\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is a study of the theory and practice of organic chemistry examining the bonding, structure, stereochemistry, nomenclature, properties, and reactions of hydrocarbons and organic halides. Addition, substitution, elimination, and rearrangement reactions are examined. Corresponding mechanisms and energy diagrams are included in the study. Nuclear magnetic resonance, infrared, ultra-violet and mass spectroscopy are introduced as structural elucidation techniques.

Comments: This 12-week class meets from 05/18/26 to 08/06/26.

**CHEM-13B****Second Semester Organic Chemistry Lecture**

3.0 units:

54.0 hours lec.

Prerequisite: \*Required\* Previously taken CHEM-13A and CHEM-13AL and passed with a grade of C or received an equivalent.

\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Begins Fall 2025 This course is a continuation of CHEM-13A, expanding the study of organic chemistry to include aromatic hydrocarbons, alcohols, ethers, thiols, sulfides, aldehydes, ketones, carboxylic acids and derivatives, amines and an introduction to the biochemistry of carbohydrates, proteins, and lipids. Included is a further examination of the use of IR, NMR, GC and Mass Spectroscopy in the identification of organic substances.

4.0 units:  
54.0 hours lec,  
54.0 hours lab.

Prerequisite: \*Required\* Take CPSC-06 or ENGR-14 or CPSC-14. Minimum grade C,P;

This course is a continuation course in Computer Science which introduces further aspects of software design and implementation. Abstract data types, fundamental data structures and associated algorithms: lists, stacks, queues, and hash tables. Students will be expected to design, implement, test and analyze a number of programs. This course advances students' understanding of software design, challenging them to create and refine efficient programs using advanced data programming, artificial intelligence (AI) and team-work to solve real-world problems. This is a core course in the Computer Science AS-T degree.

**ENGL-C1001  
Critical Thinking and Writing**

3.0 units:

54.0 hours lec.

Prerequisite: \*Required\* Previously taken ENGL-C1000 (formerly ENGL-01A) and passed with a minimum grade of C.

Begins Fall 2025. Effective Fall 2025, ENGL-C1001 replaces ENGL/PHIL-13 In this course, students receive instruction in critical thinking for purposes of constructing, evaluating, and composing arguments in a variety of rhetorical forms, using primarily non-fiction texts, refining writing skills and research strategies developed in ENGL C1000 College Reading and Writing (C-ID ENGL 100) or similar first-year college writing course. Readings feature mostly non-fictional essays and books that reflect diverse cultural perspectives on a variety of contemporary issues, such as those involving race, ethnicity, and gender.

**ETHN-23  
 Chicana/O American History and Culture**

3.0 units:  
 54.0 hours lec.  
 Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.  
 This interdisciplinary course examines the social, political, and cultural roots of Chicana/os, tracing history from their Indigenous, African, and Spanish beginnings to the present. It analyzes race, ethnicity, and culture, in relation to Chicana/o communities and their social justice movements and struggles. The course provides a basis for a better understanding of

the socio-economic, cultural, and political conditions among Chicana/os through historical consideration of the creation and development of Ethnic Studies programs in the United States. Special emphasis is also placed on the contributions of Chicana/o scholars, artists, and activists by using an intersectional decolonial lens to explore the effects of (neo)colonialism, imperialism, white supremacy, Eurocentrism, and racism.

**Fire Technology  
FIRE**

**FIRE-31  
Fire Behavior and Combustion**

3.0 units:  
54.0 hours lec.

This course introduces students to the fundamental principles of fire behavior and combustion, providing a scientific foundation for understanding how and why fires start, spread, and are controlled. Students will study the physical and chemical properties of fire, the combustion process, ignition, heat transfer, flame spread, and the stages of fire development. The course also examines fire dynamics in different fuel types and building environments, as well as the influence of oxygen, fuel, heat, and chemical reactions on fire growth. Emphasis is placed on applying these concepts to firefighter safety, suppression strategies, and community risk reduction. Fire 31 is a core requirement in the Merced College Fire Technology Program and prepares students for more advanced fire science courses and professional fire service training.

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

The principal aims of this course are to examine human existence and cultural endeavors from the Renaissance to the present. Students will examine the continuities of human endeavors through fine arts, literatures, philosophies, religions, and the sciences, with an integration of certain non-Western cultures.

