be repeated three times. (4/05)

PHED-12Q DIVING
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
Basic techniques of diving are presented in this course, which includes approach, position, and form of water entry for front, reverse, inward and twisting dives. This course may be repeated three times. (3/00)

PHED-12R SWIMMING SKILLS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This course will include isometric calisthenics and aerobic types of exercise performed in water to increase one's strength, flexibility, and cardiovascular fitness. No swimming skills are required, as exercises are done in waist- to chest-deep water. Water games, relays, and music will add further interest to the exercising. Both swimmer and non-swimmer will benefit from this class. This course may be repeated three times. (10/99)

PHED-12S VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
The course begins with basic skills and court positions necessary to enjoy the sport. Intermediate and advanced skills and court positions are introduced as the level of ability of the class will allow, with classes progressing to playing multiple offenses. Each class session begins with warm-up exercises and "dry-land" drills. The skill period ends with class participation in a volleyball match. This course may be repeated three times. (9/99)

PHED-12T RECREATION VOLLEYBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
Recreation volleyball is designed to develop, through participation in team play, the basic skills and strategy of the sport. History, rules, officiating, and etiquette will be included. This course may be repeated three times. (9/99)

PHED-12U INTRAMURAL ACTIVITIES
0.5 unit: 1.5 hours lab.
Prerequisite/Advisory: None.
This course is designed to allow all students opportunity to engage in a variety of competitive sports and activities in an intramural environment. This course may be repeated three times. (9/99)

PHED-12V SOFTBALL
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
This is a course designed to teach fundamentals of softball. Batting, throwing, catching, base running, team play, rules, and strategy will be covered. Team competition is also included. This course may be repeated three times. (9/99)

PHED-13A BEGINNING SWIMMING
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is an introductory course for non-swimmers or those with limited skills in swimming. Basic swimming strokes taught will be the crawl, back crawl, elementary backstroke, breaststroke, basic front dive, underwater swimming, and other related aquatic skills. May be repeated three times. (4/05)

PHED-13B LIFEGUARD TRAINING
2 units: 1.5 hours lecture, 1.5 hours lab.
Limitation on Enrollment: Students must pass the American Red Cross Swimming requirement.
Advisory: PHED-13H.
This course teaches theory and analysis of advanced swimming skills, instruction and certification in lifesaving, Title 22 (First Aid), and cardiovascular resuscitation. A course recommended for anyone who wishes to become a lifeguard, it may be repeated one time. (4/05)

PHED-13C WATER CALISTHENICS
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This course may be repeated three times. (4/05)

PHED-13D FITNESS THROUGH AQUATICS
1 unit: 3 hours lab.
Advisory: PHED-13A.
The course is a personal fitness program designed to use swimming as a method to reach a desired level of cardiovascular fitness. May be repeated three times. (4/01)

PHED-13E WATER SAFETY INSTRUCTION
2 units: 1.5 hours lecture, 1.5 hours lab.
Limitations on enrollment: This class is limited to those students who have completed the American Red Cross Water Safety course or PHED-13B (Life Guard Training) or PHED-13H (Swimming Skills). Minimum age requirement for this course is seventeen.
This course is designed to certify students who complete all required work as certified Red Cross swimming instructors. It includes instruction in teaching techniques, stroke analysis, skilled swimming, class organization, and pool safety. There will be practice teaching assignments with peers and a practical and written final. The course may be repeated one time. This course is offered during spring semester only. (3/00)

PHED-13F WATER POLO
1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisory: PHED-13A.
This course is designed to develop the basic skills, rules, and strategy of water polo. Opportunity will be given for class participation through which students will increase their swimming skills and conditioning. This course may be repeated three times. (3/00)

PHED-13G DIVING
1 unit: 0.5 hour lecture: 1.5 hours lab.
Advisory: PHED-13A.
Basic techniques of diving are presented in this course, which includes approach, position, and form of water entry for front, reverse, inward and twisting dives. This course may be repeated three times. (3/00)

PHED-13H SWIMMING SKILLS
1 unit: 0.5 hour lecture: 1.5 hours lab.
Advisory: PHED-13A.
The course will include review of fundamental swimming strokes and skills. Additional strokes taught will include the butterfly, inverted breaststroke, overarm sidestroke, and trudgen strokes. Also included in the course will be shallow dives, flip turns, treading water, and underwater skills. This course may be repeated three times. (4/05)
PHED-14A DANCE CHOREOGRAPHY (Also: DNCE-14A)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is a course teaching the student of dance how to use "language of the body" to communicate an idea, theme, or story. Utilizing time, space, and energy, the student learns to conceive, develop, and put movements together. May be repeated three times.

PHED-14B MODERN DANCE (Also: DNCE-14B)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is a course designed for the students to express themselves creatively through various modern dance forms, and to increase skills of body posture, flexibility, coordination, and strength. Students will study technical components which include time, effort and kinetic awareness. May be repeated three times.

PHED-14C BALLET (Also: DNCE-14C)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite/Advisory: None.
This is a course designed to teach the basic steps and skills of ballet. Students will have the opportunity to learn and perform routines. History and terminology will also be covered. May be repeated three times.

PHED-14D1 BEGINNING JAZZ DANCE (Also: DNCE-14D1)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
This is a course designed to introduce the basic techniques, rhythms, and combinations of jazz movement. The class will include stretching exercises, coordination exercises, and general body conditioning exercises. This course may not be repeated. (3/06)

PHED-14D2 INTERMEDIATE JAZZ DANCE
(Also: DNCE-14D2)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite: PHED-14D1. Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
Students will be introduced to intermediate dance techniques. Basic skills will be reviewed along with an emphasis on conditioning and flexibility. Additional technical study includes double pirouettes, chaîne and piqué turns. Students will be required to develop and perform short routines in class. This course may not be repeated. (3/06)

PHED-14D3 ADVANCED JAZZ DANCE (Also: DNCE-14D3)
1 unit: 0.5 hour lecture, 1.5 hours lab.
Prerequisite: PHED-14D2. Advisories: Good general health; absence of medical conditions that would prevent planned physical activity.
This course emphasizes advanced conditioning, control, stage presence and dance quality performances. Students must be available for rehearsal and performances of productions to which they may be assigned. This course may not be repeated. (3/06)

ADAPTIVES

PHED-15 ADAPTED PHYSICAL EDUCATION
1 unit: 3 hours lab.
Prerequisite/Advisory: None.
Adapted Physical Education provides individual instruction for the physically disabled student or other students requiring individual approaches to health-related fitness activities. Students will engage in health-building activities designed to create self confidence, enhanced self image, and physical independence. May be repeated three times.
PHSC-01 INTRODUCTION TO PHYSICAL AND EARTH SCIENCE
(CSU breadth area B1) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41; MATH-A or MATH-B.
This is an introductory course presenting the nature of physical, earth, and space sciences and their relationship to other areas of scientific knowledge. The course will develop the major concepts and give an understanding of the general principles of physical, earth, and space science. As an introductory class, the course of study will focus on major principles and applications to modern observations and phenomena. This course is designed to meet the content requirement for physical science and for earth and space science for the Liberal Studies - Elementary Teaching preparation pathway. (12/04)

PHSC-01L INTRODUCTION TO PHYSICAL AND EARTH SCIENCE LABORATORY
(CSU breadth area B1) 1 unit: 3 hours lab.
One-way corequisite: PHSC-01. Advisories: ENGL-A, ENGL-41; MATH-A or MATH-B.
This introductory laboratory is designed to provide hands-on exploration in parallel with topics covered in the lecture course, PHSC-01. Emphasis will be placed on 1) classical science experimentation, 2) laboratory activities in the real world, and 3) support of the laboratory activities through use of modern technology. Students planning on becoming K-12 teachers will find materials applicable to their future profession. (03/05)

PHYSICS
(Science, Math and Engineering Division)

PHYS-02A GENERAL PHYSICS (CAN PHYS 2)
(CSU breadth area B1/B3) 4 units: 3 hours lecture, 3 hours lab. Prerequisite: MATH-02, or MATH-25 and MATH-26. Advisories: ENGL-A, ENGL-41.
This course is intended for students other than physics and engineering majors. PHYS-02A is the first semester of a one-year physics course designed to develop major concepts and give an understanding of general principles of physics. This course will also try to relate physics to other areas of knowledge and discussion in science in general, and physics specifically, as part of the concept of culture and time. The development of ideas will begin with those of Aristotle and terminate with present-day concepts of the atom and nucleus. PHYS-02A will emphasize the universe, motion, forces in nature, energy, fields, conservation laws, waves, sound, light, and thermal phenomena. (3/00)

PHYS-02B GENERAL PHYSICS (CAN PHYS 4)
4 units: 3 hours lecture, 3 hours lab. Prerequisite: PHYS-02A. Advisories: ENGL-A, ENGL-41.
PHYS-02B is a continuation of PHYS-02A with emphasis on electricity, magnetism, radiation, relativity, atomic and nuclear processes, astrophysics, cosmology, and a look toward the future. (3/00)

