

Course Student Learning Outcome #1 Competency:

h. Identify quality measures when evaluating effects of medical-surgical and childbearing family nursing interventions appropriate to the care environment.

**Tool: Nursing Sensitive Quality Indicators**

What nursing sensitive quality indicators are used on the unit?	Why are these quality measures specifically important to this unit?	Would this NSI be important to the other areas as well?	How is the unit performing related to this NSI?	What prevention measures and precautions are implemented for those identified as “at risk”?
Maternal/Child:				
Medical-Surgical				
Compare and contrast the quality indicators on the two units.				

### Rubric for Nursing Sensitive Quality Indicators

Performance Level	S	NI	U
Answers all questions on the tool.	Accurately answers all questions on the tool.	Able to answer some, but not all, of the questions on the tool.	Unable to accurately answers all questions on the tool.
Compares the medical/surgical unit with the maternal-newborn unit.	Completely and accurately compares the medical/surgical unit with the maternal-newborn unit.	Makes some comparisons but misses some important aspects.	Unable to compare the medical/surgical unit with the maternal-newborn unit.
