Child Development CLDV

CLDV-01 Child Growth and Development

3.0 units:

54.0 hours lec.

Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Examines the progression of development in the physical, cognitive, social, and emotional domains and identifies developmental milestones for children from conception through adolescence. Emphasis on interactions between biological processes and environmental factors. Students will observe children, evaluate individual differences, and analyze characteristics of development at various stages according to developmental theories. (Approved C-ID CDEV 100)

Communication Studies
COMM

COMM-15
Interpersonal Communication

3.0 units:
54.0 hours lec.
Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Ends Summer 2026. Effective Fall 2026, COMM-C1004 replaces COMM-15 The focus of this course is to examine the dynamics of communication in one-to-one relationships from a theoretical point of view with a focus on core concepts and methods of research in interpersonal relationships. Communication theory and skills will be investigated in order to help students gain a basic knowledge of the cultural and social organizations in which they (students) exist as well as the behavior and social organizations of other human societies.

**Computer Science
CPSC**

**CPSC-01
Introduction to Computer Information Systems**

4.0 units:
54.0 hours lec,
54.0 hours lab.

An introduction to the basics of computing systems, impact of computers on our society, and the future of computing. Focus on using applications, algorithm design, programming basics, database management systems, networking, ethics and security, information systems, internet and web technologies, and computer systems hardware and software components. Application of these concepts and methods through hands-on projects developing computer-based solutions to problems. This course is a core course in the Computer Technology & Information Systems (CTIS) AS degree.

**CPSC-06
Programming Concepts and Methodology I**

3.0 units:
36.0 hours lec,
54.0 hours lab.

Prerequisite: *Advised* Previously taken CPSC-05A or CPSC-22 is advised.

This course introduces the discipline of computer science through the use of the Java programming language, offering foundational knowledge of computer organization and an introduction to software engineering principles. Topics include program design methodologies, development practices, coding style, testing, documentation, and a brief introduction to artificial intelligence (AI). Students will explore algorithms, control structures, methods, and elementary data structures, applying these skills to solve real-world problems through hands-on programming. This course is a core course in the Computer Science AS-T degree.

Programming Concepts and Methodology II**

4.0 units:
54.0 hours lec,
54.0 hours lab.

Prerequisite: *Required* Take CPSC-06 or ENGR-14 or CPSC-14. Minimum grade C,P;

This course is a continuation course in Computer Science which introduces further aspects of software design and implementation. Abstract data types, fundamental data structures and associated algorithms: lists, stacks, queues, and hash tables. Students will be expected to design, implement, test and analyze a number of programs. This course advances students' understanding of software design, challenging them to create and refine efficient programs using advanced data programming, artificial

intelligence (AI) and team-work to solve real-world problems. This is a core course in the Computer Science AS-T degree.

ETHN-23
Chicana/O American History and Culture

3.0 units:
54.0 hours lec.
Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This interdisciplinary course examines the social, political, and cultural roots of Chicana/os, tracing history from their Indigenous, African, and Spanish beginnings to the present. It analyzes race, ethnicity, and culture, in relation to Chicana/o communities and their social justice movements and struggles. The course provides a basis for a better understanding of the socio-economic, cultural, and political conditions among Chicana/os through historical consideration of the creation and development of Ethnic Studies programs in the United States. Special emphasis is also placed on the contributions of Chicana/o scholars, artists, and activists by using an intersectional decolonial lens to explore the effects of (neo)colonialism, imperialism, white supremacy, Eurocentrism, and racism.

Fire Technology
FIRE

FIRE-31
Fire Behavior and Combustion

3.0 units:
54.0 hours lec.

This course introduces students to the fundamental principles of fire behavior and combustion, providing a scientific foundation for understanding how and why fires start, spread, and are controlled. Students will study the physical and chemical properties of fire, the combustion process, ignition, heat transfer, flame spread, and the stages of fire development. The course also examines fire dynamics in different fuel types and building environments, as well as the influence of oxygen, fuel, heat, and chemical reactions on fire growth. Emphasis is placed on applying these concepts to firefighter safety, suppression strategies, and community risk reduction. Fire 31 is a core requirement in the Merced College Fire Technology Program and prepares students for more advanced fire science courses and professional fire service training.

Music: General
MUSG

MUSG-10
Music Fundamentals

3.0 units:
54.0 hours lec.

This course is a study of music fundamentals throughout history, including principles and procedures of rhythm, pitch notation, musical symbols, scales, key signatures, intervals, and diatonic chords. Students will study

the historical and cultural development of various music notation styles and fundamentals. Students will apply knowledge learned in class to interpret and critique music with regard to its historical and cultural context. The course applies to musicians who have learned to play/sing without training in fundamentals and to beginners in music. This course is open to all students.

Marriage and the Family**

3.0 units:
54.0 hours lec.
Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.
This course provides an overview of sociological theories and concepts utilized to investigate marriage and family relationships. An empirical as well as experiential analysis of marriage and family functions, structures, and roles is emphasized. Special focus is paid to contemporary issues, concerns, and debates regarding marriage and family dynamics.

**Fire Technology
FIRE**

**FIRE-30
Fire Protection Organization**

3.0 units:
54.0 hours lec.