PHYS-04A PHYSICS (CAN PHYS 8)
(CSU breadth area B1/B3) 4 units: 3 hours lecture, 3 hours lab. Prerequisite: MATH-04A. One-way corequisite: MATH-04B. Advisories: ENGL-A, ENGL-41.
This course is a calculus-based physics course intended for physics and engineering majors as well as some chemistry and math majors. PHYS-04A is the first semester of a three-semester sequence intended to give a technical introduction to physics with emphasis on concepts and principles of physics and problem-solving. PHYS-04A includes the areas of mechanics, wave motion, fluids, and thermal phenomena. (3/00)

PHYS-04B PHYSICS (CAN PHYS 12)
4 units: 3 hours lecture, 3 hours lab. Prerequisite: MATH-04B; PHYS-04A. One-way corequisite: MATH-04C. Advisories: ENGL-A, ENGL-41.
PHYS-04B is a continuation of PHYS-04A with emphasis on the areas of electricity, magnetism, and light. (3/00)

PHYS-04C PHYSICS (CAN PHYS 14)
4 units: 3 hours lecture, 3 hours lab. Prerequisite: PHYS-04B. Advisories: ENGL-A, ENGL-41.
PHYS-04C is a continuation of PHYS-04B. It emphasizes the laws of thermodynamics, relativity, and topics of modern physics. (3/00)

PHYS-10 CONCEPTS IN PHYSICS
(CSU breadth area B1) 3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-41; MATH-A or MATH-B.
This course will present the concepts, as well as the understanding of general principles, will be developed through lecture, demonstrations, and discussion of everyday phenomena. Both classical and modern topics will be covered, to include mechanics, properties of matter, heat, sound, electricity, magnetism, light, atomic and nuclear physics, relativity, and astrophysics. This course provides an opportunity to work with the concepts of physics in a qualitative manner. (3/00)

PHYSIOLOGY
(Science, Math and Engineering Division)

PHYO-01 PRINCIPLES OF PHYSIOLOGY
(CSU breadth area B2/B3) 4 units: 3 hours lecture, 3 hours lab. Prerequisites: ANAT-25 or BIOL-01; CHEM-02A. Advisories: ENGL-A, ENGL-41.
This course is a general lecture and laboratory course in human physiology, including a study of blood and circulation, respiration, muscle activity, endocrine glands, digestion, excretion, and the functions and activities of the brain, nerves, and sense organs. (11/03)
PLANT SCIENCE (Agriculture Division)

PLSC-10 ELEMENTS OF PLANT SCIENCE (CAN AG 8)
(CSU breadth area B2/B3) 3 units: 2 hours lecture, 3 hours lab.
Advisories: ENGL-81, ENGL-84.
This course is designed to provide the student with a working knowledge of fundamental structures and processes of plants. Principles to be applied cover plant structures, physiology, heredity, environmental relationship to growth, adaptation, and management of crops. Techniques of research, exploration of plant growth, and identification of economical crops will be included. (3/00)

PLSC-12 WEEDS
3 units: 3 hours lecture. Advisory: ENGL-81, ENGL-84.
This is a study of classification, identification, and life cycle of common and poisonous weeds in California which are detrimental to cultivated crops, grasslands, animals, and man. Management practices include prevention and mechanical, biological, and chemical methods. Weed establishment and chemical resistance are also covered. (3/00)

PLSC-13 ECONOMIC ENTOMOLOGY
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84.
This course will cover insects and mites of economic importance to agriculture. Morphology, taxonomy, identification, life cycles, hosts, habitat relationships, and control methods will be discussed. Collection and labeling of specimens will be required. (3/00)

PLSC-16 PLANT PROPAGATION
3 units: 2 hours lecture, 3 hours lab.
Prerequisite/Advisory: None.
This course teaches principles of sexual and asexual propagation, seeding, cuttings, grafting, layering, specialized plant structures for propagation, propagation media, and rooting aids.

PLSC-49 PLANT SCIENCE: PROBLEMS
2 units: 6 hours lab.
Advisories: ENGL-81, ENGL-84.
This course will offer students opportunity for investigating a deeper interest in the field of Plant Science. Interest areas will include but not be limited to crop breeding, propagation, crop production, student projects, greenhouse management, soil management, and soil testing. (4/00)

PLSC-70 A-Z SPECIAL TOPICS IN PLANT SCIENCE
.5 - 4 units: 0.5 - 4 hours lecture, 1.5 - 12 hours lab.
Prerequisite/Advisory: None.
This course is the study of basic principles, processes, and theories of the special topic being presented during this semester.

PLSC-71 A-Z TOPICS IN AGRICULTURAL PEST CONTROL UPDATING
1 unit: 18 total hours lecture.
Prerequisite/Advisory: None.
This mini-course is designed to meet continuing education requirements for Agricultural Pest Control Advisors (P.C.A.), Qualified Agricultural Applicator Licensees (Q.L.), and the Qualified Applicator certificate as set forth by the California Department of Food and Agriculture (C.D.F.A.). Topics to be covered, but not restricted to plant science, are laws and regulations; pesticide management; insects, mites and other invertebrates; defoliation and plant growth regulators; nematodes; plant diseases; vertebrate pest control; and equipment and applicator safety. All topics of the course shall relate to the realm of Integrated Pest Management. This course is continually updated with the changes in laws and practices, and is presented each fall and spring semester. Each course offering must be approved by the regional continuing education accreditation committee and assigned an accreditation number as established by the C.D.F.A. (This course is offered on a credit/no credit basis.)

POLITICAL SCIENCE (Social Science Division)

POSC-01 ESSENTIALS OF THE AMERICAN POLITICAL SYSTEM (CAN GOVT 2)
(CSU breadth area D8) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course will introduce students to institutions of American national government, the American political system, and California state and local government. The course includes a study of the United States Constitution and its application to federal, state, and local government. Emphasis is placed upon various roles of national and state government, constitutional rights and obligations of citizens, and the evolution and development of California state political institutions. This course meets the United States Constitution requirement and the federal, California state, and local government requirement. (5/03)

POSC-02 AN INTRODUCTION TO WORLD POLITICAL SYSTEMS
(CSU breadth area D8) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is a comparative study of the theory, history, structure, and application of the governmental systems of major European nations, as well as non-European countries. Emphasis will be placed on the governments of England, France, Germany, Russia, and Japan. (2/06)

PSYCHOLOGY (Social Science Division)

PSYC-01A INTRODUCTION TO PSYCHOLOGY (CAN PSY 2)
(CSU breadth area D9) [CILC area E] 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
PSYC-01A is a survey course designed to provide introduction to facts and theories underlying human behavior. Special emphasis is given to the following topics: schools of psychology, physiological factors, sensation, perception, motivation, learning, thinking, emotion, abnormal behavior, personality, heredity, environment, and social factors. (12/02)

PSYC-01AH HONORS INTRODUCTION TO PSYCHOLOGY
(CSU breadth area D9) [CILC area E] 3 units: 3 hours lecture.
Limitation on enrollment: Enrollment in the Honors Program. See the current college catalog for a description of enrollment requirements. Advisories: ENGL-01A, ENGL-41.
PSYC-01AH is an in-depth survey course designed to provide an introduction to facts and theories underlying human behavior. Special emphasis is given to the following topics: schools of psychology, physiological factors, sensation, perception, motivation, learning, thinking, emotion, abnormal behavior, personality, heredity, environment, and social factors. There will also be an emphasis on research, writing, and critical thinking. (2/06)
PSYC-01B INTRODUCTION TO PSYCHOLOGICAL METHODS
[CLIL area E] 3 units: 3 hours lecture.
Prerequisite: PSYC-01A or PSYC-01AH.
This course is a continuation of PSYC-01A with emphasis on psychological theory and a detailed treatment of the scientific method as applied to the study of human behavior. Experimental design, basic assumptions, and limitations and advantages of the experimental method are considered along with an introduction to descriptive and inferential statistics. (1/05)

PSYC-09 HUMAN DEVELOPMENT (Also: CLDV-09)
(CSU breadth area E) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is an introduction to the scientific study of human development from conception through death. It examines the interplay of biological, psychological, social, and cultural forces on the developing human being. (10/99)

PSYC-10 SELECTED TOPICS IN PSYCHOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
Students will study selected topics in one of the major content areas of psychology (for example, the psychology of women or theories of personality). The psychology of women will be used as an illustration for this outline; outlines for additional categories are available in the division office. (9/99)

PSYC-22 HUMAN SEXUALITY
(CSU breadth area E) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course explores the psychology of human sexuality. Biological, psycho-social, and socio-cultural research is presented concerning all aspects of human sexuality in contemporary society. Specific topics include human development and sexuality, sexual orientation and behavior, contraception and sexually transmitted infections, sexual dysfunction, and prostitution. (1/05)

PSYC-23 PERSONAL AND SOCIAL ADJUSTMENT
(CSU breadth area E) 3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
PSYC-23 is a course which examines personality factors as they relate to problems of growth and adjustment. Concepts covered in the course are personality development, psychological bases of behavior, mental health, and interpersonal relations. Stress is placed on the importance of applying therapeutic principles and techniques in everyday life. (3/03)