**Kinesiology**  
**KINE**

**KINE-01**  
**Introduction to Kinesiology**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is an introduction to the interdisciplinary approach to the study of human movement. An overview of the importance of the sub-disciplines in kinesiology will be discussed. Career opportunities in the areas of teaching, coaching, allied health, and fitness professions.

**Online**

02801  
McCall, S Online

Comments: This 8 week online course meets from 6/1/26 to 7/23/26.

**KINE-02**  
**First Aid and CPR for the Professional Rescuer**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course involves the theory and detailed demonstration of the first aid care of the injured. The student will learn to assess a victim's condition and incorporate proper treatment. Standard first aid, CPR for the professional rescuer, and AED certification(s) can be granted upon successful completion of requirements.

**Merced Campus**

02906  
T 09:00a-09:50a McCall, S GYM-2

Comments: This 6 week hybrid course meets from 6/15/26 to 7/23/26.

**KINE-32**  
**Circuit Weight Training**

1.0 units:  
54.0 hours lab.

Advisory: Good general health; absence of medical conditions that would prevent planned physical activity. The equipment provided for both cardiovascular endurance and strength training (single station exercise machines) in the fitness lab are designed to exercise all major muscle groups for a well-rounded fitness program with the non-athletic in mind. Circuit weight training has proven beneficial for people of all ages and genders, who are interested in weight training, with the emphasis on increasing muscle tone and cardiovascular fitness.

Comments: This 6 week hybrid course meets from 6/15/26 to 7/23/26.

**KINE-35**  
**Flexibility and Cardiovascular Fitness**

2.0 units:  
108.0 hours lab.

Limitation on Enrollment: Good general health; absence of medical conditions that would prevent planned physical activity. Practical applications of all aspects of flexibility and cardiovascular conditioning are presented and performed. A system of class presentation is used to insure a gradual, safe, and total physiological adaptation of the student to exercise. A gradual, progressive, safe, and eventually total body fitness experience is pursued. Geriatric fitness adaptations are emphasized.

**RADT**

**RADT-14A**  
**Radiologic Sciences II**

2.0 units:  
27.0 hours lec,  
27.0 hours lab.

Limitation on Enrollment: Enrollment in the Diagnostic Radiologic Technology Program. This course covers the theory and application of factors that govern and influence the production of quality radiographic images. Image analysis, procedural and exposure factors will be reviewed to assure consistency in the production of quality radiographic images. Quality management, quality control, quality assurance, and informatics will be covered. A review of radiographic procedures, anatomy and image critique will also be presented.

**Sociology  
SOC**

**SOC-01  
Introduction to Sociology**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Ends Summer 2026. Effective Fall 2026, SOCI-C1000 replaces SOC-01  
This course provides an introduction into what it means to be sociologically mindful and to think sociologically while understanding the difference from other ways of seeing the social world. The course begins with the understanding of the differences between personal troubles and public issues, and how sociologist apply various theoretical perspectives to a wide range of issues, such as: culture; socialization; social structure of society; deviance; issues of feminization; family; gender; race; inequality;

economics; politics and population; and the relationship between the individual and society. The course accents international comparisons to show how similar institutions are structures and function differently in different societies around the world.

Comments: This 12-week course is held 09/21/26 to 12/11/26.

### ACTG-04B Managerial Accounting

4.0 units:  
72.0 hours lec.

Prerequisite: \*Required\* Take ACTG-04A.

This course provides students with instruction in managerial accounting. Topics include job-order and process costing, cost-volume-profit relationships, the contribution approach to costing, budgeting, standard costing, capital budgeting and investment decisions, and relevant costs for decision making.

**Online**

92513  
Vilhauer, C        Online

### ACTG-51 Applied Accounting

4.0 units:  
72.0 hours lec.

Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is an entry-level Accounting course emphasizing a preparer approach using manual accounting methods and comparing them to current computerized accounting. Basic course work during the first half of the semester relates to the sole proprietorship type organization. During the second half of the course the emphasis changes to cover the basics of partnership and corporate accounting. Students will become acquainted with both the theory and terminology associated with the accounting cycle. Other topics in accounting will also be covered including Payroll, Cash, Inventory, Bad Debts and Depreciation.

**Online**

92013  
Stapleton, I        Online

### ACTG-52 Payroll Records & Accounting

3.0 units:  
54.0 hours lec.