This course provides students with a comprehensive overview of the fire service, its history, traditions, and evolving role in modern society. Using Introduction to Fire Protection and Emergency Services, Seventh Edition as the primary text, students will explore the organization and function of fire departments at the local, state, and federal levels, as well as public and private fire protection systems. Topics include the chemistry and physics of fire, fire prevention, fire protection systems, emergency operations, incident command, firefighter safety, and career opportunities within the fire service. Emphasis is placed on understanding the interrelationship between fire prevention, suppression, investigation, and emergency services, preparing students for further study and future careers as fire service professionals.

**FIRE-31
Fire Behavior and Combustion**

3.0 units:
54.0 hours lec.

This course introduces students to the fundamental principles of fire behavior and combustion, providing a scientific foundation for understanding how and why fires start, spread, and are controlled. Students will study the physical and chemical properties of fire, the combustion process, ignition, heat transfer, flame spread, and the stages of fire development. The course also examines fire dynamics in different fuel types and building environments, as well as the influence of oxygen, fuel, heat, and chemical reactions on fire growth. Emphasis is placed on applying these concepts to firefighter safety, suppression strategies, and community risk reduction. Fire 31 is a core requirement in the Merced College Fire Technology Program and prepares students for more advanced fire science courses and professional fire service training.

Online

42469
Madoski, L Online

**FIRE-33
Fire Protection Equipment and Systems**

3.0 units:
54.0 hours lec.

This course introduces students to the design, operation, inspection, and

maintenance of fire protection equipment and systems used in modern fire protection and life safety. Topics include water supply systems, standpipes, sprinklers, fire pumps, special extinguishing systems, detection and alarm systems, and portable fire extinguishers. Students will examine how these systems function individually and as part of an integrated fire protection plan, with emphasis on their role in safeguarding life and property while supporting fire service operations. Using current fire protection standards and codes, students will learn the fundamentals of system testing, maintenance, and acceptance procedures. Fire 33 is a core requirement in the Merced College Fire Technology Program and prepares students for careers in suppression, inspection, prevention, and fire protection system management.

Online

**FIRE-34
Building Construction for Fire Protection**

3.0 units:
54.0 hours lec.

This course examines the principles of building construction as they relate to fire protection and firefighter safety. Students will study construction methods, materials, and structural design features, with emphasis on how buildings respond under fire conditions. Topics include the five types of construction, fire resistance, occupancy classifications, structural collapse hazards, and the relationship between building design and fire behavior. Students will also analyze historic fires and case studies to understand the impact of construction on fire spread, suppression strategies, and firefighter survival. Fire 34 is a required course in the Merced College Fire Technology Program and provides students with the knowledge needed to evaluate building hazards, support fire prevention, and operate safely in fire suppression and rescue operations.

Online

**FIRE-43
Fire Investigator**

3.0 units:
54.0 hours lec.

Fire Investigator is designed to equip students with the foundational knowledge and practical skills necessary to conduct thorough and legally sound fire origin and cause investigations. Upon successful completion of this course, students will be able to identify and analyze fire patterns, recognize indicators of incendiary and accidental fires, apply scientific methods in fire scene examination, and properly collect, preserve, and document physical evidence. Additionally, students will develop the ability to interpret burn indicators, conduct witness interviews, and prepare comprehensive investigative reports suitable for legal proceedings. This course aligns with nationally recognized standards and supports students pursuing careers in fire investigation, law enforcement, insurance, and other fire service disciplines focused on determining fire causes and preventing future incidents.

**HIST-19
Women in American History**

3.0 units:
54.0 hours lec.
Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is a review of the history of women in America covering the period from 1600 to the present. The emphasis of the course is a multicultural and multi-class approach, examining the problems of women of various ethnicities, races and classes in America. The formation of gender roles is discussed along with an analysis of women's political and economic status across the period. The course will analyze women's struggle for equal rights, the impact of women's participation in significant events in American history, and regional and cultural differences in the way women are treated in society. Emphasis will be on California local and state governments, their operations and how women have politically participated in California.

**HIST-20
History of Asian Americans**

3.0 units:
54.0 hours lec.
Prerequisite: *Advised* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is an interdisciplinary study of Asian Americans from a historical, political, sociological, and aesthetic perspective. Social emphasis is placed on the contributions of Asian Americans scholars and activists by using an intersectional lens to explore the effects of colonialism, imperialism, white supremacy, and racism. This course offers pragmatic historical and political evaluations that aim to introduce students interested in Ethnic Studies, Asian American Studies, Gender Studies, and social movements.

**Kinesiology
 KINE**

**KINE-35
 Flexibility and Cardiovascular Fitness**

2.0 units:

108.0 hours lab.

Limitation on Enrollment: Good general health; absence of medical conditions that would prevent planned physical activity. Practical applications of all aspects of flexibility and cardiovascular conditioning are presented and performed. A system of class presentation is used to insure a gradual, safe, and total physiological adaptation of the student to exercise. A gradual, progressive, safe, and eventually total body fitness experience is pursued. Geriatric fitness adaptations are emphasized.