PSYC-29 CHILD GROWTH AND DEVELOPMENT
(Also: CLDV-29) (CAN FCS 14)
3 units: 3 hours lecture.
Advisory: ENGL-A.
The growth and development patterns of all children from prenatal life through adolescence will be studied. There will be a strong integration of theory and practice. There will be directed observations of children from newborn through adolescence. (11/05)

PSYC-33 WORKING EFFECTIVELY WITH FAMILIES
(Also: CLDV-33 and SOC-33)
1 unit: 1 hour lecture.
Advisory: ENGL-A.
This is a course designed to teach students how to work with parents in school settings. Students will examine current ways of parent involvement, parent rights and responsibilities, and ways of keeping parents informed. (11/05)

PSYC-51 APPLIED PSYCHOLOGY
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-41.
This course is designed to provide an introduction to the principles of human behavior and personality development, and their application to daily problems. Special emphasis will be given to the following topics: self-esteem, personality, learning and self-management, motives and values, emotions, attitudes, life-span development, interpersonal relationships, and psychological wellness. (11/04)

PSYC-80 PSYCHOLOGY IN EVERYDAY LIFE
3 units: 3 hours lecture.
Advisories: ENGL-A, ENGL-AL, ENGL-41, ENGL-41L.
This course will examine psychological issues pertinent to re­entry students. Emphasis will be on learning practical problem-solving approaches, improving academics, self-confidence, and communication skills. In addition, the course will explore common psychological problems. (10/99)

RADIOLOGIC TECHNOLOGY
(Allied Health Division)
RADT-40 RADIATION PHYSICS
4 units: 3 hours lecture, 3 hours lab.
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program. Prerequisite: MATH-A or MATH-B.
Advisory: CHEM-02A.
This course covers the theory and application of basic physics and radiation physics to diagnostic radiology. Emphasis will be the fundamentals of x-ray generating equipment and the production, emission, and interaction with matter of x-rays. The laboratory portion of this course will focus on solving radiographic technique problems and verification of the basic laws of physics. This course is part of the second semester of the 29-month program in Radiologic Technology, and is only offered during spring semester. (4/00)

RADT-41 BASIC RADIOLOGIC TECHNOLOGY
4 units: 3 hours lecture, 3 hours lab.
Prerequisites: ALLH-67; COOP-41A. Limitation on enrollment: Selection to the Radiologic Technology program.
This course covers an overview of radiography and its role in health care delivery. Students will be oriented to academic and administrative structure, key departments and personnel, and to the profession as a whole. Emphasis will be placed on a review of medical terminology with a focus on its use in a medical imaging environment and communication techniques, including Spanish for medical personnel. Basic principles of radiation protection and computer literacy will also be identified. The laboratory portion of this course will include routine and emergency patient care procedures, introduction to darkroom procedures, ethical and legal responsibilities of the professional relative to health care delivery, and a student orientation in use of the library and available library materials. This course is part of the first semester of a 29-month program in Radiologic Technology, and is only offered during fall semester. (3/00)

RADT-42 PRINCIPLES OF RADIOLOGIC TECHNOLOGY I
4 units: 3 hours lecture, 3 hours lab.
Limitations on enrollment: Selection to the RADT Program; minimum of 2.35 GPA in prerequisite courses. Prerequisites: ANAT-25; ENGL-A, ENGL-41, ENGL-41L.
This course is designed to provide closer examination and understanding of human anatomy as it relates to radiographic anatomy and positioning of the thoracic viscera, abdomen, upper extremities, shoulder girdle, lower extremities, hip and pelvis, and upper gastrointestinal tract. The laboratory portion of this course will include positioning exercises and film evaluation of these
areas to achieve both accuracy and speed. This course is part of the first semester of a 29-month program in Radiologic Technology and is offered only during fall semester.  (4/00)

RADT-43A PRINCIPLES OF RADIOLOGIC TECHNOLOGY II
4 units: 3 hours lecture, 3 hours lab.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course covers basic radiographic anatomy and positioning of the lower gastrointestinal tract, gallbladder, urinary system, vertebral column, bony thorax, cranium, long bone measurements, foreign body localization, and trauma guidelines. The laboratory portion of this course will include positioning exercises and film evaluation of these areas to achieve both accuracy and speed. This course is part of the second semester of a 29-month program in Radiologic Technology and is only offered during spring semester. (3/00)

RADT-43B CLINICAL EDUCATION I
4 units: 12 hours lab (216 total hours).  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.  Two-way corequisite: RADT-43A.
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the second semester of a 29-month program in Radiologic Technology and is only offered during spring semester. (3/00)

RADT-44A PRINCIPLES OF RADIOGRAPHIC EXPOSURE
2 units: 27 total hours lecture, 27 total hours lab.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course covers theory and application of factors that govern and influence the production of the radiographic image on radiographic film. The evaluation of radiographic systems to assure consistency in the production of quality images will also be introduced. The laboratory component of this course will provide "live lab" experience conducting radiation exposure experiments that demonstrate clinical applications of the theoretical principles and concepts presented. This course is part of the first summer session of a 29-month program in Radiologic Technology and is offered only during summer session, approximately 12 weeks in duration. (3/00)

RADT-44B CLINICAL EDUCATION II
4 units: 216 total hours lab.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the first summer session of a 29-month program in Radiologic Technology and is offered only during summer session, approximately 12 weeks in duration. (3/00)

RADT-45A PRINCIPLES OF RADIOLOGIC TECHNOLOGY III
3 units: 2 hours lecture, 3 hours lab.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course covers advanced radiographic positioning of the skull, non-vascular advanced procedures, and special x-ray equipment and procedures. The laboratory portion will include positioning exercises and film evaluation of these areas to achieve both accuracy and speed. Appropriate experiments using phantom parts utilizing the tomographic unit will be demonstrated. This course is part of the third semester of a 29-month program in Radiographic Technology and is only offered during fall semester. (4/00)

RADT-45B CLINICAL EDUCATION III
7 units: 21 hours lab (378 total hours).  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the third semester of a 29-month program in Radiologic Technology and is only offered during fall semester. (3/00)

RADT-67A ADVANCED RADIOLOGIC PROCEDURES I
2 units: 2 hours lecture.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course covers vascular special procedures including anatomy and special equipment. Equipment and applications of the following imaging modalities will also be studied: digital vascular imaging, computerized tomography, magnetic resonance imaging, ultrasonography, cardiac catheterization, and interventional radiology. This course is part of the fourth semester of a 29-month program in Radiologic Technology and is only offered during spring semester. This course is the first of three phases of internship. (3/00)

RADT-67B ADVANCED CLINICAL EDUCATION I
10 units: 540 total hours lab.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the fourth semester of a 29-month program in Radiologic Technology and is only offered during spring semester. This course is the first of three phases of internship. (3/00)

RADT-67C RADIOGRAPHIC PATHOLOGY
1 unit: 1 hour lecture.  
Limitation on enrollment: Satisfactory progression in the Radiologic Technology program.
The course presents an introductory study of basic disease processes, the nature and causes of disease and injury, and their related radiographic significance. This course is part of the fourth semester of a 29-month program in Radiologic Technology and is only offered during spring semester. This course is the first of three phases of internship. (3/00)
Radt-68A Principles of Radiation Protection and Biology

2 units: 36 total hours lecture.

Limitation on enrollment: Enrollment in the Radiologic Technology program.

The course covers principles of radiation protection and cell radiation interaction. The course will present and discuss radiation protection responsibility by the radiographer to patients, personnel, and the public; maximum permissible dose and regulatory involvement; radiation effects on cells and factors affecting cell response; and acute and chronic effects of radiation. This course is part of the second summer session of a 29-month program in Radiologic Technology and is offered only during summer session, approximately 12 weeks in duration. This course is the second of three phases of internship. (5/01)

Radt-68B Advanced Clinical Education II

7 units: 378 total hours lab.

Limitation on enrollment: Enrollment in the Radiologic Technology program.

This course provides clinical experience for re-application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the second summer session of a 29-month program in Radiologic Technology and is offered only during summer session, approximately 12 weeks in duration. This course is the second of three phases of internship. (5/01)

Radt-69A Integrative Study in Radiologic Technology

2 units: 2 hours lecture.

Limitation on enrollment: Enrollment in the Radiologic Technology program.

This course covers a comprehensive analysis and assessment of all previous radiologic technology instructional course work in preparation for writing the state certification and national registry examinations. Job market readiness skills will also be presented. This course is part of the fifth semester of a 29-month program in Radiologic Technology and is only offered during fall semester. (5/01)

Radt-69B Advanced Clinical Education III

9 units: 486 total hours lab.

Limitation on enrollment: Enrollment in the Radiologic Technology program.