Prerequisite: \*Required\* Take ACTG-04A or ACTG-51

\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course covers payroll tax laws, computation of payroll taxes, completion of payroll tax forms, and the recording of payroll transactions in the journal. Emphasis is placed on computing gross wages, calculating withholding amounts (such as Social Security, Medicare, income taxes (federal & state), and unemployment taxes); determining net pay; preparing appropriate tax forms with reporting requirements; and journalizing/posting payroll transactions. Upon completion, students should be able to analyze data, make appropriate calculations, complete payroll tax forms, and prepare accounting entries. Advisory: ENGL-85AC

**Online**

92504  
Bowman, S        Online

## Administrative Office Mgmt AOM

### AOM-59A Medical Coding and Billing

4.0 units:  
72.0 hours lec.

This course will enable the student to develop a basic knowledge of the national diagnostic and procedural coding systems and to simplify the process of filing claim forms. The student will be introduced to the major medical insurance programs, reimbursement, privacy rules, HIPAA, basic understanding of legal and regulatory considerations. The student will be able to identify and define medical terminology and abbreviations used in the outpatient setting.

**COMM-C1004 Interpersonal Communication**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Begins Fall 2026. Effective Fall 2026, COMM-C1004 replaces COMM-15 This course covers theory, research, and application of ethical one-to-one communication practices in various and diverse interpersonal relationships including in personal, professional, and social situations. Additionally, this course examines the theories, research, and application of one-to-one communication in diverse interpersonal contexts, including personal, professional, and social relationships. Students will study how communication creates, develops, and sustains identity, relationships, and social meaning. Topics include perception, self-concept, culture, language, nonverbal behavior, listening, emotion, ethics, conflict, and power. Emphasis is placed on understanding interpersonal communication from a social and behavioral sciences perspective, using theory and research methods to analyze how communication behaviors are shaped by cultural, historical, and social contexts.

**CRIM-04  
Criminal Law**

3.0 units:  
54.0 hours lec.

Prerequisite: \*Required\* Previously taken CRIM-02 and passed with a minimum grade of C ---OR--- Concurrently enrolled in CRIM-02

This course offers an analysis of the doctrines of criminal liability in the United States and the classification of crimes against persons, property, morals, and public welfare. Special emphasis is placed on the classification of crime, the general elements of crime, the definitions of common and statutory law, and the nature of acceptable evidence. This course utilizes case law and case studies to introduce students to criminal law. The completion of this course offers a foundation upon which upper-division criminal justice courses will build. The course will also include some limited discussion of prosecution and defense decision making, criminal culpability, and defenses to crime.

**FIRE-30  
Fire Protection Organization**

3.0 units:  
54.0 hours lec.

This course provides students with a comprehensive overview of the fire service, its history, traditions, and evolving role in modern society. Using Introduction to Fire Protection and Emergency Services, Seventh Edition as the primary text, students will explore the organization and function of fire departments at the local, state, and federal levels, as well as public and private fire protection systems. Topics include the chemistry and physics of fire, fire prevention, fire protection systems, emergency operations, incident command, firefighter safety, and career opportunities within the fire service. Emphasis is placed on understanding the interrelationship between fire prevention, suppression, investigation, and emergency services, preparing students for further study and future careers as fire service professionals.

**Online**  
42472  
Roe, D Online

**FIRE-31  
Fire Behavior and Combustion**

3.0 units:  
54.0 hours lec.

This course introduces students to the fundamental principles of fire behavior and combustion, providing a scientific foundation for understanding how and why fires start, spread, and are controlled. Students will study the physical and chemical properties of fire, the combustion process, ignition, heat transfer, flame spread, and the stages of fire development. The course also examines fire dynamics in different fuel types and building environments, as well as the influence of oxygen, fuel, heat, and chemical reactions on fire growth. Emphasis is placed on applying these concepts to firefighter safety, suppression strategies, and community risk reduction. Fire 31 is a core requirement in the Merced College Fire Technology Program and prepares students for more advanced fire science courses and professional fire service training.

**Online**  
42469

**FIRE-33  
Fire Protection Equipment and Systems**

3.0 units:  
54.0 hours lec.

