

## Inbox Analysis

The Email Inbox Analysis add-in provides an on-demand AI security assessment for emails in Microsoft Outlook. It explains why email is considered safe or risky and allows you to give feedback to improve future detection.

## How to Open Inbox Analysis

1. Open the email you want to review in Outlook.
2. In the Outlook ribbon, select “Inbox Analysis” under Add-ins.
3. The Inbox Analysis panel will open on the right.

## Inbox Analysis Buttons - Purpose and Use

 Request Release	A request to release the email in its original, unmodified format will be sent to the appropriate individual or team.
 Mark as Safe	The email system is informed that you have deemed it safe and that there is nothing unexpected or unusual contained in the email.
 Report to Security	If you think the email is suspicious then selecting Report to Security flags this email and it is reported to the appropriate individual or team. <ul style="list-style-type: none"><li>• Approved - the email/content is released and delivered (or unblocked).</li><li>• Rejected - the email/content remains held/blocked.</li></ul>
 Close	Selecting this will close the pop-up.