This course provides clinical experience for re-application of theoretical principles and concepts covered in previous and current didactic course work. Clinical experience in patient care and handling, positioning skills, equipment utilization, radiation protection application, work efficiency, and image evaluation is provided. This course is part of the fifth semester of a 29-month program in Radiologic Technology and is only offered during fall semester. This course is the third and last phase of internship. (5/01)

Radt-69C Sectional Anatomy for the Radiographer

1 unit: 1 hour lecture.

Limitation on enrollment: Enrollment in the Radiologic Technology program.

This course covers introduction to sectional anatomy. Emphasis will be the major anatomic structures normally seen in transverse sections. Current imaging applications will also be included. This course is part of the fifth semester of a 29-month program in Radiologic Technology and is only offered during fall semester. (5/01)

Radt-70L ABC Topics in Radiologic Technology

1-3 units: 3-9 hours lab.

Limitation on enrollment: Current or previous student in a Radiologic Technology program. (Note: The second letter designation indicates unit value, "A" being for 1 unit, "B" for 2 units, and "C" for 3 units.)

This course covers ancillary laboratory experience in an affiliated hospital or classroom/laboratory setting for those individuals seeking an expanded view of a particular area of interest. Specific areas may include cardiac catheterization, computerized axial tomography, diagnostic medical radiography, independent study, mammography, nuclear medicine, radiation oncology, and ultrasonography. Multiple sections of Radt-70LABC may be taken concurrently to provide students with required lab hours. The units for this course do not count toward graduation. (3/00)

Real Estate (Business Division)

Real-42 Real Estate Principles

3 units: 3 hours lecture.

Advisories: ENGL-81, ENGL-84.

This course is an analysis of principles of real estate in California, history of California real estate, property, contracts, agencies, listings, real estate financing, deeds, liens and encumbrances, escrows and title insurance, land descriptions, real estate mathematics, and real estate licensing and state regulations. (12/03)

Real-43 Real Estate Practices

3 units: 3 hours lecture.

This course is a practical applied study and analysis of money markets, interest rates, and real estate financing. Actual case illustrations will demonstrate lending policies, and problems and rules involved in financing real property, including residential, multi-family, commercial, and special purpose properties. (12/98)

Real-44 Legal Aspects of Real Estate

3 units: 3 hours lecture.

This class is a practical applied study of California real estate law intended to be of help in avoiding legal difficulties which can arise in connection with real estate transactions. (12/98)

Real-45 Real Estate Finance

3 units: 3 hours lecture.

This course is a practical applied study and analysis of money markets, interest rates, and real estate financing. Actual case illustrations will demonstrate lending policies, and problems and rules involved in financing real property, including residential, multi-family, commercial, and special purpose properties. (12/98)

Real-46 Real Estate Appraisal

3 units: 3 hours lecture.

This course explains methods and techniques for analyzing data used in the valuation of real property. Case study methods are employed; field work and demonstration and/or form appraisal reports are required. Principles and theories of real estate valuations, as well as the approaches to value (cost, market, income) are studied with an emphasis on residential properties. (12/98)
### Merced College 2006-2007 Catalog  
#### Course Descriptions

**REAL-48 REAL PROPERTY MANAGEMENT**  
3 units: 3 hours lecture.  
This course provides a practical approach to management of developed real estate. Emphasis is given to economics of real estate; neighborhood analysis and rent schedules; management procedures; selection of personnel; contracts and purchasing; interior and exterior maintenance repair; leasing, advertising, and publicity; managing family residences, apartment buildings, store buildings, office buildings, and other commercial properties; management accounting; modernization and rehabilitation; and adequate insurance plans. (12/98)

**REAL-49 ESCROW PROCEDURE**  
(Formerly REAL-49A) 3 units: 3 hours lecture.  
Prerequisite: REAL-42. Advisories: ENGL-81, ENGL-84. This course covers the principles and procedures involved in the process of opening and closing real estate escrow transactions. The course will define legal documents and terminology used in escrow procedure as well as explain the processing of documents and transfer of title combined with sale and closing procedures for several different types of escrows. (1/04)

**RECREATION**  
*(Life Fitness and Health Division)*

**RECR-30 INTRODUCTION TO COMMUNITY RECREATION (CAN REC 2)**  
3 units: 3 hours lecture. Advisory: ENGL-84. This class teaches a general orientation to the field of recreation and parks. It will include a history of the recreation profession, recreational and leisure services, a description of recreational forms, and the nature, scope, and significance of leisure, and recreation as a social force in contemporary society. Emphasis is placed on the role of the professional leader in a variety of settings. (3/00)

### SCIENCE  
*(Science, Math and Engineering Division)*

**SCI-30ABCD (1-3) SCIENCE LABORATORY EXPERIENCE**  
1 - 3 units: 3 - 9 hours lab.  
(Note: The number designation following the letter indicates unit value, "1" being for 1 unit, "2" for 2 units, and "3" for 3 units.)  
This course consists of special projects for students desiring hands-on experience in lab operation and/or techniques. Each letter (i.e., A, B, C, or D) may be taken only once.

**SCI-39ABC SPECIAL TOPICS IN SCIENCE**  
1 - 3 units: 3 - 9 hours lab. Limitation on enrollment: Nine students per semester. (Note: SCI-39A is for 1 unit, SCI-39B for 2 units, and SCI-39C is for 3 units.)  
This course consists of special projects for advanced students in science. (3/00)

### SOCIAL SCIENCE  
*(Social Science Division)*

**SCSC-01 INTRODUCTION TO SOCIAL SCIENCE**  
(CSU breadth area D7) 3 units: 3 hours lecture.  
Advisories: ENGL-A, ENGL-41.  
Introduction to Social Science offers an interdisciplinary view of society and of the individual. The course studies effects of technology, ideology, and historical experience on institutional and personal behavior. In addition, the course surveys important knowledge and research in the fields of anthropology, economics, education, history, political science, psychology, and sociology. (3/06)

### SOCIOLOGY  
*(Social Science Division)*

**SOC-01 INTRODUCTION TO SOCIOLOGY (CAN SOC 2)**  
(CSU breadth area D0) 3 units: 3 hours lecture.  
Advisories: ENGL-01A, ENGL-41.  
This course provides an introduction into what it means to be "sociologically mindful" and to think "sociologically" while understanding the difference from other ways of seeing the social world. The course begins with the understanding of the differences between personal troubles and public issues, and how sociologist apply various theoretical perspectives to a wide range of issues, such as: culture; socialization; social structure of society; deviance; issues of feminization; family; gender; race; inequality; economics; politics and population; and the relationship between the individual and society. The course accents international comparisons to show how similar institutions are structures and function differently in different societies around the world. (2/06)

**SOC-02 CONTEMPORARY SOCIAL PROBLEMS (CAN SOC 4)**  
3 units: 3 hours lecture.  
Advisories: ENGL-01A, ENGL-41.  
SOC-02 introduces fundamental theories and methodologies employed in the study of contemporary social problems. An emphasis is placed on analysis of causes and possible solutions to such problems as poverty, discrimination, crime, delinquency, alcoholism, drug abuse, suicide, family, and politics. A global perspective focuses on the international influences and contributions to various contemporary social problems. (2/06)

**SOC-28 MARRIAGE AND THE FAMILY**  
3 units: 3 hours lecture. Advisories: ENGL-A, ENGL-41.  
This course provides an overview of sociological theories and concepts utilized to investigate marriage and family relationships. An empirical as well as experiential analysis of marriage and family functions, structures, and roles is emphasized. Special focus is paid to contemporary issues, concerns, and debates regarding marriage and family dynamics. (2/06)

**SOC-33 WORKING EFFECTIVELY WITH FAMILIES**  
(Also: CLDV-33 and PSYC-33)  
1 unit: 1 hour lecture. Advisory: ENGL-A.  
This is a course designed to teach students how to work with parents in school settings. Students will examine current ways of parent involvement, parent rights and responsibilities, and ways of keeping parents informed. (11/05)

### SOIL SCIENCE  
*(Agriculture Division)*

**SOIL-10 SOIL SCIENCE (CAN AG 14)**  
(CSU breadth area B1/B3) 3 units: 2 hours lecture, 3 hours lab. Advisories: ENGL-A, MATH-80.  
This course provides a basic knowledge of the physical, chemical, and biological properties of soils and their characteristics. The course includes factors of fundamental soil properties, soil and plant relationships, principles of soil formation, fertilizers and soil management, salinity, pH, erosion management, and nonagricultural uses. (12/04)

**SOIL-11 FERTILIZERS AND SOIL AMENDMENTS**  
3 units: 3 hours lecture.  
This course will cover the composition, value, selection and use of fertilizer materials and soil amendments. Soil, plant, and fertilizer relationships will be covered. Application practices common to area crops and soils will be discussed. (2/90)
SONOGRAPHY, DIAGNOSTIC MEDICAL
(Allied Health Division)

SONO-36B BEGINNING CLINICAL EXPERIENCE I
9 units: 486 total hours lab. Prerequisite: SONO-46A. Two-way corequisite: SONO-36C. Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic coursework. Clinical experience in patient care and handling, scanning techniques, instrumentation, work efficiency and image evaluation for cardiac imaging is provided. This course is part of the Diagnostic Medical Sonography Program (Cardiac Track) and is only offered during the fall semester. (3/05)