This course introduces students to the design, operation, inspection, and maintenance of fire protection equipment and systems used in modern fire protection and life safety. Topics include water supply systems, standpipes, sprinklers, fire pumps, special extinguishing systems, detection and alarm systems, and portable fire extinguishers. Students will examine how these systems function individually and as part of an integrated fire protection plan, with emphasis on their role in safeguarding life and property while supporting fire service operations. Using current fire protection standards and codes, students will learn the fundamentals of system testing, maintenance, and acceptance procedures. Fire 33 is a core requirement in the Merced College Fire Technology Program and prepares students for careers in suppression, inspection, prevention, and fire protection system management.

**FIRE-34  
Building Construction for Fire Protection**

3.0 units:  
54.0 hours lec.

This course examines the principles of building construction as they relate to fire protection and firefighter safety. Students will study construction methods, materials, and structural design features, with emphasis on how buildings respond under fire conditions. Topics include the five types of construction, fire resistance, occupancy classifications, structural collapse hazards, and the relationship between building design and fire behavior. Students will also analyze historic fires and case studies to understand the impact of construction on fire spread, suppression strategies, and firefighter survival. Fire 34 is a required course in the Merced College Fire Technology Program and provides students with the knowledge needed to evaluate building hazards, support fire prevention, and operate safely in fire suppression and rescue operations.

**FIRE-43  
Fire Investigator**

3.0 units:  
54.0 hours lec.

Fire Investigator is designed to equip students with the foundational knowledge and practical skills necessary to conduct thorough and legally sound fire origin and cause investigations. Upon successful completion of this course, students will be able to identify and analyze fire patterns, recognize indicators of incendiary and accidental fires, apply scientific methods in fire scene examination, and properly collect, preserve, and document physical evidence. Additionally, students will develop the ability to interpret burn indicators, conduct witness interviews, and prepare comprehensive investigative reports suitable for legal proceedings. This course aligns with nationally recognized standards and supports students pursuing careers in fire investigation, law enforcement, insurance, and other fire service disciplines focused on determining fire causes and preventing future incidents.

Women in American History**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is a review of the history of women in America covering the period from 1600 to the present. The emphasis of the course is a multicultural and multi-class approach, examining the problems of women of various ethnicities, races and classes in America. The formation of gender roles is discussed along with an analysis of women's political and economic status across the period. The course will analyze women's struggle for equal rights, the impact of women's participation in significant events in American history, and regional and cultural differences in the way women are treated in society. Emphasis will be on California local and state governments, their operations and how women have politically participated in California.

### MATH-20A Basic Structure of Mathematics I

3.0 units:  
54.0 hours lec.

 Umoja

 Puente Program

ONLINE

Prerequisite: \*Advised\* Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra is advised.  
\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course is designed to complete the first course of a two-course sequence in basic concepts of mathematics required for students preparing to teach at the elementary school level. It covers elementary set theory, numeration systems, number theory, the set of integers, the set of rational numbers, and the set of real numbers.

College Algebra for Liberal Arts**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Placement as determined by the college's

multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra is advised.  
\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This is a college level course in algebra for majors in the Liberal Arts. The course will cover topics on functions, including polynomial, rational, radical, exponential, absolute value, and logarithmic functions. Solving various types of equations, linear systems, and their applications for problem solving will also be discussed.

**Music: General  
MUSG**

**MUSG-10  
Music Fundamentals**

3.0 units:  
54.0 hours lec.

This course is a study of music fundamentals throughout history, including principles and procedures of rhythm, pitch notation, musical symbols, scales, key signatures, intervals, and diatonic chords. Students will study the historical and cultural development of various music notation styles and fundamentals. Students will apply knowledge learned in class to interpret and critique music with regard to its historical and cultural context. The course applies to musicians who have learned to play/sing without training in fundamentals and to beginners in music. This course is open to all students.

Jazz Music History**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

This course presents the history of jazz music from 1890 to the present, including an introduction and analysis of significant jazz artists and their contributions to this American art form. Particular emphasis is given to developing listening skills appropriate to the understanding and appreciation of jazz. In addition, the instructor will discuss international influences and the development of jazz as a world musical form. This course is a listener's guide to the appreciation of jazz and incorporates principles of structure, expression, instrumentation, cultural and social issues integral to jazz music.

**Food Safety and Sanitation**

2.0 units:  
36.0 hours lec.