SONO-36C ADVANCED ECHOCARDIOGRAPHY
4 units: 3 hours lecture, 3 hours lab. Prerequisite: SONO-46A. Two-way corequisite: SONO-36B. Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course covers advanced echocardiographic sonographic positioning and scanning protocol including transsthoracic, transesophageal, pediatric, and fetal echocardiography; related anatomy and physiology to include cardiac pathology and clinical symptomology and how they relate to the sonographic appearance of these structures. Interpretation and critique of normal and abnormal anatomy with correction of clinical, didactic and image information will be presented. The laboratory component of this course will include demonstration and scanning exercises to provide a “live lab” experience in conducting echocardiographic sonographic procedures. This course is part of the Diagnostic Medical Sonography Program (Cardiac Track). (3/05)

SONO-37A CARDIAC PHYSIOLOGY AND PRINCIPLES
2 units: 1.5 hours lecture, 1.5 hours lab. Prerequisites: SONO-40, SONO-46A. Two-way corequisite: SONO-37B.
Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course covers cardiac physiology and cardiac physics as it relates to echocardiography. The emphasis will describe the effects of pressure, loading, and volume as they relate to the following disease states: heart failure, shock, valvular stenosis and regurgitation, intracardiac shunts, pulmonary disease, pericardial disease, and cardiomyopathies. Hemodynamics, spectral Doppler, and color flow technologies will be described. The laboratory component of this course will include demonstration and scanning exercises to provide a “live lab” experience in conducting echocardiographic procedures. This course is a continuation of the Diagnostic Medical Sonography Program (Cardiac Track). (3/05)

SONO-37B BEGINNING CLINICAL EXPERIENCE II
9 units: 486 total hours lab. Prerequisite: SONO-36B. Two-way corequisite: SONO-37A. Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course provides clinical experience for application of theoretical principles and concepts covered in previous and current didactic coursework. Clinical experience in patient care and handling, scanning techniques, instrumentation, work efficiency and image evaluation for echocardiographic imaging is provided. (3/05)

SONO-38B ADVANCED CLINICAL EXPERIENCE I
4.5 units: 243 total hours lab. Prerequisite: SONO-37B. Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course provides continued clinical experience for application of theoretical principles and concepts covered in previous and current didactic coursework. Clinical experience inpatient care and handling, scanning techniques, instrumentation, work efficiency and image evaluation for cardiac imaging is provided. This course is part of the Diagnostic Medical Sonography Program (Cardiac Track). (4/05)

SONO-39B ADVANCED CLINICAL EXPERIENCE II
9 units: 486 total hours lab. Prerequisite: SONO-38B.
Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program (Cardiac Track).
This course provides clinical experience for advanced application of theoretical principles and concepts covered in previous and current didactic coursework. Clinical experience in patient care and handling, scanning techniques, instrumentation, work efficiency and image evaluation for cardiac imaging is provided. This course is part of the Diagnostic Medical Sonography Program (Cardiac Track). (4/05)

SONO-40 BASIC ULTRASOUND PHYSICS
[CILC area B] 1.5 units: 18 total hours lecture, 27 total hours lab.
Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography program. Prerequisites: MATH-A or MATH-B.; PHYS-10 or RADT-40.
This course covers basic principles and terminology of diagnostic ultrasound physics to include a review of mathematical skills, transducers, beam dynamics, and instrumentation. Hands-on instruction will be provided to introduce the student to necessary elementary skills in scanning as it pertains to the physical nature of ultrasound. This course is part of the first summer session in the 18-month program in Diagnostic Medical Sonography which runs nine weeks in duration. (1/01)

SONO-41 INTRODUCTION TO SONOGRAPHY
[CILC area B] 1.5 units: 18 total hour lecture, 27 total hours lab.
Limitations on enrollment: Completion of a two-year Allied Health program that is patient-care related, such as radiologic technology, registered nursing, respiratory therapist, physical therapy, associate degree-licensed vocational nurse, or a baccalaureate degree in biological sciences with patient care experience; minimum cumulative GPA of 2.35 in prerequisite course work; enrollment in the Sonography program. Prerequisite: ALLH-67.
This course is an overview of diagnostic medical sonography and its role in health care delivery. Students will be oriented to the academic and administrative structure of the program, clinical affiliates, and to the profession as a whole. An introduction to principles, instruments, and routine sonographic procedures will be emphasized. The laboratory portion of this course will include a hands-on orientation to the equipment and instrumentation. This course is part of the first summer session of the 18-month program in Diagnostic Medical Sonography which runs nine weeks in duration. (1/01)

</tbody>
</table>
SONO-45C  BASICS OF VASCULAR SONOGRAPHY
[CSU breadth area C2] 2 units: 1.5 hours lecture, 1.5 hours lab.
Limitation on enrollment: Satisfaction progression in the Diagnostic Medical Sonography program.
This course covers basic positioning and scanning protocol of the vascular system. Vascular terminology specific to the hemodynamics of the arterial venous and cerebrovascular application will be presented. Normal, abnormal, and pathological states of the human vascular system with emphasis on the external carotid system and the venous systems of the lower extremities will be included. The laboratory component of this course will include demonstration and scanning exercises to provide a "live lab" experience in conducting basic vascular procedures. This course is part of the third and final semester of the 18-month Diagnostic Medical Sonography program which runs 18 weeks in duration. (1/01)

SONO-46A  ECHOCARDIOGRAPHY
1.5 units: 1 hour lecture, 1.5 hours lab.
Limitation on enrollment: Enrollment in the Diagnostic Medical Sonography Program.
This course covers an introduction to acoustical physics and instrumentation, echocardiographic positioning and scanning protocol including 2D, M-mode, Color Flow, and Doppler Imaging; related anatomy, hemodynamics, and physiology to include ventricular function, intracardiac anatomy, valvular anatomy and function; pathology and clinical symptomatology and how they relate to the sonographic appearance of these structures. Interpretation and critique of normal and abnormal anatomy with correlation of clinical, didactic, and image information will be presented. The laboratory component of this course will include demonstration and scanning exercises to provide a "live lab" experience in conducting echocardiographic procedures. (3/05)

SONO-49A-ZZ  SPECIAL TOPICS IN DIAGNOSTIC MEDICAL SONOGRAPHY
0.5 - 3 units: 0.5 - 3 hours lecture, 0 - 9 hours lab.
Limitation on enrollment: Current student or graduate of a diagnostic medical imaging program or six months of experience in a diagnostic medical sonography career track.
This course is designed to address special topics in diagnostic medical sonography to meet the current needs of students. It will provide students access to instruction that will assist them in acquiring the most up-to-date information possible in order to cope with the rapidly changing health care environment. (4/05)

SPANISH
(Humanities Division)

SPAN-01  ELEMENTARY SPANISH (CAN SPAN 2)
(CSU breadth area C2) 5 units: 5 hours lecture.
Advisory: ENGL-84.
This course will focus on the development of listening, speaking, reading, and writing in a cultural context, with primary emphasis on communicative competency. Students will learn how to express in Spanish the most basic functions of everyday life. This course is not recommended for native speakers -- native speakers should enroll in SPAN-10. (10/03)

SPAN-02  ELEMENTARY SPANISH
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: SPAN-01 or two years of high school Spanish. SPAN-02 is the continuation of SPAN-01. This course will focus on the further development of listening, speaking, reading, and writing in a cultural context with primary emphasis on communicative competency. Students will learn how to express in Spanish the most basic functions of everyday life. This course is recommended for students who have completed one year of high school Spanish; it is not recommended for native speakers. Native speakers should enroll in SPAN-11. (11/03)

SPAN-03  INTERMEDIATE SPANISH
(CSU breadth area C2) 5 units: 5 hours lecture.
Prerequisite: SPAN-02 or SPAN-11. Advisory: LRNR-30. Intermediate Spanish is a continuation of SPAN-02 and SPAN-11. This course reviews and further develops grammatical concepts introduced in SPAN-02 and SPAN-11, as well as introduces the student to the remaining major linguistic concepts of the language. Through varied readings, composition, and discussion, the student will increase his or her vocabulary and cultural knowledge. (11/03)

SPAN-04  INTERMEDIATE SPANISH
5 units: 5 hours lecture.
Prerequisite: SPAN-03. Advisory: LRNR-30. This course is a thorough review of the fundamentals of reading, writing, speaking, and understanding Spanish designed to aid the student in preparing for advanced studies in Spanish composition, grammar, and conversation, as well as literature in Spanish, history, and culture. (11/03)

SPAN-10  SPANISH FOR SPANISH SPEAKERS
(CSU breadth area C2) 5 units: 5 hours lecture.
Advisory: ENGL-84 or high school "Spanish 2 for Spanish Speakers." This course is designed for students who are fluent in Spanish and who are ready to develop literacy skills. The course will focus on extensive reading of all types of texts and their reworking in written form with the intention of expanding the vocabulary, creating an incipient awareness of linguistic registers, discussing items beyond the familial routine, improving written expression, and developing an appreciation for Hispanic culture as manifested in Spanish speaking countries and the U.S. (2/02)

SPAN-11  SPANISH FOR SPANISH SPEAKERS
(CSU Breadth C2) 5 units: 5 hours lecture.
Prerequisite: SPAN-10 or two years of "Spanish for Spanish Speakers." Advisory: LRNR-30. This course represents the continuation of SPAN-10. It is designed for students who are fluent in Spanish and who are ready to develop literacy skills. This course continues to focus on extensive reading of all types of texts and their reworking in written form with the intention of expanding the vocabulary, increasing the awareness of linguistic registers, discussing items beyond the familial routine, improving written expression -- particularly accentuation and spelling -- and developing an appreciation for Latino culture as manifested in any of the Spanish-speaking countries, including the USA. (9/04)

SPAN-39  ADVANCED SPANISH
1 unit: 3 hours by arrangement.
Prerequisite: SPAN-03. This course is designed to acquaint the advanced student with specific items of Spanish language, literature, and culture, including history, political thought, and sociological change. Papers will be written which will enforce knowledge of these areas and critical analysis of current Spanish intellectual and social thinking. This course may be repeated three times. (3/00)

SPORTS MEDICINE
(Allied Health Division)

SPMD-41  SPORTS MEDICINE PROFESSIONS
1 unit: 1 hour lecture.
Advisory: ENGL-A. This course presents the scope of practice of the various sports medicine professional career opportunities. (5/03)
SPMD-42 INTRODUCTION TO ATHLETIC TRAINING
3 units: 2 hours lecture, 3 hours lab. Advisory: ENGL-A. This is an introductory course in recognition, assessment, management, care, and prevention of injuries occurring in physical activities. (1/04)

SPMD-43 REHABILITATION IN SPORTS MEDICINE
3 units: 2.5 hours lecture, 1.5 hours lab. Prerequisite: SPMD-42. Advisory: ENGL-A. This course, through lecture and lab, will include applications and methods in athletic injury treatment and rehabilitation. It will teach a practical approach to rehabilitation programs through design, implementation, and supervision. (05/03)

STUDENT GOVERNMENT
(Social Science Division)
STGV-33ABCD STUDENT GOVERNMENT
2 units: 1 hour lecture, 3 hours lab. (Note: Students may enroll without holding an office.) This course surveys theory and practice of parliamentary law, committee techniques, and democratic organization. Students will study some of the factors of successful leadership and effective group membership. Participation in student organization events, such as lectures, leadership workshops, and conferences, is required. (12/99)

TUTORIAL
(Developmental and Educational Studies)
TUTR-35 TUTORIAL SEMINAR
1 unit: 3 hours lab. This is a course designed to provide tutors in the Merced College Tutorial Program with opportunity to explore more fully their experiences in the program. Tutors will receive instruction in areas of tutorial technique, group organizations, relationships with faculty and peers, evaluation techniques, and content tutoring. (12/99)

WATER/WASTEWATER TECHNOLOGY
(Science, Math and Engineering Division)
WWT-60 WATER TREATMENT PLANT OPERATIONS
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84; MATH-80. This course is an introduction to water treatment plant operations and processes. It will include the study of sources of water supply, water quality, treatment of water for domestic use, operations of water treatment systems, and introduction to water treatment operations arithmetic. This course prepares the student to test for state certification for water treatment plant operator grade 1 and 2. (11/03)

WWT-61 INTRODUCTION TO WASTEWATER TREATMENT
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84; MATH-80. This course is an introduction to wastewater treatment plant operations and processes. It will include the study of wastewater terminology; current methods of wastewater treatment – primary, secondary, and advanced; wastewater quality; and basic wastewater mathematics. This course prepares the student to test for state certification for wastewater treatment plant operation grade 1 and 2 (entry-level). (11/03)

WWT-62 WATER AND WASTEWATER CALCULATIONS
3 units: 3 hours lecture. Advisories: ENGL-81, ENGL-84; MATH-80. This course provides for mastery of mathematical calculations specifically involving water and wastewater treatment plant operations and processes. It incorporates use of a handheld calculator, scientific notation, and use of dimensional analysis as tools of problem solving. This course prepares the student to test for state certification for wastewater treatment plant operator grade 1 and 2 (entry-level). (11/03)

WWT-63 ADVANCED WATER TREATMENT PLANT OPERATIONS
3 units: 3 hours lecture. Prerequisite: WWT-60. Advisory: ENGL-81. This course is a continuation of study of water treatment plant operations and processes with emphasis on knowledge and skills needed by operators of conventional surface and ground treatment. Topics include control of metallic ions, trihalomethanes, disposal of wastes in the operation of water plants, instrumentation and advanced laboratory procedures, and safety and drinking water regulations. The course provides classroom background to prepare students to take state certification exams. (11/03)

WWT-64 ADVANCED WASTEWATER TREATMENT
3 units: 3 hours lecture. Prerequisite: WWT-61. Advisory: ENGL-81. This course is a continuation of study of wastewater treatment plant operations and processes. It will emphasize details of the processes that occur in a wastewater treatment plant including aeration, maintenance of microbe populations, sludge digestion, and chemical removal. This course is designed for students who are in grades III and IV of state certification and satisfies eight educational points towards certification as a wastewater treatment operator. (11/03)

WELDING TECHNOLOGY
(Industrial Technology Division)
WELD-06 FUNDAMENTALS OF OXY-FUEL WELDING AND SHIELDED METAL ARC WELDING (Also: MECH-06)
3 units: 2 hours lecture, 3 hours lab. Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course emphasizes development of minimum skill standards in welding. The Shielded Metal Arc Welding (SMAW), Oxy-Fuel Welding (OFW) and Oxy-Fuel Cutting (OFC) processes are covered as prescribed in the (AWS) American Welding Training Qualification (QC 10) entry-level standards. (2/06)

WELD-07 FUNDAMENTALS OF T.I.G. AND M.I.G. WELDING (Also: MECH-07)
3 units: 2 hours lecture, 3 hours lab. Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course emphasizes the development of minimum skill standards in welding. The Gas Metal Arc Welding (GMAW)/(MIG), Gas Tungsten Arc W (GTAW)/(TIG) and Plasma Arc Cutting (PAC) processes are studied as prescribed in the American Welding Society (AWS) Training Qualification (QC 10) entry-level standards. (2/06)

WELD-40A WELDING DESIGN AND CONSTRUCTION (Also: MECH-19A)
3 units: 2 hours lecture, 3 hours lab. Prerequisite: WELD-07 or MECH-07. Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83. This course covers basic metal fabrication skills as well as the design and construction of special industrial and agricultural equipment. (2/06)
WELD-40B  WELDING DESIGN AND CONSTRUCTION  
(Also: MECH-19B)  
3 units: 2 hours lecture, 3 hours lab.  
Prerequisite: WELD-40A/MECH-19B.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course is a continuation of WELD-40A/MECH-19A. It covers basic and advanced metal fabrication skills as well as the design and construction of special agricultural and industrial equipment. 
(2/06)

WELD-45  ADVANCED ARC WELDING PROCEDURES  
(Also: MECH-45)  
3 units: 2 hours lecture, 3 hours lab.  
Advisories: ENGL-B; MATH-80 or MATH-83; WELD-06/MECH-06 and WELD-07/MECH-07.  
This course is designed to emphasize advanced skills and techniques of Shielded Metal Arc Welding, Gas Metal Arc Welding, Gas Tungsten Arc Welding, Air Carbon Arc Cutting, and Oxyacetylene Flame Cutting as related to pipe and structural members. Included will be welding assembly print interpretation, weld symbol interpretation, and weld joint preparation. Students will be prepared to take an AWS Welder Certification Test during this course. 
(2/06)

WELD-48  SPECIAL PROBLEMS IN WELDING TECHNOLOGY  
2 units: 6 hours lab.  
Prerequisites: WELD-06/MECH-06, WELD-07/MECH-07.  
Advisories: ENGL-81, ENGL-84; MATH-80 or MATH-83.  
This course prepares the student for employment in the welding trades with entry-level skills. Trade techniques and information needed for employment in trade occupations will receive special attention. 
(2/06)

ZOOLOGY  
(Science, Math and Engineering Division)  
ZOO-01  GENERAL ZOOLOGY (CAN BIOL 4)  
(CSU breadth area B2/B3) 5 units: 3 hours lecture, 6 hours lab. Prerequisite: BIOL-04 or BIOL-04H.  
Advisories: ENGL-A, ENGL-41.  
This course is an introduction to principles of animal biology. The phylogenetic series, structure, function, heredity, comparative relationships, and evolution of the invertebrates and vertebrates will be studied. This course is designed for life science majors and students in pre-professional programs. (Note: The laboratory portion of this course includes required field trips.) 
(3/00)
Continuing Education (Noncredit) Courses

The noncredit program’s office is located at the Merced Tri-College Center on the college campus (entrance off of G Street). This program offers a wide variety of classes to the community with no registration fee. Classes are offered to assist students seeking employment, to help them relearn skills and meet current job requirements, and to provide personal enrichment. Call 381-6540 for further information.