This beginning course is designed to teach basic food safety principles of personal and institutional sanitation. This includes the proper storage, preparation, and service as well as HACCP, food allergies, regulators and pest management. An emphasis is placed on the Supervisor's role in maintaining high standards for these principles. This course meets the California Retail Food Code requirement section numbers 113947.1 through 113947.6. This course is required by the Dietary Service Supervisory and Certified Dietary Manager Programs. Students in those programs are required to take and pass the ServSafe Food Handler and ServSafe Manager Exam or equivalent. This course is highly recommended to those interested in working in Food Service industry as well as application to lifelong learning.

Spanish for Spanish Speakers I**

5.0 units:  
90.0 hours lec.  
Prerequisite: \*Required\* Take SPAN-02 or the equivalent; Minimum Grade C,P;  
\*Advised\* Previously taken LRNR-30 is advised.

This course is designed for native and heritage speakers, as well as other linguistically qualified students, whose formal training in the language is not complete. The course will focus on extensive reading of all types of texts and their reworking in written form with the intention of expanding the vocabulary, creating an incipient awareness of linguistic registers, discussing items beyond the familial routine, improving written expression, and developing an appreciation for Hispanic culture as manifested in Spanish speaking countries and the U.S. This course is entirely conducted in Spanish.

**Statistics  
STAT**

**STAT-C1000  
Introduction to Statistics**

3.0 units:  
54.0 hours lec.  
Prerequisite: \*Advised\* Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.  
\*Advised\* Previously taken ENGL-C1000 (formerly ENGL-01A) is advised.

Begins Fall 2025. Effective Fall 2025, STAT-C1000 replaces MATH-10 This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines.

### AOM-43 Essentials of Business Communication

3.0 units:  
45.0 hours lec,  
27.0 hours lab.

Prerequisite: \*Advised\* Previously taken AOM-30 and AOM-50B is advised

This course covers the business writing patterns of routine, persuasive, and negative messages. Students learn the basic training in listening, speaking, and non-verbal communication in order to develop the skills needed in everyday business communication. Given a scenario, students create e-mail, memos, letters, proposals, reports, and an ePortfolio. Students also learn about doing business with other cultures and giving oral business presentations.

### AGPS-05 Soil Science

3.0 units:  
36.0 hours lec,  
54.0 hours lab.

This course provides a basic knowledge of the physical, chemical, and biological properties of soils and their characteristics. The course includes factors of fundamental soil properties, soil and plant relationships, principles of soil formation, fertilizers and soil management, salinity, pH, erosion management, and nonagricultural uses.

**Computer Science  
 CPSC**

**CPSC-01  
 Introduction to Computer Information Systems**

4.0 units:  
 54.0 hours lec,  
 54.0 hours lab.

An introduction to the basics of computing systems, impact of computers on our society, and the future of computing. Focus on using applications, algorithm design, programming basics, database management systems, networking, ethics and security, information systems, internet and web technologies, and computer systems hardware and software components. Application of these concepts and methods through hands-on projects developing computer-based solutions to problems. This course is a core course in the Computer Technology & Information Systems (CTIS) AS degree.

3.0 units:  
 36.0 hours lec,  
 54.0 hours lab.

Prerequisite: \*Advised\* Previously taken CPSC-05A or CPSC-22 is advised.

This course introduces the discipline of computer science through the use of the Java programming language, offering foundational knowledge of computer organization and an introduction to software engineering

principles. Topics include program design methodologies, development practices, coding style, testing, documentation, and a brief introduction to artificial intelligence (AI). Students will explore algorithms, control structures, methods, and elementary data structures, applying these skills to solve real-world problems through hands-on programming. This course is a core course in the Computer Science AS-T degree.

54.0 hours lec,  
54.0 hours lab.  
Prerequisite: \*Required\* Take CPSC-06 or ENGR-14 or CPSC-14. Minimum grade C,P;

This course is a continuation course in Computer Science which introduces further aspects of software design and implementation. Abstract data types, fundamental data structures and associated algorithms: lists, stacks, queues, and hash tables. Students will be expected to design, implement, test and analyze a number of programs. This course advances students' understanding of software design, challenging them to create and refine efficient programs using advanced data programming, artificial intelligence (AI) and team-work to solve real-world problems. This is a core course in the Computer Science AS-T degree.