BASIC SKILLS

EDU-110 READING AND COMPUTERS
Course duration: 324 hours; open entry format.
This course is best-suited for adult learners below a third grade reading ability who need individual attention and a lot of encouragement and reinforcement while learning basic phonics, reading, spelling, and vocabulary skills. The student can learn at his/her own rate of speed with computer-assisted instruction. (12/05)

EDU-111 READING AND COMPUTERS II
Course duration: 324 hours, open entry format.
Advisory: EDU-110.
This course is best suited for adult learners at third grade level reading and vocabulary level up to approximately sixth grade level who require individual attention and reinforcement while reviewing basic phonics to improve reading, spelling, and vocabulary skills. (12/05)

EDU-112A SKILLS ACQUISITION FOR STUDENT SUCCESS – GENERAL
Course duration: 90 hours; open entry format.
This course provides a supervised learning experience for students who can benefit from individualized instruction in study skills and study habits in a laboratory setting. The study skills and study habits learned depend on the needs of the individual students and include educational computer applications, knowledge of college resources, and application of composition skills across the curriculum. (5/06)

EDU-112B SKILLS ACQUISITION FOR STUDENT SUCCESS – MATH
Course duration: 90 hours; open entry format.
This course provides a supervised learning experience for students who can benefit from individualized instruction in study skills and study habits in a laboratory setting. The study skills and study habits learned depend on the needs of the individual students and include educational computer applications, knowledge of college resources, and application of computation skills across the curriculum. (5/06)

EDU-112C SKILLS ACQUISITION FOR STUDENT SUCCESS – ALLIED HEALTH
Course duration: 25 hours; open entry format.
This course is designed to provide students the opportunity to improve and enhance their nursing skills through any number of training exercises that assist in the clinical development of, and reinforcement of, the practical nursing skills. The course is a lab setting enriched with a resource library, manikins (for skills practice), and computer stations. (5/06)

GED-101 BASIC SKILLS AND GED PREPARATION
Course duration: 324 hours; open entry format.
This course is designed to build the basic skills of adults in the areas of writing, reading comprehension, and mathematics. Special emphasis is placed on analytical reading skills, problem solving, and test preparation. Subject matters included are the areas covered by the GED exam such as science, social studies, literature, mathematics, and writing. This course utilizes a computer software program to assist students to learn at their own pace. (12/05)

GUI-101 INTRODUCTION TO COLLEGE
Course duration: 1.5 hours; open entry format.
This course will acquaint students with the College, academic regulations, the availability of campus resources, and the importance of educational planning. (1/06)

GUI-102 PROBATION SOLUTIONS – LEVEL 1
Course duration: 1.5 hours; open entry format.
This course is required for Level 1 probation students. Successful completion of this course is required for students to enroll. The student will learn strategies to get off probation status and become successful in reaching their educational goals. (1/06)

TUT-106 SUPERVISED TUTORING
Course duration: 102 hours; open entry format.
This course is designed to assist students who are experiencing difficulty in their college courses. The course provides tutoring from qualified tutors in either a one -to -one or small group setting. (4/06)

DISABLED STUDENTS

ARTS-209 ARTS AND CRAFTS FOR DISABLED ADULTS
Course duration: 54 hours; open entry format.
This course is designed to help disabled persons acquire skills, knowledge, and an appreciation of a variety of art forms. Students will have an opportunity to participate in and learn about a variety of art subjects such as sculpture, design, basic use of color, drawing, painting, decorative arts, and needlework. (1/06)

HLT-215 COMMUNITY LIVING SKILLS: HEALTH EDUCATION
This course is designed to develop skills in individuals who need guidance in pre-vocational skills and work-readiness skills. (5/05)

LDIP-224 LEARNING DISABILITY IDENTIFICATION AND PLANNING
Course duration: 9 hours; open entry format. Limitation on enrollment: Students must be enrolled in Merced College credit courses.
This course is designed to provide enrolled Merced College students with the assessment necessary to identify themselves as learning disabled using the California Community College Learning Disability Model (CCCLDM), and how to identify and understand the support services necessary for academic success. (5/06)

PHYC-206 BALANCE AND MOTOR SKILLS FOR THE PHYSICALLY LIMITED
Course duration: 54 hours; open entry format.
This course is a specialized exercise program for those in assisted living environments. Exercise routines provide physical, mental, and sensory stimulation, improve posture, and increase overall mobility and knowledge of proper body mechanics. (4/06)

SKLS-210 DAILY LIVING SKILLS
Course duration: 324 hours; open entry format.
This course is designed primarily for mentally and/or physically disabled students who are functioning at very low levels. The course teaches the basic living skills necessary for successful social interaction and self-care to help enhance self-esteem. (4/06)
SLAN-201 BEGINNING SIGN LANGUAGE
Course duration: 36 hours; open entry format.
This course is designed to teach beginning students how to communicate with the hearing impaired. Communication skills are acquired through signed words, gestures, finger spelling, and facial expression. Course instruction includes American Sign Language vocabulary taught concurrently with an overview of all sign systems. There is also minor emphasis on Signing Exact English (SEE). The course will include an overview of deaf culture and the history of deaf education. (5/06)

HEALTH AND SAFETY

PHYC-305 PHYSICAL CONDITIONING
Course duration: 54 hours; open entry format.
This course is designed to help students of varying fitness levels attain optimal fitness levels through physical conditioning and exercise. Course topics may include cardiovascular routines, floor exercise, and stretching. (4/06)

PHYC-306 AQUATIC FITNESS
Course duration: 18-90 hours; open entry format.
This course provides personalized aquatics programs designed to develop and maintain cardiovascular and muscular fitness. The course promotes exercise, through such means as water aerobics, swimming, and water sports, as a way to maintain good health. (3/06)

PHYC-310 FLEXIBILITY AND CARDIOVASCULAR FITNESS
Course duration: 90 hours; open entry format.
This exercise course is designed to improve flexibility and cardiovascular fitness of all major muscle groups. The class provides a well-rounded fitness program that will strengthen, condition, and improve sports performance. Specialized classes are available for badminton, baseball, basketball, football, soccer, softball, tennis, and volleyball. (4/06)

TRNG-324 CIVILIAN HANDGUN SAFETY TRAINING
Course duration: 12 hours; open entry format.
This course is designed to familiarize the student with state laws and local ordinances pertaining to the use of handguns as a means of self-defense. The course provides awareness of laws regarding handgun ownership. The course also provides discussion of the moral aspects of the use of deadly force, even when there is a genuine threat of death or great bodily harm to one’s self or others. (4/06)

HOME ECONOMICS

SEW-402 BEGINNING QUILTING
Course duration: 54 hours; open entry format.
This course will teach students the fundamentals of quilting. Students will learn ideas and techniques for creating quilted and patchwork bed covers, wall art, clothing, and other quilted projects. Topics include piecing, appliqué, and other quilting skills. (1/06)

SEW-407 NEEDLECRATFS AND SEWING
Course duration: 54 hours; open entry format.
This is a course with instruction in knitting, crocheting, stitchery, and sewing. Each student will choose an area of needlework and learn to master the skills for that area. (12/05)

SEW-408 SEWING SPECIALTY FABRICS
Course duration: 54 hours; open entry format.
This course is designed to provide the technical knowledge for specialty fabric construction. Emphasis will be placed on fabric identification and selection, sewing techniques, and an overview of sewing and pressing equipment. (4/06)

ARTS-501 PAINTING TECHNIQUES FOR OLDER ADULTS
Course duration: 54 hours; open entry format.
This course provides beginning and intermediate instruction in painting and drawing techniques using a variety of mediums. Classes and topics include drawing, watercolor, charcoal, acrylic, pen, pencil, oil, gourd painting, and fabric painting. (1/06)

ARTS-502 ARTS AND CRAFTS FOR OLDER ADULTS
Course duration: 54 hours; open entry format.
This course provides the fundamentals for designing and creating self-expression through art mediums. Instruction may include fundamentals for woodworking, bonsai, quilting, working with paper and fiber materials, macramé, needlework, stained glass, and beading. (4/06)

ARTS-503A POURED CERAMICS FOR OLDER ADULTS
Course duration: 54 hours; open entry format.
This course is designed to teach students to work with ceramic pieces (greenware) and provide training in different greenware techniques. Students will create ceramic pieces from molds. The class provides the opportunity for creation of individual ceramic projects through the use of a variety of finishing techniques including hand painting, relief work, clay lifting, halo gold, lusters, washes, scrip, and firing. (4/06)

ARTS-503B WHEEL THROWN/HAND BUILT CERAMICS FOR OLDER ADULTS
Course duration: 72 hours; open entry format.
This course is designed to teach students to work with clay, creating ceramic pieces utilizing hand building and wheel throwing techniques. Students work with a variety of relief carving and finishing applications, including slip trailing, hand building, use of the potter’s wheel, hand painting, pit firing, raku firing, and high and low fire glazing. (4/06)

ARTS-505 CREATIVE EXPRESSION FOR OLDER ADULTS
Course duration: 54 hours; open entry format.
This course is designed to assist adults in developing and writing their personal memories or life stories in a manner that will be of interest to families, heirs, and friends. Completed works will be treasured, preserved, and possibly published by the student. (4/06)

ARTS-507A MUSIC THERAPY FOR OLDER ADULTS (BEGINNING)
Course duration: 54 hours; open entry format.
This beginning course provides group instruction in band instruments. The course is designed to teach beginning students to sight read music, develop correct timing, and increase knowledge of a variety of music styles and compositions. Students may be invited to participate in recitals and public performances, depending on their ability. (4/06)

ARTS-507B MUSIC THERAPY FOR OLDER ADULTS (INTERMEDIATE)
Course duration: 54 hours; open entry format. Limitation on enrollment: Students must demonstrate ability to sight-read music for their instrument. This course provides experience in performing concert and symphonic band literature. Public performance and exchange concerts are scheduled in addition to class instruction and rehearsals. (4/06)

| EDU-508     | MATURE DRIVER IMPROVEMENT                                                    | 8 hours    | Open entry format   |
|             | *Course description:* This course is designed primarily for drivers age 55 and older and includes classroom instruction on safety, road courtesy, improving driving performance, safe driving techniques for emergencies, and general vehicle maintenance. (12/05) |

| EDU-510     | GROWING YOUNGER                                                              | 54 hours   | Open entry format   |
|             | *Course description:* This course is designed to help older adults maintain and improve the cognitive functions of the brain that tend to diminish as part of the normal aging process. Students will engage in a course of mental "calisthenics" to enhance memory, cognitive skills, creative thinking, and problem solving. Topics include exploration of basic mathematical concepts, ancient and cultural board games, word games, puzzles, anagrams, and probability. (5/06) |

| PHYC-506    | MIND AND BODY FITNESS FOR OLDER ADULTS                                        | 36-54 hours| Open entry format   |
|             | *Course description:* This course is designed to provide a full range of motion with flexibility and stretching that includes activities such as full range of motion in joints, gentle aerobic exercise for heart and lungs, hand weights for strengthening muscles and bones, and floor exercises to tone the muscles of the back, buttocks, and legs. (1/06) |

| SEW-509     | SEWING FOR SENIORS                                                           | 36-54 hours| Open entry format   |
|             | *Course description:* This course provides instruction in clothing construction with an emphasis on learning techniques specific to fabrics, pattern analysis, figure analysis, and construction skills. (1/06) |

| PARENTING   |                                                                             | 8 hours    | Open entry format   |
|             | *Course description:* Parenting is designed to provide quality education and support opportunities to caregivers of children and youth in out-of-home care. The courses will help providers meet the educational, emotional, behavioral, and developmental needs of children in their care. Topics include accessing education and health services; permanency planning and reunification; child development; cultural diversity and sensitivity; parenting skills and positive discipline; and self-esteem. Additional topics are designed to provide caregivers with the skills needed to care for children with medical, learning, and behavioral difficulties. (5/06) |

| VOCATIONAL  | BUSN-749 MICROCOMPUTERS AND BUSINESS                                        | 720 hours  | Open entry format   |
|             | *Course description:* This program is a project-based course designed to develop student entry-level skill proficiency in using state-of-the-art technology to solve problems. Various simulations reflective of real life experiences will be a major part of the instructional units. (9/05) |

| BUSN-752    | INTRODUCTION TO MICROCOMPUTERS                                               | 24 hours   | Open entry format   |
|             | *Course description:* This course is will introduce students to microcomputers and the Windows software environment. Students will learn to identify the components of desktop screens and learn to execute basic computer commands. The class may also cover Internet browsing, email, website navigation, and downloading files. (4/06) |

| LANG-716    | SPANISH IN THE WORKPLACE                                                     | 54 hours   | Open entry format   |
|             | *Course description:* This introductory course is designed for non-Spanish speakers who wish to develop specific conversational skills that are related to their work or community environment. Special words and phrases are taught with an emphasis on basic vocabulary and word recognition skills that will result in improved communication with Spanish speaking customers, patients, and clients. (4/06) |

| LAW-765     | COURT INTERPRETER AND ADMINISTRATIVE HEARINGS                                | 54 hours   | Open entry format   |
|             | *Course description:* This course is designed to help prepare students to take the state and/or federal exams for Spanish language interpreters. It provides an introduction to the court system and an overview of the administrative hearing process. Topics also include public speaking, memory development, note taking, and simultaneous interpretation. (5/06) |

| MED-717     | MEDICAL ASSISTING                                                           | 960 hours  | Open entry format   |
|             | *Course description:* This entry-level course is designed for adult students who desire vocational training in the field of medical assisting. Course instruction includes an overview of the career of medical assisting, knowledge of medical law and ethics, oral and written communication skills, medical terminology, anatomy and physiology, and administrative and clinical office procedures. (12/05) |

| SOCL-760    | CAREER AND LIFE PLANNING                                                    | 495 hours  | Open entry format   |
|             | *Course description:* This course is designed for adults who function at limited level of cognitive development. It is designed to help each student acquire positive work habits, attitude, and motivation so that he/she can achieve their fullest vocational potential. Course content will include training in basic work habits that include promptness, social skills, accepting work supervision, appropriate team work, and grooming. Students will learn about the value of work, career options, and effective strategies for obtaining employment. (5/06) |

| SOCL-761    | VOCATIONAL LIFE PLANNING                                                    | 8 hours    | Open entry format   |
|             | *Course description:* This course is designed primarily for students who are part of the Merced College Independent Living Program (ILP). The course addresses issues and barriers that students will typically encounter while seeking and maintaining employment and success in becoming an independent adult. Course content includes instruction in the areas of education, employment, housing, money management, and daily living skills. (5/06) |

| SKLS-745    | SKILLS FOR SUCCESS (NURSING SUCCESS CAMPS)                                   | 72 hours   | Open entry format   |
|             | *Course description:* This support course is designed to provide students the opportunity to enhance the skills needed for success and retention in the nursing program. Intensive review and practical application of content areas related to the nursing program is emphasized. (4/06) |
TRNG-768  BUS DRIVER TRAINING/RECERTIFICATION
Course duration: 30 hours; open entry format.
This course is designed to improve the bus driver’s public relations ability and to provide a basic and refresher course information on vehicle checkout procedures, first aid, and emergency procedures. This course also includes good driving fundamentals, assessing and adjusting to road conditions, and techniques for safe downhill driving. Defensive driving skills and passenger discipline are addressed. A discussion of new state laws and requirements and an analysis of bus accidents is provided. (12/05)

ENGLISH AS A SECOND LANGUAGE (ESL)
ENG-801- ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 1
Course duration: 324 hours; open entry format.
This course is for preliterate and non-literate ESL students who have no, or very few English language skills. Emphasis of the course is on aural/oral skills and visual reinforcement. (3/06)

ENG-802 ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 2
Course duration: 324 hours; open entry format.
Advisory: ENG-801.
This course is designed for preliterate and non-literate ESL students who have minimal English language skills. Emphasis in this course is on aural/oral skills with visual reinforcement. The student will be introduced to reading, writing, and math skills. (3/06)

ENG-803 ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 3
Course duration: 324 hours; open entry format.
Advisory: ENG-802.
This course is for beginning level students who are familiar with the printed and written alphabet but have minimal ability to use English. This course includes practice in listening, speaking, reading, and writing English on a beginning level. (3/06)

ENG-804 ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 4
Course duration: 324 hours; open entry format.
Advisory: ENG-803.
This course is designed for high-beginning level students who need more practice with English skills. This course includes practice in listening, speaking, reading, and writing on an advanced beginning level. (3/06)

ENG-805 ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 5
Course duration: 324 hours; open entry format.
Advisory: ENG-804.
This course is for low-intermediate students who need practice and expansion of their communication skills. This course includes practice in listening, speaking, reading, and writing on a low to intermediate level. (3/06)

ENG-806 ESL (ENGLISH AS A SECOND LANGUAGE)
LEVEL 6
Course duration: 324 hours; open entry format.
Advisory: ENG-805.
This course is for high-intermediate ESL students who have learned basic survival skills, but who need instruction that will lead to a relatively sophisticated level of discourse of issues and ideas that reach beyond basic survival. This course will prepare students to take credit courses at Merced College. This course includes practice in listening, speaking, reading, and writing. (3/06)

CITIZENSHIP FOR IMMIGRANTS
HST-908 UNITED STATES CITIZENSHIP
Course duration: 25 hours; open entry format.
This course is designed to prepare students to meet the United States history, government, and English requirements necessary to become a United States citizen. The course covers the symbols and beliefs of the United States; federal, state, and local government; the Constitution; the Bill of rights; U.S. history, and a review of the interview and testing process required by the immigration services. (1/06)
